Maurice Maughan,1978 **Theory of the Combination of Observations Least Subject to Error** Carl Friedrich Gauss,1995-01-01 In the 1820s Gauss published two memoirs on least squares which contain his final definitive treatment of the area along with a wealth of material on probability statistics numerical analysis and geodesy These memoirs originally published in Latin with German Notices have been inaccessible to the English speaking community Here for the first time they are collected in an English translation For scholars interested in comparisons the book includes the original text and the English translation on facing pages More generally the book will be of interest to statisticians numerical analysts and other scientists who are interested in what Gauss did and how he set about doing it An Afterword by the translator G W Stewart places Gauss s contributions in historical perspective *Adjustment of Observations by the Method of Least Squares ...*

Parameter Estimation for Scientists and Engineers Adriaan van den Bos,2007-08-03 The subject of this book is estimating parameters of expectation models of statistical observations The book describes the most important aspects of the subject for applied scientists and engineers This group of users is often not aware of estimators other than least squares Therefore one purpose of this book is to show that statistical parameter estimation has much more to offer than least squares estimation alone In the approach of this book knowledge of the distribution of the observations is involved in the choice of estimators A further advantage of the chosen approach is that it unifies the underlying theory and reduces it to a relatively small collection of coherent generally applicable principles and notions *Geodetic Surveying and the Adjustment of Observations (method of Least Squares)* Edward Lovering Ingram,1911 **The Adjustment of Observations** Thomas Wallace Wright,2015-08-04 Excerpt from *The Adjustment of Observations By the Method of Least Squares With Applications*

to Geodetic Work This book originated in this way While employed as Assistant Engineer on the Survey of the Northern and North western Lakes many questions came up in the course of the work for which no help could be found in any publication in the library of the Survey Conclusions were in general reached often after long continued discussions I at the time made notes of the questions and of the solutions obtained in order that if similiar questions should again come up they might more readily be dealt with At the close of the Survey I had a large collection of notes of this kind Shortly afterwards on entering college work these notes were arranged in systematic order Also at the same time an account of the Coast and Geodetic Survey methods of work was added As only a comparatively small edition was printed from type in the first place the book has been out of print for a number of years though repeated requests have been made for copies In the spring of 1903 Superintendent Tittmann U S Coast and Geodetic Survey wrote to the publishers as follows As this book is one of exceeding importance to the Survey and will grow even more needful in this work and as I take it in many fields of scientific engineering operations I beg to inquire whether you anticipate issuing a new edition of this useful book This led to some correspondence and it was finally arranged that Mr John F Hayford Chief of the Computing Division and Inspector of Geodetic Work should assist in revising the book About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
