Monks And Markets:

Monks and Markets Miranda Threlfall-Holmes, 2005-02-03 The institutions of the middle ages are generally seen as tradition bound Monks and Markets challenges this assumption Durham's outstanding archive has allowed the uncovering of an unprecedented level of detail about the purchasing strategies of one of England's foremost monasteries and it is revealed that the monks were indeed reflective responsive and innovative when required If this is true of a large Benedictine monastery it is likely to be true also for the vast majority of other households and institutions in Medieval England for which comparable evidence does not exist Furthermore this study gives a unique insight into the nature of medieval consumer behaviour which throughout history and particularly from before the early modern period remains a relatively neglected subject Chapters are devoted to the diet of monks the factors influencing their purchasing decisions their use of the market and their exploitation of tenurial relationships and their suppliers **Monks and Markets** Miranda

Threlfall-Holmes, 2005-02-03 In Monks and Markets Dr Threlfall Holmes provides a unique insight into medieval consumer behaviour and challenges the view that the middle ages were bound by tradition Using Durham Cathedral Priory's outstanding archive she discusses diet the factors influencing purchasing decisions the priory's use of the market and of tenants and their suppliers **Medieval Clothing and Textiles** Robin Netherton, Gale R. Rankin, 2004-04-20 International markets have emerged as the favoured way of achieving not only economic growth and efficiency but also political freedom and social justice This book is a study of the social embeddedness of markets in an era when the ideology of the free market governs development as much as trade Using a wide theoretical framework that encompasses both anthropology and geography Katharine Rankin critiques neoliberal approaches to development showing

that the capitalist market will always be linked to local social structures and cultures of value Market led development therefore does not necessarily expand opportunity rather it can deepen existing unjust and inequality Using the example of a traditional Newar market town located in the Kathmandu Valley in Nepal Rankin explores how the value ascribed to social prestige relates to economic opportunity Showing how those in subordinate social locations are positioned to critique inequality Rankin argues that planners should pursue progressive notions of development that recognise the critical resources within culture

Thomas Swalwell Anne T. Thayer, 2025-04-17 The marginalia of Thomas Swalwell d 1539 in his many early printed books provide remarkable access to the interests and concerns of a typical late medieval English Benedictine monk Devout scholarly and busy he studies everything from how to assess tithes on sheep to theological differences between Muslims and Christians He is passionate about prayer preaching and clerical integrity while carrying significant administrative responsibilities within the Durham Priory In the early years of the Reformation his annotations reveal the impact of religious change and his response to it Illustrated with samples of Swalwell s marginalia and rare sheets of his manuscript notes this volume will be a welcome addition to the collection of anyone interested in monasticism the history of the book or early English Reformation history

State, Market, and Religions in Chinese Societies, 2005-08-01 This collection of original new studies about Mainland China and Taiwan focuses on religious changes and especially the role of the state and market in affecting religious developments in these societies Information was gathered by participant observation and interviews primarily and the analysis of documents secondarily The topics covered are the growing interest in the study of religion the methods used by Christians to be able to coexist with a communist government revival techniques being used by Buddhist monks the strategies of Daoist priests and sect leaders to attract followers the significance of mass circulating morality books and the ongoing debate about the significance and nature of Confucianism The book will interest social scientists religious specialists journalists and others who want to understand the changing nature of Chinese societies and those interested in religious change in modernizing societies

Corporate Governance in Global Capital Markets Janis Sarra, 2011-11-01 The recent failures of Enron WorldCom and other large publicly traded corporations have catapulted the issue of corporate governance onto the international stage In this timely book Janis Sarra draws together the work of legal scholars and practitioners from across North America to provide a comprehensive analysis of corporate governance issues in global capital markets The contributors to this collection explore the theoretical underpinnings of corporate governance and provide concrete illustration of different models and their outcomes While the perspectives of the authors sometimes differ their common project is to explore different normative conceptions of the corporation in order to contribute to an analysis of global trends in corporate governance The book measures diverse theoretical perspectives against the reality of corporate operations in current capital markets exploring the norms that inform shifts in governance practice and the influence of regulatory regimes on governance change Relationships both within and outside the firm are explored

