real estate booms and busts and leads to financial crisis and depression Turner explains why public policy needs to manage the growth and allocation of credit creation and why debt needs to be taxed as a form of economic pollution Banks need far more capital real estate lending must be restricted and we need to tackle inequality and mitigate the relentless rise of real estate prices Turner also debunks the big myth about fiat money the erroneous notion that printing money will lead to harmful inflation To escape the mess created by past policy errors we sometimes need to monetize government debt and finance fiscal deficits with central bank money Between Debt and the Devil shows why we need to reject the assumptions that private credit is essential to growth and fiat money is inevitably dangerous Each has its advantages and each creates risks that public policy must consciously balance Economic Analysis & Canadian Policy David Stager, 2013-10-22 Economic Analysis its banking systems its fiscal policy public debt and budget deficit and international trade policies patterns and rationale Part III covers consumer demand production costs supply market competition and market structure Part IV talks about labor market and wages income distribution in Canada and regional income disparity The text is recommended for economists and financial analysts especially those who would like to study about Canada's economy and its policies
