Computers Ltd David Harel, 2004 The computer has been hailed as the greatest innovation of the 20th century and there is no denying that these technological marvels have dramatically changed our everyday lives They can fly airplanes and spaceships route millions of phone calls

simultaneously and play chess with the world's greatest players. But how limitless is the future for the computer? Will computers one day be truly intelligent, make medical diagnoses, run companies, compose music, and fall in love? In *Computers Ltd*, David Harel, the best-selling author of *Algorithmics*, illuminates one of the most fundamental yet under-reported facets of computers: their inherent limitations. Looking only at the bad news—that is, proven limitations that no amounts of hardware, software, talent, or resources can overcome—the book presents a disturbing and provocative view of computing at the start of the 21st century. Harel takes us on a fascinating tour that touches on everything from tiling problems and monkey puzzles to Monte Carlo algorithms and quantum computing, showing just how far from perfect computers are while shattering some of the many claims made for these machines. He concludes that though we may strive for bigger and better things in computing, we need to be realistic: computers are not omnipotent, far from it. Their limits are real and here to stay. Based on hard facts, mathematically proven and indisputable, *Computers Ltd* offers a vividly written and often amusing look at the shape of the future.

The Living Wisdom of Trees Fred Hageneder, 2020-02-11. A definitive guide to the sacred place trees hold for cultures around the world, exploring the natural history, folklore, and symbolism that give each genus of tree its unique character and fascination. Throughout time, trees have stood as sentinels, wise yet silent, patiently accumulating their rings while the storms of history have raged around them. Trees and humankind have always had a symbiotic relationship. Throughout the centuries, trees have offered us shelter from the cold and the heat. They have provided us with a multitude of nutritious fruits, leaves, flowers, and roots for food and medicine. They have given us wood with which to make our tools, weapons, and toys, not to mention timber for houses, fences, boats, and bridges. But perhaps most significant of all, trees have provided us with fuel for fire, which, once it was tamed, hundreds of thousands of years ago became the engine of civilization. Trees are our strongest allies. *The Living Wisdom of Trees* is a richly illustrated guide to the cultural significance of 55 trees, from Acacia to Yew, looking in particular at their botanical characteristics, their place in world myth, magic, and folklore, their healing properties, and their practical
