Monstered Self:

The Monstered Self Eduardo González, 1992 Viewing stories and novels from an ethnographic perspective Eduardo González here explores the relationship between myth ritual and death in writings by Borges Vargas Llosa Cortázar and Roa Bastos He then weaves this analysis into a larger cultural fabric composed of the works of Chaucer Shakespeare Joyce Benjamin H G Wells Kafka Poe and others What interests González is the signature of authorial selfhood in narrative and performance which he finds willfully and temptingly disfigured in the works he examines horrific and erotic subservient and tyrannical charismatic and repellent Searching out the personal image and plot González uncovers two fundamental types of narrative one that strips character of moral choice and another in which characters choices deprive them of personal autonomy and hold them in ritual bondage to a group Thus *The Monstered Self* becomes a study of the conflict between individual autonomy and the stereotypes of solidarity Written in a characteristically allusive elliptical style and drawing on psychoanalysis religion mythology and comparative literature *The Monstered Self* is in itself a remarkable performance one that will engage readers in anthropology psychology and cultural history as well as those specifically interested in Latin American narrative

Monsters Of Medicine William W. Colliflower, M.D., 2013-11-08 Medical training gave them the skills Unfortunately evidence suggests that the medical profession is responsible for more serial killers than all other professions combined Why is this so *Monsters of medicine* chronicles the lives of five serial killer physicians in an effort to find a common thread in their lives The author believes there is evidence to support that these doctors were all pathologic narcissists Childhood abuse was present in all their lives Medical training gave them the skills and opportunities for their murderous and torturous conduct We are all patients and it is appalling to find institutions and monitoring bodies place reputation and potential liability above weeding out misconduct incompetence and our welfare The fact that two of these killers were actively practicing medicine into the waning days of the 20th century should alert us that this subject is much more than just of historical interest Key questions of cause prevention detection and treatment are explored Absolute answers are difficult to expose but one thing remains almost certain There is likely another serial killer physician practicing medicine at this time somewhere in the world

ancient Greece the savage for imperial Europe defines our own identity by the very idea that it is the Other not we who is unknown He then goes on to examine the image of the monster and with the aid of powerful examples from ancient Minotaurs to medieval demons and post modern enemies argues that human selfhood itself frequently contains a monstrous element In the final part of the book Richard Kearney shows how many gods are still alive for people today testifying to the human psyche s yearning to slip the shackles of our finitude and death Throughout Richard Kearney shows how strangers gods and monsters do not merely reside in myths or fantasies but constitute a central part of our cultural unconscious Above all he argues that until we understand better that the Other resides deep within ourselves we can have little hope of understanding how our most basic fears and desires manifest themselves in the external world and how we can learn to live with them

Monsters and Monstrosity in Media: Reflections on Vulnerability Yeojin Kim, Shane Carreon, 2024-04-16 As monstrous bodies on screen signal a wide range of subversive destabilization of the notions of identity and community this anthology asks what meanings monsters and monstrosity convey in relation to our recent circumstances shaped by neoliberalism and the pandemic that have led to the intensified tightening of border controls by nation states the intensive categorization of un identifiable bodies and subsequent forms of isolations and detachments imposed by social distancing and the rapid transition of sociality from reality

to virtual reality Presenting various thinkings along the lines of the body and its representations as cultural text together with popular or recent media productions showing various bodies deemed to be monstrous as they either cross conventionally held borders or stay in liminal spaces such as between human animal human machine virtual bodies corporeal flesh living death and other permeable borders this volume looks into the on screen constructions of the monster and monstrosity not only as they represent notions of difference perceived non belongings and disruptions of traditional identity markers but also as they either conceal various vulnerabilities or implicitly endorse violence towards the labeled Other

