resources of the Maya Tropical Forest He opens with a natural history that profiles the forest's significant animals and plants Nations then describes the Maya peoples biological preserves and major archaeological sites in Mexico Guatemala and Belize Drawing on more than twenty five years of conservation work in the Maya Tropical Forest Nations tells first hand stories of the creation of national parks and other protected areas to safeguard the region's natural resources and archaeological heritage He concludes with an expert assessment of the forest's future in which he calls for expanded archaeological tourism to create an ecologically sustainable economic base for the region *North America* April Pulley Sayre,1998-01-01