including issues of accountability ethics in decision making and notions of efficiency in generation of corporate wealth Legal scholars and practitioners with an interest in corporations insolvency and securities as well as corporate directors will welcome this addition to their libraries *The Cultural Politics of Markets* Katharine N. Rankin,2004-01-01 In a neoliberal era when the ideology of the free market governs community development as much as international trade a conflict between capital and tradition is inevitable Issues such as the value ascribed to honour and social prestige are difficult to negotiate with economic opportunity Using the example of a traditional Nepalese market town Katharine Neilson Rankin explores how economic liberalization has blended with local cultures of value Utilizing the ethnographic method of anthropology and the comparative and normative thrust of geography Rankin undertakes a critique of neoliberal approaches to development She demonstrates how market led development does not expand opportunity but rather deepens existing injustice and inequality which is further exacerbated by planners eager to implement market led approaches relying on naively idealistic notions of social capital to expand poor people s access to the market *The Cultural Politics of Markets* makes a clear case for a strategic merger between anthropological and planning perspectives in thinking about the issue of market transformation

Trade Tansen Sen,2015-09-11 Relations between China and India underwent a dramatic transformation from Buddhist dominated to commerce centered exchanges in the seventh to fifteenth centuries The unfolding of this transformation its causes and wider ramifications are examined in this masterful analysis of the changing patterns of the interaction between the two most important cultural spheres in Asia Tansen Sen offers a new perspective on Sino Indian relations during the Tang dynasty 618 907 arguing that the period is notable not only for religious and diplomatic exchanges but also for the process through which China emerged as a center of Buddhist learning practice and pilgrimage Before the seventh century the Chinese clergy given the spatial gap between the sacred Buddhist world of India and the peripheral China suffered from a borderland complex A close look at the evolving practice of relic veneration in China at Famen Monastery in particular the exposition of Mount Wutai as an abode of the bodhisattva Ma jusrī and the propagation of the idea of Maitreya s descent in China however reveals that by the eighth century China had overcome its complex and successfully established a Buddhist realm within its borders The emergence of China as a center of Buddhism had profound implications on religious interactions

between the two countries and is cited by Sen as one of the main causes for the weakening of China's spiritual attraction toward India. At the same time, the growth of indigenous Chinese Buddhist schools and teachings retrenched the need for doctrinal input from India. A detailed examination of the failure of Buddhist translations produced during the Song dynasty (960-1279) demonstrates that these developments were responsible for the unraveling of religious bonds between the two countries and the termination of the Buddhist phase of Sino-Indian relations. Sen proposes that changes in religious interactions were paralleled by changes in commercial exchanges. For most of the first millennium, trading activities between India and China were closely connected with and sustained through the transmission of Buddhist doctrines. The eleventh and twelfth centuries, however, witnessed dramatic changes in the patterns and structure of mercantile activity between the two countries. Secular bulk and luxury goods replaced Buddhist ritual items; maritime channels replaced the overland Silk Road as the most profitable conduits of commercial exchange, and many of the merchants involved were followers of Islam rather than Buddhism. Moreover, policies to encourage foreign trade instituted by the Chinese government and the Indian kingdoms contributed to the intensification of commercial activity between the two countries and transformed the China-India trading circuit into a key segment of cross-continental commerce.

Beyond the Market Reyna Pastor, Esther Pascua, Ana Rodríguez López, Pablo Sánchez León, 2021-10-01 This volume deals with the social implications of land transactions, especially with the role of personal and institutional networks in a precapitalist society. The four authors discuss different aspects of the relationship between three monasteries: two Cistercians, Montederramo and Oseira, and one Benedictine nunnery, Ramiranes, and the peasant communities around them in thirteenth-century Galicia. They use a Data Base to register 2500 foros, the typical Galician land contract, and more than 8000 people and their goods. The thesis of the authors is that monasteries did not exert their authority upon powerless peasants but were constrained by preexisting networks of local people. Most of the peasants involved in the transactions turned out to be members of middle groups like knights, squires, or upper peasants. The book is especially important for all those interested in social perspectives as a means to understand the

medieval economy
