quantity theory to post Keynesian theories of endogenous money This insightful book will be of interest to all those concerned with monetary economics and macroeconomics including academic researchers graduate and senior undergraduate students particularly those looking for an alternative to current economic orthodoxy and historians of economic thought Practitioners in central banks international financial institutions the financial markets and finance ministries will also find this work invaluable

Evolutionary Financial Macroeconomics Giorgos Argitis, 2019-09-09 Thorstein Veblen and Hyman Minsky are seminal thinkers who place great importance on the interaction between processes that link finance and financial markets with economic and social evolution This book makes a contribution to the recontextualisation of the habitual non evolutionary and laissez faire macroeconomic theory and policy thus exposing the relevant contribution of the macro theories of Veblen and Minsky The book starts with an elucidation of Veblen's cultural theory of insufficient private demand waste and financial fragility and instability It shows how speculative and parasitic leverage engenders solvency illusions and risk pecuniary efficiency low quality liability structures and socially destructive boom bust cycles Minsky's creative destruction liquidity processes and coordination failures of cash flow escalate the aforementioned path dependent developments and explosive dynamics of capitalist economies The main themes of the book are the cultural evolutionary and holistic vision of macroeconomics the evolving habits of mind routines and financial

institutions the speculative manipulated and unstable financial markets as well as the financial macroeconomic destabilizing effects of pecuniary and parasitic consumption and investment This book will be of great interest to researchers intellectuals and students pursuing economics and finance *Money and Macroeconomics* David E.
