**Monster Or Messiah?** ,1981      Monster Or Messiah? Walter M. Mathews,1980      *The Social and Economic Impact of New Technology 1978-84: A Select Bibliography* Leslie Grayson,2012-12-06 Silicon chip technology microprocessor technology information technology or quite simply new technology These are some of the names representing the microelectronics revolution depending upon the audience being addressed by speaker or writer No previous new industrial development has caused such widespread publicity and discussion amongst users and researchers as the new technology Concern is being expressed about the effects of new technology on employment job satisfaction social life leisure activities and the economics of commerce and industry The late 70s saw many doom laden predictions of those effects but by 1983 both management and trade unions were taking a more objective view of the social and economic impacts and many correspondents now see the new technology as a means of opening up new industries and overcoming the effects of world recessions The chip has involved the factory floor the office the supermarket and the home Electronic funds transfer electronic shopping microelectronic domestic appliances word processors and microprocessor controlled machinery mean that the new technology has pervaded all aspects of social and economic life and the developed countries are now coming to accept it as part of society as a whole Inevitably the flood of literature on the social and economic impacts of new technology has been overwhelming Unfortunately the quality of information and arguments propagated at conferences in journal papers and research reports has indicated that there has been little quantifiable evidence available on the effects of these impacts

*Philosophy and Technology II* Carl Mitcham,Alois Huning,1986-03-31 Until recently the philosophy and history of science proceeded in a separate way from the philosophy and history of technology and indeed with respect to both science and technology philosophical and historical inquiries were also following their separate ways Now we see in the past quarter century how the philosophy of science has been profoundly influenced by historical studies of the sciences and no longer concerned so single mindedly with the analysis of theory and explanation with the relation between hypotheses and experimental observation Now also we see the traditional historical studies of technology supplemented by philosophical questions and no longer so plainly focussed upon contexts of application on invention and practical engineering and on the mutually stimulating relations between technology and society Further alas the neat division of intellectual labor those clearly drawn distinctions between science and technology between the theoretical and the applied between discovery and justification between internalist and externalist approaches all have become muddled Partly this is due to internal revolutions within the philosophy and history of science the first result being recognition of their mutual relevance Partly however this state of muddle is due to external factors science at the least in the last half century has become so intimately connected with technology and technological developments have created so many new fields of scientific and philosophical inquiry that any critical reflection on scientific and technological endeavors must hence forth take their interaction into

account *Microcomputers in Early Childhood Education* John T. Pardeck, John W. Murphy, 2019-02-04 Originally published in 1989 this book differed from others on the topic of microcomputers and education at the time in that it focuses on the influence that microcomputer technology has on children in their early years specially pre school and elementary ages Microcomputers have the capacity to do great harm as well as good and a full explanation of the technical and philosophical issues involved will be of interest to a number of disciplines Other topics explored are the potential uses of microcomputer technology in early childhood education and current research and theory building on microcomputers and early education This book should be read by teachers sociologists psychologists and researchers in education

Publicity's Secret Jodi Dean, 2018-08-06 In recent decades media outlets in the United States most notably the Internet have claimed to serve the public's ever greater thirst for information Scandals are revealed details are laid bare because the public needs to know In Publicity's Secret Jodi Dean claims that the public's demands for information both coincide with the interests of the media industry and reinforce the cynicism promoted by contemporary technoculture Democracy has become a spectacle and Dean asserts that theories of the public sphere endanger democratic politics in the information age Dean's argument is built around analyses of Bill Gates Theodore Kaczynski popular journalism the Internet and technology as well as the conspiracy theory subculture that has marked American history from the Declaration of Independence to the political celebrity of Hillary Rodham Clinton The author claims that the media's insistence on the public's right to know leads to the indiscriminate investigation and dissemination of secrets Consequently in her view the theoretical ideal of the public sphere in which all processes are transparent reduces real world politics to the drama of the secret and its discovery

**Narratives and Spaces** David E. Nye, 1997 Nye analyzes the transformation of the Grand Canyon and Niagara Falls into tourist sites the history of light shows at world's fairs the New Deal programs designed to provide electricity to rural areas and the Apollo 11 moon to reveal how the spaces we live in and the technology we use are integral to American identity and a key part of American self representation Nye also turns his attention to the Internet where technology has not simply transformed space but created a whole new kind of space and with it new stories Nye analyzes the transformation of the Grand Canyon and
