**God's Battle with the Monster** Wakeman,2023-07-10 **The Giant Squid in Transatlantic Culture** Otto

Latva,2023-09-30 This book builds upon the extensive study of the historical relationship between sea animals and humans in transatlantic culture during the eighteenth and nineteenth centuries It exposes the present understanding of the human relationship with the giant squid not only as too simplistic but also as historically inaccurate For instance it redefines the earlier understanding that humans and especially seafarers have understood giant squid as horror evoking and ugly creatures since the dawn of history and explains the origins of mythical sea monsters such as the Kraken The book is however more than a critical response to previous work It will point out that animals such as cephalopods which have largely

been defined in biological contexts in recent times have a fascinating and multivariate past entangled with the history of humans in many remarkable ways Hence this book is not just about perceptions of giant sized squid or cephalopods but a historical inquiry into the transatlantic culture from the late eighteenth century to the turn of the twentieth century It will provide new knowledge about the history of mollusc studies seafaring culture and more broadly of the relationship between humans and animals during the period

*The Poetic Genesis of Old Icelandic Literature* Mikael Males, 2019-12-16 This book assesses the importance of poetry for the Old Icelandic literary flowering of c 1150 1350 It addresses the apparent paradox that an extremely conservative form of literature namely skaldic poetry was at the core of the most innovative literary and intellectual experiments in the period The book argues that this cannot simply be explained as a result of strong local traditions as in most previous scholarship Thus for instance the author demonstrates that the mix of prose and poetry found in kings sagas and sagas of Icelanders is roughly contemporary to the written sagas Similarly he argues that treatises on poetics and mythology including Snorri's Edda are new to the period not only in their textual form but also in their systematic mode of analysis The book contends that what is truly new in these texts is the method of the authors derived from Latin learning but applied to traditional forms and motifs as encapsulated in the skaldic tradition In this way Christian Latin learning allowed for its perceived opposite vernacular oral literature of pagan extraction to reach full fruition and to largely replace the very literature which had made this process possible in the first place
