Redeeming The Communist Past The Regeneration Of Communist Parties In East Central Europe:

Redeeming the Communist Past Anna Maria Grzymala-Busse, 2002 This major study examines one of the most surprising developments in East Central European politics after the democratic transitions of 1989 the completely unexpected regeneration of the former communist parties After the collapse of the communist regimes in 1989 these ruling communist parties seemed consigned to oblivion However confounding scholarly and popular expectations all of these parties survived Some have even returned to power This in depth comparative study systematically analyzes the trajectories of four cases the Czech Republic Slovakia Poland and Hungary with additional examination of other communist party successors Relying on extensive and unprecedented primary research this analysis employs a consistent analytical framework that combines the peculiarities of the post socialist cases with broad theoretical concerns of institutional analysis democratic transitions and consolidation and party politics

Redeeming the Communist Past Anna M. Grzymala-Busse, 2002-02-18 This major study examines the regeneration of the former communist parties in East Central Europe after 1989 Party Systems in East Central Europe Ladislav Cabada, Vít Hloušek, Petr Jurek, 2014-01-23 Party Systems in East Central Europe analyzes the formation of political parties in the nations of this region In the first part the authors concentrate on the key periods and turning points in this development connecting them with the democratization of the countries in the region in the last third of the nineteenth century This includes a look at the period before World War I between the wars and particularly in the times after the fall of the communist regimes The analysis focuses chiefly on the ideological background that gave way to the rise of political parties in the region In relation to this the authors base their writing mainly on the socio political theory of Stein Rokkan The second part of the book is a political analysis of the key aspects related to party politics First the authors examine the ties of political parties to broad social processes using the classic theories of Giovanni Sartori and Stein Rokkan Next they continue with the analysis of the operation of parties within governments with a special focus on the creation of coalition governments functioning of coalitions and coalition governance Last some defects are reflected upon as well as unfinished processes related to the fast establishment of political parties in the region e g absence of firm links with social groups high volatility instability of parties etc *The Routledge History of East Central Europe Since 1700* Irina Livezeanu, Arpad von Klimo, 2017-03-16 Covers territory from Russia in the east to Germany and Austria in the west exploring the origins and evolution of modernity in this region Provided by the publisher **Europe's Radical Left** Luke March, Daniel Keith, 2016-10-20 Although the most pernicious consequences of the crisis have apparently abated the long term political repercussions remain unclear Whereas most attention has focused on the right wing populist parties the rejuvenation of the left is an unwritten story of post crisis politics This volume addresses this story with three principal aims to examine the radical left intellectual response to the crisis i e how actors conceptualise the causes of crisis and its consequences to examine the radical left electoral response to the crisis i e how the crisis has aided or weakened the

electoral success of radical left parties and movements to examine organisational responses i.e. whether the crisis has resulted in new party structures methods of organising and internal party tendencies The result is a comprehensive compendium drawing on cutting edge research from leading European experts to present the first comparative analysis of how the far left of the political spectrum has responded to the crisis It furthers our understanding both of the dynamics of European party systems and the wider consequences of the Great Recession *National Narcissism* Eric Beckett Weaver, 2006 *National Narcissism* offers a groundbreaking anthropological and sociological approach to nationalism through an exposé of the belief systems and psychology of extreme nationalists for whom nationalism is a form of religion This theoretical approach is illustrated with examples primarily taken from Hungary with a special focus in two chapters on the role of gender in nationalism The state of politics and society in Hungary is also examined in a way that steps beyond the usual simplistic flat narratives of what Hungarians are like by stressing the broad variety of viewpoints current in Hungarian society the milieu in which a small minority of extreme nationalists are able to make their voice heard out of proportion to their numbers or political support The theory offered by *National Narcissism* has wide ranging implications for the future study of extremist nationalism in nation states throughout the world Sociologists anthropologists nationalism studies specialists social psychologists and historians of the recent past in Hungary will find that this theoretical book richly illustrated with examples from Hungarian society challenges positive and negative stereotypes about nationalism extremism post communism central and eastern Europe the European Union and not least about Hungarians themselves *Historical Legacies of Communism in Russia and Eastern Europe* Mark Beissinger, Stephen Kotkin, 2014-07-07 This book takes stock of arguments about the historical legacies of communism that have become common within the study of Russia and East Europe more than two decades after communism's demise and elaborates an empirical approach to the study of historical legacies revolving around relationships and mechanisms rather than correlation and outward similarities Eleven essays by a distinguished group of scholars assess whether post communist developments in specific areas continue to be shaped by the experience of communism or alternatively by fundamental divergences produced before or after communism Chapters deal with the variable impact of the communist experience on post communist societies in such areas as regime trajectories and democratic political values patterns of regional and sectoral economic development property ownership within the energy sector the functioning of the executive branch of government the police and courts the relationship of religion to the state government language policies and informal relationships and practices *Transitions* Juan A. Roche Cárcel, 2016-06-30 The monograph essentially seeks to compare the sociopolitical construction processes of Spain Latin America Eastern Europe and North Africa And even though the papers included in it deal above all with the differences between the different democratic developments mentioned above the central idea transmitted is that they have been marked by complexity instability and risk in short by fragility In this respect the issue offers a twofold look as it tries to analyze the transition processes towards

democracy and at the same time the current state of democracy its fragility or its lack of quality both approaches being merged into one

