Monetary Policy In A World Of Knowledge Based Growth Quality Change And Uncertain Measurement:

Monetary Policy in a World of Knowledge-based Growth, Quality Change, and Uncertain Measurement Kunio Okina, Nihon Ginkō. Kin'yū Kenkyūjo, 2001 As the development of the knowledge economy gathers speed the structure of the global economy is undergoing drastic changes in the movement from tangible goods to a virtual output Leading economists contribute their ideas to the debate surrounding policymaking for the knowledge economy Services Industries and the Knowledge-based Economy Canada. Industry Canada, 2006 Services industries account for almost three quarters of both gross domestic product and employment in Canada a trend that Canada shares with other G 7 countries Furthermore the services sector has been responsible for most of Canada's employment creation and much of its productivity growth over the past decade and the sector's importance to the Canadian economy continues to increase Thirty renowned experts contribute to this volume which is aimed at better understanding the dynamics of Canadian services industries and identifying the types of policies most likely to improve their innovation and productivity performance **Productivity Growth, Inflation, and Unemployment** Robert James Gordon, 2004 Publisher Description **The Japanese Economy in a World of Knowledge-based Growth** Charles Irving Jones, 1998 *Understanding the Digital Economy* Erik Brynjolfsson, Brian Kahin, 2002-01-25 The rapid growth of electronic commerce along with changes in information computing and communications is having a profound effect on the United States economy President Clinton recently directed the National Economic Council in consultation with executive branch agencies to analyze the economic implications of the Internet and electronic commerce domestically and internationally and to consider new types of data collection and research that could be undertaken by public and private organizations This book contains work presented at a conference held by executive branch agencies in May 1999 at the Department of Commerce The goals of the conference were to assess current research on the digital economy to engage the private sector in developing the research that informs investment and policy decisions and to promote better understanding of the growth and socioeconomic implications of information technology and electronic commerce Aspects of the digital economy addressed include macroeconomic assessment organizational change small business access market structure and competition and employment and the workforce *Brookings Papers on Economic Activity 1998* George L. Perry, Brookings, 1999-02-01 For almost thirty years Brookings Papers on Economic Activity BPEA has provided academic and business economists government officials and members of the financial and business communities with timely research of current economic issues Contents include Articles Technical Progress and Co invention in Computing and in the Uses of Computers by Timothy Bresnahan and Shane Greenstein Causes and Consequences of Airline Fare Wars by Steven Morrison and Clifford Winston Pharmaceutical Innovations and Market Dynamics Tracking Effects on Price Indexes for Antidepressant Drugs by Ernst R Berndt Iain M Cockburn and Zvi Grilches Power Struggles Explaining Deregulatory Reforms in Electricity Markets by Matthew W White The Welfare Impacts of Competitive

