understudied figure No previous work has shone a light on the chess player itself Increasingly chess histories have retreated into tidy consensus This work aspires to a novel reading of the figure as both a flickering beacon of reason and a sign of monstrosity To this end this book utilising a wide range of sources including newspapers periodicals detective novels science fiction and comic books is underpinned by the idea that the chess player is a pluralistic subject used to articulate a number of anxieties pertaining to themes of mind machine and monster

Bizarre Bioethics Henk A.M.J. ten Have, 2022-03-01 The focus of bioethical debates on exceptional cases neglects the underlying values like justice and community that would lend to a broader more well rounded understanding of today s world Discussions of ethical problems in health care too often concentrate on exceptional cases Bioethical controversies triggered by experimental drugs gene edited babies or life extension are understandably fascinating they showcase the power of medical science and technology while addressing anxieties concerning health disease suffering and death However the focus on rare individual cases in the media spotlight turns attention away from more pressing ethical issues that impact global populations such as access to health care safe food and water and the prevention of emerging infectious diseases In Bizarre Bioethics Henk A M J ten Have argues that this focus on bizarre cases leads to bizarre bioethics with a narrow agenda for ethical debate In other words although these extreme cases are undeniably real they present a limited and skewed view of everyday moral reality This focus also assumes that individuals are rational decision makers so that the role of feelings and emotions can be downgraded Larger questions related to justice solidarity community meaning and ambiguity are not appreciated Such questions used to be posed by philosophical and theological traditions but they have

been exorcised and marginalized in the development of bioethics Science ten Have writes is not a value free endeavor that provides facts and evidence it is driven by underlying value perspectives that are often based on metaphors and world views from philosophical and theological traditions Drawing on a rich analysis of the literature ten Have explains how bioethical discussion can be enriched by these metaphors and develops a broader approach that critically delves into the imaginative world views that determine understanding of the world and human existence Examining the roles of the metaphors of ghosts monsters pilgrims prophets and relics ten Have illustrates how science and medicine are animated by imaginations that fuel the search for hope salvation healing and a predictable future Bizarre Bioethics invites students researchers policymakers and teachers interested in ethics and health care to think about the value perspectives on health and disease today *The Complete Recruitment and Selection Toolkit* Glen Fox, Dean Taylor, 2000 The hands on approach of this resource will ensure that your recruitment and assessment policies are strategically focused effective fair and based on best practice It covers the whole process deciding whether and why you need to recruit analysing what you need and who you want drawing up realistic selection criteria best ways of assessing candidates including interviewing and psychometric testing choosing candidates and evaluating the procedure and troubleshooting if necessary **Who Swings the Wrecking Ball?** Mary Meinking, 2011
