Hiller,2011 Illustrated with more than 100 color photographs A Home of Her Own showcases a wide variety of homes and tells the stories of their making *A Time to Every Purpose* Michael Kammen,2015-12-01 In artworks from a mosaic by

Marc Chagall to schoolchildren's paintings in writings from Susan Fenimore Cooper to Annie Dillard and in diverse print sources from family genealogical registers to seed catalogs the four seasons appear and reappear as a theme in American culture. In this richly illustrated book Michael Kammen traces the appeal of the four seasons motif in American popular culture and fine arts from the seventeenth century to the present. Its symbolism has evolved through the years. Kammen explains serving as a metaphor for the human life cycle or religious faith expressing nostalgia for rural life and sometimes praising seasonal beauty in the diverse American landscape as the most spectacular in the world. Kammen also highlights artists and writers shift in attention from the glories of seasonal peaks to the dynamics of seasonal transitions as American life continued to accelerate and change through the twentieth century. Few symbols have been as pervasive, meaningful, and symptomatic in the human experience as the four seasons, and as Kammen shows in its American context, the annual cycle has been an abundant and abiding source of inspiration in the nation's cultural history.

Public Garden Management: a Global Perspective BIJAN DEHGAN, 2014-04-15

Public Gardens Management A Global Perspective provides essential information about public gardens and what is involved in designing, managing, and maintaining one. Although suitable as a textbook, its audience will include anyone with direct or peripheral responsibility for administration or supervision of a complex organization that requires scientific knowledge as well as public relations and business acumen. It may also prove useful for homeowners, for there is no fundamental difference between growing plants in a public garden or a home garden, a fact reflected in the extensive reference citations. The topic is multidisciplinary and as old as the beginning of human civilization when the concept of mental and physical restoration was realized by early man while he/she was in a natural but well-ordered garden environment. Thus began the art of garden making. Many volumes have been written on every applicable subject discussed in this and similar publications. Indeed, the voluminous literature on history, design, horticulture, and numerous related subjects is nothing short of overwhelming. Accordingly, anyone involved in management of public gardens, whether as a director or area supervisor and irrespective of the type and size of such facility, would have to have familiarity with various aspects of garden organization and administration. However, despite the enormous number and diversity of such publications, there are very few books that deal with the multiplicity of the topics in such a manner as to be practical in approach and cover most relevant and unified issues in a single book. These volumes provide the essential background information on plants, animals, management, maintenance, fundraising, and finances, as well as history, art, design, education, and conservation. They also cover a host of interrelated subjects and responsible organization of such activities as creating a children's garden, horticultural therapy, conservatories, zoological gardens, and parks, hence administration of multidimensional public gardens. Nearly 500 full-color plates representing illustrations from gardens in more than 30 countries are provided to assist and guide students and other interested individuals with history and the fundamental issues of public garden management. The 15 chapters begin with the need for public gardens, types of public gardens, historical backgrounds, as well

as design diversity Numerous quotations are included from many garden lovers landscape architects philosophers and others The authors primary aim in writing this book was based on the confidence that a relevant reference between the encyclopedic nature of some and the specific subject matter of others could be used to provide fundamental information for management of public as well as private gardens The boundary between botanical and zoological gardens and parks is no longer as distinct as it once was In part it is because a garden is not a garden without plants and in part it has become apparent that for all practical intents and purposes all animals need plants for their survival Visitors of zoological gardens expect to see more than just animals zoos are landscaped grounds Moreover most communities find it financially difficult to simultaneously operate a botanical garden or an arboretum as well as a zoological garden and city parks A number of public gardens are currently referred to as botanical and zoological garden Population density and the publics desires and expectations as well as financial requirements are among the reasons for some major city parks such as Golden Gate in San Francisco Central Park in New York City and Lincoln Park in Chicago which integrate botanical or zoological divisions as well as museums and recreational facilities While this book attempts to provide basic principles involved in public garden management it does not claim to be a substitute for broader familiarity

The Artist's Garden Jackie Bennett, 2019-10-29 The Artist's Garden will feature up to 20 gardens that have inspired and been home to some of the greatest painters of history These gardens not only supplied the

inspiration for creative works but also illuminate the professional motivation and private life of the artists themselves from Cezanne's house in the south of France to Childe Hassam at Celia Thaxter's garden off the coast of Maine. Flowers and gardens have often been the first choice for artists looking for a subject. A garden close to the artist's studio is not only convenient for daily material and ideas but also has the advantage of changing through the seasons and over time. Claude Monet's Giverny was the catalyst for hundreds of great paintings by Monet and other artists, each one different from the one before. Sometimes a whole village becomes the focus for a colony of artists as at Gerberoy in Picardy and Skagen on the northernmost tip of Denmark. This book is about the real homes and gardens that inspired these great artists, gardens that can still be visited today. The relationship between artist and garden is a complex one. A few artists, including Pierre Bonnard and his neighbour Monet, were keen gardeners as much in love with their plants as their work, while for others like Sorolla in Madrid, his courtyard home was both a sanctuary and a source of ideas.