Telecommunications Supply A Household Level Analysis by Frank A Wolak **Bank of Japan Monetary and Economic Studies** ,2015 **New Developments in Productivity Analysis** Charles R. Hulten,Edwin R. Dean,Michael Harper,2007-11-01 The productivity slowdown of the 1970s and 1980s and the resumption of productivity growth in the 1990s have provoked controversy among policymakers and researchers Economists have been forced to reexamine fundamental questions of measurement technique Some researchers argue that econometric approaches to productivity measurement usefully address shortcomings of the dominant index number techniques while others maintain that current productivity statistics underreport damage to the environment In this book the contributors propose innovative approaches to these issues The result is a state of the art exposition of contemporary productivity analysis Charles R Hulten is professor of economics at the University of Maryland He has been a senior research associate at the Urban Institute and is chair of the Conference on Research in Income and Wealth of the National Bureau of Economic Research Michael Harper is chief of the Division of Productivity Research at the Bureau of Labor Statistics Edwin R Dean formerly associate commissioner for Productivity and Technology at the Bureau of Labor Statistics is adjunct professor of economics at The George Washington University *Nominations Of: Roger W. Ferguson, Jr., Ben S. Bernanke, Paul S. Atkins, April H. Foley, and Joseph Max Cleland* United States. Congress. Senate. Committee on Banking, Housing, and Urban Affairs,2005 The Neoliberal Revolution in Eastern Europe Paul Dragos Aligica?,Anthony John Evans,2009-01-01 Very few studies have ventured to explore the shift in economic ideas that were such a critical factor in shaping and understanding the East European transition process Paul Dragos Aligica and Anthony J Evans have seized upon the potential that this crucial case has to illuminate the larger phenomenon of diffusion and adoption of economic ideas Two different but related research agendas are developed the study of the spread of neoliberalism as seen from the perspective of Eastern European post communist evolutions and the study of Eastern European transition as seen from an ideas centered perspective Combining a distinctive synthesis of the existing data about the spread of neoliberal economic ideas in Central and Eastern Europe with an analysis of the processes at work the authors challenge a series of misunderstandings and myths about the spread of neoliberal economic ideas The disputed topics include the myth of an Eastern European rush to embrace the theories and ideas that may be considered the mark of market fundamentalism the notion that a harsh neoliberal dogmatism was somehow imposed on the region from outside the idea that the standardization and regimentation of economic thinking was a result of the spread of the Western way of doing economics and the belief that the Eastern Europeans passively embraced this uniformity and standardization due to pressure from the Westerners This unusual synthesis will appeal to scholars in economics political science communist post communist studies and new institutionalism as well as policymakers **Monetary Policy in a Changing Economy** James H. Productivity, Technology and Economic Growth Bart van Ark, Simon K. Kuipers, Gerard H. Kuper, 2013-03-09 *Productivity Technology and Economic Growth* presents a selection of recent research advances on long term economic growth While the contributions stem from both economic history macro and microeconomics and the economics of innovation all papers depart from a common viewpoint the key factor behind long term growth is productivity and the latter is primarily driven by technological change Most contributions show implicitly or explicitly that technological change is at least partly dependent on growth itself Furthermore technology appears to interact strongly with investment in physical and human capital as well as with changes in historical political and institutional settings Together these papers are an up to date account of the remarkable convergence in theoretical and empirical work on productivity and growth over the past decades The first part deals with the characteristics of growth regimes over longer periods ranging from 20 years to two centuries The next four chapters study the determinants of productivity growth and in some cases productivity slowdown during the last quarter of the twentieth century The final five chapters focus on the role of technology and innovation as the key determinants of growth *Productivity Technology and Economic Growth* is therefore a welcome collection for academic scholars and graduate students in economics history and related social sciences as well as for policy makers

Value, Money and Capital Guido Starosta, Gastón Caligaris, Alejandro Fitzsimons, 2023-10-05 The book presents a high impact re reading of core topics in the Marx and Marxist debates including value theory the commodity nature of money complex or skilled labour the determination of the value of labour power and the nature of extraordinary surplus value Drawing on this literature the book provides original and innovative insights into key controversies in contemporary capitalism such as the increasingly intellectual character of commodity producing labour the emergence of global value chains the relevance of ground rent bearing commodities and the specific uneven developmental dynamics of resource rich countries in the global process of capital accumulation Contributing to the renewed vitality of critical studies of the economic works of Karl Marx this book will be essential reading for all those interested in contemporary debates within Marxism as well as readers of political economy economics development studies and economic sociology

Scientific Communication Rainer Fladung, 2012-02-24 Today the media and communication markets are undergoing a fundamental transformation This thesis focuses on the market for electronic media products in the higher education market and especially on the market for scientific journals In contrast to other media sectors this partial market shows a significantly different structure and different characteristics For around 10 years scientific publishers have offered electronic versions of their products which is of vital importance for the scientific communication of research activities all over the world Content

providers as well as libraries face new duties and responsibilities Librarians especially have to cope with the new assignments as advanced information intermediaries In view of decreasing library budgets and increasing costs for scientific information sources the economic responsibilities have become an important issue in librarians daily work Thus one major goal of this research is to obtain a better understanding of the way in which scientific content is traded over markets
