**Money and Monetary Policy in China, 1845-1895** Frank H. H. King, 1959     Money and Monetary Policy in China, 1845-1895 Frank H. H. King, 1959     **Money and Monetary Policy in China 1845-1895** Frank Henry Haviland King, 1965

**Money and Monetary Policy in China, 1845-1895** John F. Kain, 1965     **Historical Dictionary of Modern China (1800-1949)** James Z. Gao, 2009-06-16 The Historical Dictionary of Modern China 1800 1949 offers a concise but comprehensive examination of the political military economic social and cultural development of modern China Instead of focusing merely on the political elites of China this reference covers a variety of significant persons including women and ethnic minorities new historical concepts cultural and educational institutions and economic activities Drawing on newly available records including a large mass of governmental and family archives the narratives presented reveal new facts offer a new interpretation in accordance with China s modernization process during the late Qing period and a revisionist perspective on the Republican history The chronology records not only political and military events but also other experiences of the Chinese people The bibliography gives prominence to current literature on China s drive towards modernization and appendixes provide the reader with detailed information on China s cultural and economic transformation

Bankers and Diplomats in China 1917-1925 Roberta Allbert Dayer, 2013-11-05 First Published in 1981 Contrary to Chairman Mao s assertion that political power comes from the barrel of a gun this study contends that political power in China in the early 1920s emanated from the boardrooms of foreign banks The author s interest in the way financial concerns have shaped foreign policy began with the discovery that the Lloyd George government attempted to influence the American government s policy on the British war debts by offering concessions concerning the renewal of the Anglo Japanese Alliance This study should provide understanding concerning the causes of Chinese bitterness as well as suggest the conflicts experienced by diplomats in balancing public and private interests     China and the End of Global Silver, 1873-1937 Austin Dean, 2020-11-15 In the late nineteenth century as much of the world adopted some variant of the gold standard China remained the most populous country still using silver Yet China had no unified national currency there was not one monetary standard but many Silver coins circulated alongside chunks of silver and every transaction became an encounter of wits China and the End of Global Silver 1873 1937 focuses on how officials policy makers bankers merchants academics and journalists in China and around the world answered a simple question how should China change its monetary system Far from a narrow technical issue Chinese monetary reform is a dramatic story full of political revolutions economic depressions chance and contingency As different governments in China attempted to create a unified monetary standard in the late nineteenth and early twentieth century the United States England and Japan tried to shape the direction of Chinese monetary reform for their own benefit Austin Dean argues convincingly that the Silver Era in world history ended owing to the interaction of imperial competition in East Asia and the state building projects of different governments in China When the

Nationalist government of China went off the silver standard in 1935 it marked a key moment not just in Chinese history but in world history

Money and Government Qing-yuan Sui, 2022-03-19 This is the first book to focus comparatively on the development processes of finance in China and Japan during the prewar period The key issue is how to evaluate the role of government in the establishing of modern financial system Both China and Japan started from a similar pre modern situation in the middle of 19th century in that the monetary conditions were primitive and complicated the traditional financial institutions were money exchange based and above all both countries had faced serious challenging pressure from the Western powers International or domestic military affairs largely affected the development processes in both countries While Japan succeeded in establishing its modern financial system that consistently supported its economic growth China failed to modernize its money and banking system effectively at least until the end of World War II and the government had to change hands to the socialists which further delayed the financial development The experience of Japan suggests that the establishment of modern financial system may not simply be as a result of spontaneous order a concept used by Hayek at least for the case of a catching up country The evolution process of money and banking in China shows that the role of government especially its enforcement ability of and compliance to the rule of law may be more important than the legal origins

A History of Modern Shanghai Banking: The Rise and Decline of China's Financial Capitalism Ji Zhaojin, 2016-07-08 As the center of capitalism in China Shanghai banking provides a unique perspective for assessing the impact of the changes from financial capitalism to socialist planning banking in the early 1950s and for evaluating the reform of China's banking system since the 1980s This book offers a comprehensive history of Shanghai banking and capital markets from 1842 to 1952 and illustrates the non financial elements that contributed to the revolutionary social and financial changes since the 1950s as well as financial experiences that are significant to China's economic development today The book describes the rise and fall of China's traditional native banks the establishment of foreign banks and the creation of modern state banks while focusing on the colorful world of banking finance and international relations in modern Shanghai It assesses the Chinese government's intervention in banking and finance during the Qing dynasty and the Republican era as well as the concept of state capitalism after the establishment of the People's Republic The author examines various modern style Chinese banks through fascinating stories of Shanghai bankers In addition she provides detailed coverage of market oriented international trade banking associations the conflicts between state and society the government involvement in business the management of foreign exchange joint venture banks wartime banking and finance hyperinflation corruption and banking nationalization

