B. Chaudhuri,2008 *Cowrie Shells and Cowrie Money* Bin Yang,2018-12-07 Originating in the sea especially in the waters surrounding the low lying islands of the Maldives *Cypraea moneta* sometimes confused with *Cypraea annulus* was transported to various parts of Afro Eurasia in the prehistoric era and in many cases it was gradually transformed into a form of money in various societies for a long span of time Yang provides a global examination of cowrie money within and beyond Afro Eurasia from the archaeological period to the early twentieth century By focusing on cowrie money in Indian Chinese Southeast Asian and West African societies and shell money in Pacific and North American societies Yang synthesises and illustrates the economic and cultural connections networks and interactions over a longue dur e and in a cross regional context Analysing locally varied experiences of cowrie money from a global perspective Yang argued that cowrie money was the first global money that shaped Afro Eurasian societies both individually and collectively He proposes a paradigm of the cowrie money world that engages local regional transregional and global themes *The Making of National Money* Eric Helleiner,2018-07-05 Why should each country have its own exclusive currency Eric Helleiner offers a fascinating and unique perspective on this question in his accessible history of the origins of national money Our contemporary understandings of national currency are Helleiner shows surprisingly recent Based on standardized technologies of production and extraction territorially exclusive national currencies emerged for the first time only during the nineteenth century This major change involved a narrow definition of legal tender and the exclusion of tokens of value issued outside the national territory Territorial currencies rapidly became bound up with the rise of national markets and money reflected basic questions of national identity and self presentation In what way should money be managed to serve national goals Whose pictures should go on the banknotes Helleiner draws out the potent implications of this largely unknown history for today s context Territorial currencies face challenges from many monetary innovations the creation of the euro dollarization the spread of local currencies and the prospect of privately issued electronic currencies While these challenges are dramatic the author argues that their significance should not be overstated Even in their short historical life territorial currencies have never been as dominant as conventional wisdom suggests The future of this kind of currency Helleiner contends depends on political struggles across the globe struggles that echo those at the birth of national money **Rulers and Capital in Historical Perspective** Abhishek Chatterjee,2017-09 *Rulers and Capital in Historical Perspective* explains why modern banking and credit systems

emerged in the nineteenth century only in certain countries that then subsequently industrialized and became developed. Tracing the contemporaneous cases of India and the United States over time, Abhishek Chatterjee identifies the factors that were crucial to the development and regulation of a modern banking and credit system in the United States during the first third of the nineteenth century. He contrasts this situation with India's where the state never formally incorporated a sophisticated private credit system and thus relegated it to the sphere of the informal economy. Chatterjee identifies certain features in both societies, often though not always associated with colonialism, that tended to restrict the formation of modern institutionalized money and credit markets. *Rulers and Capital in Historical Perspective* demonstrates that notwithstanding the many other differences between the North American colonies prior to independence and India, the same facets of their relationships with Great Britain prevented the emergence of a modern banking system in the two respective societies.

*Encyclopaedia of Historical Metrology, Weights, and Measures* Jan Gyllenbok, 2018-04-11 This first of three volumes starts with a short introduction to historical metrology as a scientific discipline and goes on with an anthology of ancient and modern measurement systems of all kinds: scientific measures, units of time, weights, currencies, etc. It concludes with an exhaustive list of references. Units of measurement are of vital importance in every civilization through history. Since the early ages, man has through necessity devised various measures to assist him in everyday life. They have enabled and continue to enable us to trade in commonly and equitably understood amounts and to investigate, understand, and control the chemical, physical, and biological processes of the natural world. The essence of the work is an alphabetically ordered comprehensive list of measurement nomenclature, units, and scales. It provides an understanding of almost all quantitative expressions observed in all imaginable situations, including spelling variants and the abbreviations and symbols for units and various acronyms used in metrology. It will be of use not only to historians of science and technology but also to economic and social historians and should be in every major academic and national library as standard reference work on the topic.

Before the advent of steamships or the telegraph, the premier technology for long distance communication was the horse-run relay system. Every empire had one, including the Ottoman Empire. In *The Sublime Post*, Choon Hwee Koh examines how the vast Ottoman postal system worked across three centuries by tracking the roles of eight small-scale actors: the Courier, the Tatar Imperial Decrees, the Bookkeeper, the Postmaster, the Villager, Money, and the Horse. There are stories of price gouging, postmasters of murdered couriers and their bereaved widows, moonlighting officials transporting merchandise of neighboring villages engaged in long-running feuds, of bookkeepers calculating the annual costs of horseshoes, halters, and hay of Tatar couriers, and British travelers sharing

drunken nights at post stations of swimming with horses across rivers and of hiding from marauding bandits in the desert By weaving together chronicles sharia court records fiscal registers collective petitions appointment contracts and imperial decrees from the Ottoman archive this study of a large scale communications infrastructure reveals the interdependence of an empire and its diverse imperial subjects Koh traces this evolving interdependence between 1500 and 1840 to tell the history of the Ottoman Empire and its changing social order      *Guide to Indian Periodical Literature* ,1998      **Britain's Oceanic Empire** H.