Monsters and Monstrosity Daniela Carpi, 2019-06-17 Every culture knows the phenomenon of monsters terrifying creatures that represent complete alterity and challenge every basic notion of self and identity within a cultural paradigm In Latin and Greek culture the monster was created as a marvel appearing as something which like transgression itself did not belong to the assumed natural order of things Therefore it could only be created by a divinity responsible for its creation composition goals and stability but it was triggered by some in or non human action performed by humans The identification of something as monstrous denotes its place outside and beyond social norms and values The monster evoking transgression is most often indistinguishable from reactions to the experience of otherness merging the limits of humanity with the limits of a given culture The topic entails a large intersection among the cultural domains of law literature philosophy anthropology and technology Monstrosity has indeed become a necessary condition of our existence in the 21st century it serves as a representation of change itself In the process of analysis there are three theoretical approaches psychoanalytical representational ontological The volume therefore aims at examining the concept of monstrosity from three main perspectives technophobic xenophobic superdiversity Today s globalized world is shaped in the unprecedented phenomenon of international migration The resistance to this phenomenon causes the demonization of the Other seen as the antagonist and the monster The monster becomes therefore the ethnic Other the alien To reach this new perspective on monstrosity we must start by examining the many facets of monstrosity also diachronically from the philological origin of the term to the Roman and classical viewpoint from the Renaissance medical perspective to the religious background from the new filmic exploitations in the 20th and 21st centuries to the very recent ethnological and anthropological points of view to the latest technological perspective dealing with artificial intelligence

Beyond Mothers, Monsters, Whores Caron E.

Gentry, Laura Sjoberg, 2015-08-15 Beyond Mothers Monsters Whores takes the suggestion in Mothers Monsters Whores that it is important to see genderings in characterizations of violent women and to use critique of those genderings to retheorize individual violence in global politics It begins by demonstrating the interdependence of the personal and international levels of global politics in violent women s lives but then shows that this interdependence is inaccurately depicted in gender subordinating narratives of women s violence Such narratives the authors argue are not only normatively problematic on the surface but also intersect with other identifiers such as race religion and geopolitical location

Monsters in Society: An

Interdisciplinary Perspective Andrea S. Dauber, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2014 Are monsters and the monstrous phenomena that transition time and space If monsters were a part of our past and are a part of our present will they be a part of our future This volume demonstrates the universality of monsters and the ubiquitous nature of monsterisation from different perspectives and shows that the creation of monsters and our ongoing confrontation with them is bound by human sociality so much so that the monsters we have been surrounded by and will encounter in the future bear characteristics that mirror inherently human modes of identity construction for example via age gender and visual appearance This process can differ across life stages such as childhood versus adulthood Monsters or what a society identifies as monstrous are not simply cultural artefacts communicated via literature historical accounts or modern media productions such as films or series They are integral components of the human psyche Therefore they have existed in symbiosis with the homo socius and will probably continue to do so in his future Real-Life Monsters Stephen J. Giannangelo, 2012-07-06 This book presents an in depth psychological analysis of the development of the serial killer personality that will fascinate all readers from the experienced criminology student to the casual true crime reader Real Life Monsters A Psychological Examination of the Serial Murderer takes a different approach than most titles on a similar topic the author develops and proposes an original psychological explanation rather than simply repeating some of the long held theories for these criminals heinous actions The work addresses current issues presents detailed commentary and personal observation and contains photographs that will fascinate general readers interested in the subjects of true crime serial killers and psychopathology The first part of the book carefully examines the research past and present regarding clinical psychological societal and biological bases for violent behavior specific to the serial murderer Part two establishes a novel theory of the pattern of violence and then explores this hypothesis through eight case studies interviews with serial killers and elemental analysis The work also contains a chapter based on conversations between the author and a convicted serial murderer **The Unnameable Monster in Literature and Film** Maria Beville, 2013-10-30 This book visits the Thing in its various manifestations as an unnameable monster in literature and film reinforcing the idea that the very essence of the monster is its excess and its indeterminacy Tied primarily to the artistic modes of the gothic science fiction and horror the unnameable monster retains a persistent presence in literary forms as a reminder of the sublime object that exceeds our worst fears Beville examines various representations of this elusive monster and argues that we must look at the monster rather than through it at ourselves As such this book responds to the obsessive manner in which the monsters of literature and culture are managed in processes of classification and in claims that they serve a social function by embodying all that is horrible in the human imagination The book primarily considers literature from the Romantic period to the present and film that leans toward postmodernism Incorporating disciplines such as cultural theory film theory literary criticism and continental philosophy it focuses on that most difficult but interesting quality of the monster its unnameability in order to

transform and accelerate current readings of not only the monsters of literature and film but also those that are the focus of contemporary theoretical discussion
