Human Justice Human and the Lights,2024-04-13 Human Justice tells the compelling true story of a human rights lawyer's last trial in a 15 year career spent helping people living on the margins enforce civil rights and anti discrimination laws Corporate values which are only about money and nothing else played out to their logical extreme in the case signaling that corporatism is incompatible with a sustainable future for our species and our planet This was my last trial before leaving the law to focus on leading with my heart writes the author who wrote the book in the four months between the end the trial and the tribunal's verdict I knew before it was over that this was my last trial as I didn't want to put another human through the abuse the corporate side piled on my friend and client The harmonic divide reverberating in our society is less about blue values versus red values and more about human values versus corporate values and the corporate side is winning Through storytelling that reads like fiction the author sheds light on a justice system dominated by corporations with an infinite appetite for natural resources and human souls and calls for reorganizing society around empathy sustainability and love As the author writes human values must always trump corporate values With its timely message of unity and community Human Justice is a spark igniting a shift in society from corporatism to consciousness A candid portrait of a justice system where corporate values reign supreme Human Justice is a cathartic read for legal practitioners and a guide for readers interested in how justice really works The Magical Life of Scott Cunningham Donald Michael Kraig,2024-11-06 For years a young man joined covens to investigate and practice Wicca He puzzled over two questions and wrote a book about his answers That book

Jacobs, 2014-02-25 The symposium on which this volume was based brought together approximately fifty scientists from a variety of backgrounds to discuss the rapidly emerging set of competing technologies for exploiting a massive quantity of textual information This group was challenged to explore new ways to take advantage of the power of on line text A billion words of text can be more generally useful than a few hundred logical rules if advanced computation can extract useful information from streams of text and help find what is needed in the sea of available material While the extraction task is a hot topic for the field of natural language processing and the retrieval task is a solid aspect in the field of information retrieval these two disciplines came together at the symposium and have been cross breeding more than ever The book is organized in three parts The first group of papers describes the current set of natural language processing techniques used for interpreting and extracting information from quantities of text The second group gives some of the historical perspective methodology and current practice of information retrieval work the third covers both current and emerging applications of these techniques This collection of readings should give students and scientists alike a good idea of the current techniques as well as a general concept of how to go about developing and testing systems to handle volumes of text *Finding Metaphor in Grammar and Usage* Gerard J. Steen, 2007-11-14 Cognitive linguists have proposed that metaphor is not just a matter of language but of thought and that metaphorical thought displays a high degree of conventionalization In order to produce converging evidence for this theory of metaphor a wide range of data is currently being studied with a large array of methods and techniques *Finding Metaphor in Grammar and Usage* aims to map the field of this development in theory and research from a methodological perspective It raises the question when exactly evidence for metaphor in language and thought can be said to count as converging It also goes into the various stages of producing such evidence conceptualization operationalization data collection and analysis and interpretation The book offers systematic discussion of eight distinct areas of metaphor research that emerge as a result of approaching metaphor as part of grammar or usage language or thought and symbolic structure or cognitive process *Investment Psychology Explained* Martin J.
