civil unrest have stimulated local resilience amongst communities and led to evolving regional institutions and environment management practices changing social relationships and producing new forms of stratification Bringing together case studies from across mainland Southeast Asia and the Island Pacific an expert team of international contributors reveal how communities at the periphery take charge of their lives champion the virtues of their own local systems of production and consumption and engage in the complexities of new structures of development that demand a response to the vacillations of global politics economy and society Inherent in this is the recognition that development as we have come to know it is far from over Each chapter emphasizes the growing recognition that ecological and environmental issues are key to any understanding and analysis of structures of sustainable development Providing diverse multidisciplinary theoretical and empirical perspectives *Environment Development and Change in Rural Asia Pacific* makes an important contribution to the revitalization of development studies and as such will be essential reading for scholars in the field as well as those with an interest in Asia Pacific studies economic geography and political economy

**Kiribati Social and Economic Report 2008** Asian Development Bank, 2009-12-01 After two impressively peaceful decades there are signs of a dangerous degree of complacency in Kiribati's view of its domestic and external affairs Forms of cultural and political resistance to change have thus been encouraged and these are handicapping the nation's response to development risks Eight leading sources of development risk confronting Kiribati are identified and these require understanding and appropriate responses in the form of well formulated national development strategies Based on a thorough assessment of risks priorities and options by sector in the main report 16 policy actions are recommended as keys to the full range of responses that need to be formulated to cope with development risk

*Integrating Sustainable Development Into National Frameworks* Janet R. Strachan, Constance Vigilance, 2011 This book brings policy making for sustainable development into the mainstream of decision making at all levels of governance and in all sectors It builds on the

**The Invention of Disaster** JC Gaillard, 2021-12-30 This theoretical contribution argues that the domination of Western knowledge in disaster scholarship has allowed normative policies and practices of disaster risk reduction to be imposed all over the world It takes a postcolonial approach to unpack why scholars claim that disasters are social constructs while offering little but theories concepts and methods supposed to be universal in understanding the unique and diverse experiences of millions of people across very different cultures It further challenges forms of governments inherited from the Enlightenment that have been rolled out as standard and ultimate solutions to reduce the risk of disaster Ultimately the book encourages the emergence of a more diverse set of world views senses and ways of knowing for both studying disasters and informing policy and practice of disaster risk reduction Such pluralism is essential to better reflect local realities of what disasters actually are around the world This book is an essential read for scholars and postgraduate students interested in disaster studies as well as policy makers and practitioners of disaster risk reduction

*Islands at Risk?* John Connell, 2013 This book provides a wide ranging comparative analysis of contemporary economic social political and environmental change in small islands island states and territories through every ocean It focuses on those island realms conventionally perceived as developing rather than developed in the Caribbean Pacific and Indian Oceans John Connell examines the decline of agriculture and the rise of tourism the problems of urbanization and the particular role of migration and remittances within a culture of migration He seeks to balance economic challenges with environmental threats notably that of climate change and social changes with the survival of culture pointing to awkward and hybrid development futures This unique study comprehensively balances environmental social and economic changes to provide a more wide ranging assessment of sustainability that will be invaluable for academics and postgraduate students on environment and international development courses
