Monoamine Oxidase Inhibitors:

Monoamine Oxidase Inhibitors in Neurological Diseases Lieberman, 1994-01-12 Emphasizing the role of monoamine oxidase MAO in the etiology and pathogenesis of Parkinson's disease and Alzheimer's disease this up to date reference describes the genetics physiology biochemistry pharmacology and clinical aspects of this very important class of enzymes Details how the interaction between selegiline deprenyl and MAO may retard the progression of neurodegenerative disorders Providing the latest theories on how selegiline operates Monoamine Oxidase Inhibitors in Neurological Diseases presents fundamental information on MAO types A and B examines the distribution of MAO A and B in the normal human brain investigates the effects of disease and aging on MAO A and B analyzes a critical role for MAO in the toxic action in Parkinson's disease elucidates selegiline's novel ability to delay the progression or repair the damage of dopaminergic neurons discusses the usefulness of MAO inhibitors in psychiatric disease and more

Monoamine Oxidase Hajime Yasuhara, S. H. Parvez, 1993-01-01 Monoamine oxidase MAO a mitochondrial enzyme which metabolizes monoamines in both the central nervous system and peripheral tissues plays an important role in the regulation of neuronal activities by controlling the concentrations of monoamines During the past three decades the enzymological properties of MAO have been studied extensively The most exciting and important advances in these studies have been the determination of the nucleotide sequence coding two forms of human MAO MAO A and MAO B and the involvement of MAO in potent dopaminergic neurotoxicity of MPTP which had led to the acceleration of aetiological studies of Parkinson's disease Other aspects of MAO studies have been the application of selective and safe MAO inhibitors in the treatment of depression and Parkinson's disease as well as the correlation between MAO and several psychiatric and neurodegenerative disorders

Tipton,2013-12-01 Monoamine oxidase MAO is linked to psychiatric and neurological disorders because inhibitors of the enzyme are used clinically for treatment of affective disorders and Parkinson s disease One of the interesting new aspects of MAO is the occurrence in the human population of deletions of genes coding for one or the other enzyme subtype A or B This leads to the possibility of a genetic basis for psychiatric disorders based on MAO Subjects with deletions of type A or B and combined deletions have been described In the first group of 6 papers in this book the occurrence and characterization of these phenotypes as well as the structure of MAO genes is explored Advances in the biochemistry of MAO subtypes and their physiological function and localization in brain and periphery is included Other sections of the book deal with the neuroprotective action of MAO inhibitors and their pharmacology especially the pharmacology of new MAO B inhibitors