Banking in Modern China Linsun Cheng, 2003-03-06 This is the first book to document in English the evolution of modern Chinese banking from the establishment in 1897 of the first Chinese bank along a Western model to the abrupt interruption of professional banking by the Japanese invasion in 1937 Drawing from original documents of major Chinese banks Linsun Cheng explains how and why the banks were able despite a succession of foreign and

domestic crises to grow into viable and self sustaining institutions in China Rich with new unpublished historical details this book offers an original comprehensive narrative of the origins and growth of professional banks Chinese Business Enterprise Rajeswary Ampalavanar Brown,1996 **The Chinese Cornerstone of Modern Banking** Frederic Delano Grant, Jr.,2014-09-25 Modern bank insurance is traced to its roots in The Chinese Cornerstone of Modern Banking The Canton Guaranty System and the Origins of Bank Deposit Insurance 1780 1933 Frederic Delano Grant Jr provides new understandings of the Canton System collective responsibility for debt at Canton and the history of deposit insurance The Canton Guaranty System inspired radical reform in New York in 1829 the ancestor of all modern deposit insurance Yet it was never the success imagined and soon failed In the Opium War the Chinese government as implicit guarantor was forced to pay its debts in full on 23 July 1843 The afflictions of the Chinese system including moral hazard too big to fail and unenforced laws remain familiar today *The Diplomacy of Involvement* David M. Pletcher,2001 Annotation Like its predecessor this important new work is focused on the connection between trade and investment on the one hand and U S foreign policy on the other David Pletcher describes the trade of the United States with the Far East the islands of the Pacific and the northwest coast of North America from 1784 the year of the first American trading expedition to China to 1844 the year of the first trade treaty with China followed immediately by the U S acquisition of Oregon and California He then traces the growth of trade and investment in Alaska Hawaii and the South Pacific from 1844 to 1890 and proceeds to do the same for China Japan and Korea In the ensuing chapters Pletcher covers the 1890s including the annexation of Hawaii the Sino Japanese War the acquisition of the Philippines and the Open Door policy in China He concludes that the American expansion across the Pacific and into the Far East was not a deliberate consistent drive for economic hegemony but a halting experimental improvised movement carried out against determined opposition and indifference and dotted with setbacks and failures Providing his own judgments about the wisdom and effectiveness of America s new endeavors Pletcher summarizes the problems and handicaps involved demonstrating that errors of the twentieth century were at least partly the result of poor preparation in the 1880s and 1890s Touching on every place where Americans undertook significant economic activity *The Diplomacy of Involvement* will be an important aid for seasoned scholars as well as an excellent introduction for the novice **Japan, China, and the Growth of the Asian International Economy, 1850-1949** Kaoru Sugihara,2005-03-24 Modern Asian economic history has often been written in terms of Western impact and Asia s response to it This volume argues that the growth of intra regional trade migration and capital and money flows was a crucial factor that determined the course of East Asian economic development Twelve chapters are organized around three main themes First economic interactions between Japan and China were important in shaping the pattern of regional industrialization Neither Japan nor China imported technology and organizations and attempted to catch up with the West alone Japan s industrialization took place taking advantage of the Chinese merchant networks in Asia while the Chinese competition was a critical factor in the

Japanese technological and organizational upgrading in the interwar period Second the pattern of China's integration into the international economy was shaped by the growth of intra Asian trade migration and capital flows and remittances While the Western impact was largely confined to the littoral region of China intra Asian trade was more directly connected with China's internal market Both the fall of the imperial monetary system and the rise of economic nationalism in the early twentieth century reflected increasing contacts with the Asian international economy Third a study of intra Asian trade and migration helps us understand the nature of colonialism and the international climate of imperialism In spite of the adverse political environment East Asian merchant and migration networks exploited economic opportunities taking advantage of colonial institutional arrangements and even political conflicts They made a contribution to national and regional economic development in the politically more favourable environment after the Second World War by providing the valuable expertise and entrepreneurship they had accumulated prewar The character of the international order of Asia governed by Western powers especially Britain but shared also by Japan for most of the period was imperialism of free trade although it eventually collapsed by the late 1930s

Chinese Hinterland Capitalism and Shanxi Piaohao Luman Wang, 2020-09-21 This book examines Shanxi piaohao private financiers from the Chinese hinterland in the economic and business history of late imperial China forming the original theory of Chinese hinterland capitalism Deepening the existing understanding of capitalist dynamics at work in the families and financial institutions of late imperial China the book foregrounds the expansionist role played by Shanxi piaohao in transforming China's market and trade from an agrarian empire to a modern nation state In a departure for economic history it also focuses on the histories of the people and their lifeworlds behind financial institutions which have previously been erased by universal capitalist narratives Persistent binary oppositions between coastal areas and hinterland state and market and institutions and families are each transcended in recounting the local histories of global capital in the marginalized countryside and borderlands of China Based on a wealth of archival material and correspondence with Shanxi piaohao offices and branches Chinese Hinterland Capitalism and Shanxi Piaohao will appeal to students and scholars of Chinese and economic history anthropology and postcolonial studies more generally

Chinese Foreign Relations: Reflections On Knowledge Production Ming Wan, 2024-11-12 With China's global ascendancy Chinese foreign policy has become a popular area of study for scholars around the world Rather than simply contributing to this subject this book sets out to reflect on the field itself using as samples some of the author's previous work both published and unpublished covering different areas of Chinese foreign policy and adopting different approaches In doing so it examines how knowledge about Chinese foreign policy has developed focusing on areas such as traditions values perspectives and regionalism The field of Chinese foreign policy has evolved along with international relations and foreign policy analysis Studies on specific topics have generally been of high quality thanks to the competitive and extensive nature of academic research and exchange despite a perceived failure to predict Beijing's current assertive foreign policy orientation Looking

forward this book reflects on how certain current tendencies excessive focus on national security narrowing of academic exchange and access between China and the West and a shift to rivalry driven analysis threaten to lower the quality of future Chinese foreign policy studies in Western countries
