Ukweli Amnesty International, 2000 The incidence of human rights violations in Africa remains a cause for concern despite the signing of The African Charter on Human and People s Rights in 1986 Deregulation and privatisation in response to global economic pressures and interests have led to growing social and economic inequalities and increasing human rights abuses Public intolerance towards crime with attendant acceptance of ill treatment torture and the death penalty has also played its part This practical problem solving handbook and the accompanying booklets combine the experiences of human rights defenders who present a step by step guide for monitoring and investigating abuses Its aim is to strengthen and professionalise human rights work throughout the world Its philosophy derives from the Swahili word refering to both truth and fact The booklets and accompanying handbook are available as a set *The Armed Forces: Instrument of Peace, Strength, Development and Prosperity* Joseph Babatunde Fagoyinbo, 2013 Across the ages technological developments have been accelerated by the military This results from the fact that able bodied vibrant youths are generally involved and are also exposed to high tech training prevailing at their times for assignments defence and security that are essential but not desired They form the Armed Forces for the nations Such brilliant military officers like Caesar and Napoleon made their marks and in contemporary times the Armed Forces of United States France Britain Australia etc are making remarkable contributions to technological developments Such infrastructure as the Internet the GPS and the cell phones are products that have significant military contributions This book scans across the major regions of the world highlights the efforts of representative countries in the regions and observes that nations that have harnessed the efforts of their Armed Forces have progressively developed It is also observed that developments in America and Europe though not entirely dependent on their Armed Forces have been greatly affected by their efforts In Asia such countries as the People s Republic of China Brazil India

Pakistan and Singapore utilise the human and material resources within the Armed Forces for national growth and cohesion. Development effort is least in the African Region except South Africa and Egypt notwithstanding the high potentials as exhibited by Nigeria's Armed Forces. Although attempts to industrialise through the Armed Forces may be able to create economic development for developing nations, such factors as historical background, economic resources, political climate, government policies and infrastructure are equally important. Handbook of Disability Marcia H. Rioux, Alexis Buettgen, Ezra Zubrow, José Viera, 2024-04-03. This important reference work maps the terrain of disability across the world by providing an overview of issues, concerns and developments in the domains of society, culture, medicine, law, policy, justice, education, economics and science and technology. It is a truly inclusive volume bringing together perspectives from researchers, activists, professionals, service providers, international development experts and policymakers based in the global North and South and it particularly focuses on the voices of the principal stakeholders, disabled persons themselves. Working from an interdisciplinary matrix, this book reviews historical developments, contemporary practices and policies. It addresses hitherto uncharted areas in the disability discourse that will be significant in the years to come. In the modern world, the social and medical responses to disability have been separation, segregation and incarceration of disabled people. These responses are reflected in practices of special education, building of asylums, medical classifications and sheltered employment. Current thinking on disability is based on the need to overcome such segregation through the enactment of human rights and socially just programmes, policies and laws such as inclusive education, affirmative action, reasonable accommodation and supported decision making. This book explores the evolution of the concept of disability over space and time and identifies approaches to disability, debility, equality and equity. Broad trends in research on disability across the world. New directions in work on disability. The emergence of a global disability movement and its etiology. Intersections of disability with other demographic variables like gender, race, caste and age and Historical and socio-economic interfaces with colonialism, globalization and social development. Spread over 14 sections and spanning more than 80 chapters, this volume is the most comprehensive up to date reference work available on the subject.