Historical Memory of Central and East European Communism Agnieszka Mrozik,Stanislav Holubec,2018-03-19 Every political movement creates its own historical memory The communist movement though originally oriented towards the future was no exception The theory of human history constitutes a substantial part of Karl Marx s and Friedrich Engels s writings and the movement inspired by them very soon developed its own strong historical identity combining the Marxist theory of history with the movement s victorious milestones such as the October Revolution and later the Great Patriotic War which served as communist legitimization myths throughout almost the entire twentieth century During the Stalinist period however the movement s history became strongly reinterpreted to suit Joseph Stalin s political goals After 1956 this reinterpretation lost most of its legitimating power and instead began to be a burden The unwanted memory of Stalinism and subsequent examples of violence the Gulag Katy the 1956 Budapest uprising and the 1968 Prague Spring contributed to the crisis of Eastern European state socialism in the late 1980s and led to attempts at reformulating or even rejecting communist self identity This book s first section analyzes the post 1989 memory of communism and state socialism and the self identity of the Eastern and Western European left The second section examines the state socialist and post socialist memorial landscapes in the former German Democratic Republic Czechoslovakia Czech Republic Poland Lithuania Ukraine and Russia The final section concentrates on the narratives the movement established when in power about its own past with the examples of the Soviet Union Poland Romania and Czechoslovakia

Preying on the State Venelin I. Ganey,2013-07-02 Immediately after 1989 newly emerging polities in Eastern Europe had to contend with an overbearing and dominant legacy the Soviet model of the state At that time the strength of the state looked like a massive obstacle to change less than a decade later the state s dominant characteristic was no longer its overweening powerfulness but rather its utter decrepitude Consequently the role of the central state in managing economies providing social services and maintaining infrastructure came into question Focusing on his native Bulgaria Venelin I Ganey explores in fine grained detail the weakening of the central state in post Soviet Eastern Europe Ganey starts with the structural characteristics of the Soviet satellites and in particular the forms of elite agency favored in the socialist party state As state socialism collapsed Ganey demonstrates its institutional legacy presented functionaries who had become accustomed to power with a matrix of opportunities and constraints In order to maximize their advantage under such conditions these elites did not need a robust state apparatus in fact all of the incentives under postsocialism pushed them to subvert the infrastructure of governance Throughout *Preying on the State* Ganey argues that the causes of state malfunctioning go much deeper than the policy preferences of free marketeers who deliberately dismantled the state He systematically analyzes the multiple dimensions implications and significance of the institutional and social processes that transformed the organizational basis of effective governance

shapes the nineteenth century literary and artistic imagination Lustration and Transitional Justice Roman David, 2011-09-21 How do transitional democracies deal with officials who have been tainted by complicity with prior governments Should they be excluded or should they be incorporated into the new system In Lustration and Transitional Justice Roman David examines major institutional innovations that developed in Central Europe following the collapse of communist regimes While the Czech Republic approved a lustration vetting law based on the traditional method of dismissals Hungary and Poland devised alternative models that granted their tainted officials a second chance in exchange for truth David classifies personnel systems as exclusive inclusive and reconciliatory they are based on dismissal exposure and confession respectively and they represent three major classes of transitional justice David argues that in addition to their immediate purposes personnel systems carry symbolic meanings that help explain their origin and shape their effects In their effort to purify public life personnel systems send different ideological messages that affect trust in government and the social standing of former adversaries Exclusive systems may establish trust at the expense of reconciliation while inclusive and reconciliatory systems may promote both trust and reconciliation In spite of its importance the topic of inherited personnel has received only limited attention in research on transitional justice and democratization Lustration and Transitional Justice is the first attempt to fill this gap Combining insights from cultural sociology and political psychology with the analysis of original experiments historical surveys parliamentary debates and interviews the book shows how perceptions of tainted personnel affected the origin of lustration systems and how dismissal exposure and confession affected trust in government reconciliation and collective memory **Coalition Governance in Central Eastern Europe** Torbjörn Bergman, Gabriella Ilonszki, Wolfgang C. Müller, 2019-12-12 Coalition government among different political parties is the way most European democracies are governed Traditionally the study of coalition politics has been focused on Western Europe Coalition governance in Central Eastern Europe brings the study of the full coalition life cycle to a region that has undergone tremendous political transformation but which has not been studied from this perspective The volume covers Bulgaria Estonia the Czech Republic Latvia Lithuania Hungary Poland Romania Slovakia and Slovenia It provides information and analyses of the coalition life cycle from pre electoral alliances to coalition formation and portfolio distribution governing in coalitions the stages that eventually lead to government termination and the electoral performance of coalition parties In Central Eastern Europe few single party cabinets form and there have been only a few early elections The evidence provided shows that coalition partners in the region write formal agreements coalition agreements to an extent that is similar to the patterns that we find in Western Europe but also that they adhere less closely to these contracts While the research on Western Europe tends to stress that coalition partners emphasize coalition compromise and mutual supervision there is more evidence of ministerial government by individual ministers and their parties There are also some systems where coalition governance is heavily dominated by the prime minister No previous study has covered the full coalition life cycle in all of the

Gender, Institutions and Political Representation Cristina Chiva,2017-11-21 This book traces the struggles over the institutions of political representation in Central and Eastern Europe focusing on the factors that have held women back over the post communist period as well as on the growing evidence for change throughout the region Post communist Europe has long raised two puzzles for scholars of women s representation in politics First why have women been under represented in politics in every country in the region since communism s collapse Secondly why are there relatively few cases where women s advocates have been successful in pressing for change This comparative study of Europe s new democracies argues that these puzzles are best understood as questions about male dominance that is about the mechanisms that sustain or alternatively change long established patterns of male over representation in politics over time The author covers six EU member states Bulgaria the Czech Republic Hungary Poland Romania and Slovakia during the period 1990 2016 The book will be of use to students and scholars in the fields of Comparative Politics Democracy and Democratization European Studies Gender Studies Post Communist Studies and Central and Eastern European Studies
