Based on a study of Cistercian monasteries in France, it develops a novel conceptualization of fraternal relations and addresses how monks and nuns strive to accomplish such relationships within their communities. By focusing on the main interaction contexts of monasteries as a form of voluntary total institution, the book shows how attempts to generate collective solidarity relate to other members as equals and avoid preferential relations that conflict with practices of everyday life. Although fraternal ideals are similar for monks and nuns, the analysis reveals significant gender differences regarding the legitimacy of different forms of interaction and relationships, as well as how to control them. The book appeals to readers with an interest in total institutions, sociology of religion, sociology of friendship, sociology of intimacy, and also to scholars with an interest in the theology of love and practical theology.      *The Oxford Handbook of the Merovingian World* Bonnie Effros, Isabel Moreira, 2020-05-01 The Merovingian era

Varieties of Monastic Experience in Byzantium, 800-1453 Alice-Mary Talbot, 2019-04-30 In this unprecedented introduction to Byzantine monasticism based on the Conway Lectures she delivered at the University of Notre Dame in 2014

Alice Mary Talbot surveys the various forms of monastic life in the Byzantine Empire between the ninth and fifteenth centuries. It includes chapters on male monastic communities mostly cenobitic but some idiorrhythmic in late Byzantium, nuns and nunneries, hermits and holy mountains, and a final chapter on alternative forms of monasticism including recluses, stylites, wandering monks, holy fools, nuns disguised as monks, and unaffiliated monks and nuns. This original monograph does not attempt to be a history of Byzantine monasticism but rather emphasizes the multiplicity of ways in which Byzantine men and women could devote their lives to service to God, with an emphasis on the tension between the two basic modes of monastic life: cenobitic and eremitic. It stresses the individual character of each Byzantine monastic community in contrast to the monastic orders of the Western medieval world and yet at the same time demonstrates that there were more connections between certain groups of monasteries than previously realized. The most original sections include an in-depth analysis of the challenges facing hermits in the wilderness and special attention to enclosed monks, recluses, and urban monks and nuns who lived independently outside of monastic complexes. Throughout, Talbot highlights some of the distinctions between the monastic life of men and women and makes comparisons of Byzantine monasticism with its Western medieval counterpart.

**Henry VIII and the English Monasteries** Francis Aidan Gasquet, 1925      **Tibet's Last Stand?** Warren W. Smith, 2010. This book offers a definitive account of the origins and events of the 2008 Tibetan uprising, which began with peaceful demonstrations by monks of Lhasa's great monasteries on the anniversary of the 1959 revolt. Noted expert Warren W. Smith Jr. argues that the uprising was a widespread response to the conditions of Chinese rule over Tibet, which revealed much about Tibetan nationalism and even more about Chinese nationalism. Interpreting the Tibetan uprising as an attempt to spoil the Beijing Olympics, China's hard-line response was repression, patriotic education, and propaganda blaming the disturbances on the Dalai clique and hostile Western forces. Smith contends that China's offensive is based upon a belief that China now has sufficient economic and political influence to make the world thoroughly revise its mistaken knowledge about the Tibet issue. He convincingly shows that far from becoming more lenient in response to Tibetan discontent, China has determined to eradicate Tibetan opposition internally and coerce the international community to conform to China's version of Tibetan history and reality.

Life Inside the Cloister Thomas Coomans, 2018-05-17. Sacred architecture as reality and metaphor in secularised Western society.

Christian monasteries and convents built throughout Europe for the best part of 1 500 years are now at a crossroads This study attempts to understand the sacred architecture of monasteries as a process of the tangible and symbolic organisation of space and time for religious communities Despite the weight of seemingly immutable monastic tradition architecture has contributed to developing specific religious identities and played a fundamental part in the reformation of different forms of religious life according to the changing needs of society The cloister is the focal point of this book because it is both architecture a physically built reality and a metaphor for the religious life that takes place within it Life Inside the Cloister also addresses the afterlife and heritagisation of monastic architecture in secularised Western society *Encyclopedia of Monasticism: A-L* William M.
