Redefining Security In The Middle East:

Redefining security in the Middle East Tami Jacoby, Brent Sasley, 2018-07-30 For over five decades the Cold War security agenda was distinguished by the principal strategic balance that of a structure of bipolarity between the United States US and the Soviet Union USSR This book seeks to draw from current developments in critical security studies in order to establish a new framework of inquiry for security in the Middle East It addresses the need to redefine security in the Middle East The focus is squarely on the Arab Israeli context in general and the Palestinian Israeli context in particular The character of Arab Israeli relations are measured by the Israeli foreign policy debate from the 1950s to the 1990s A dialogue between Islam and Islamism as a means to broaden the terrain on which conflict resolution and post bipolar security in the Middle East is to be understood is presented The Middle East peace process MEPP was an additional factor in problematizing the military strategic concept of security in the Middle East The shift in analysis from national security to human security reflects the transformations of the post Cold War era by combining military with non military concerns such as environmental damage social unrest economic mismanagement cultural conflict gender inequity and radical fundamentalism By way of contrast to realist international relations IR theory developing world theorists have proposed a different set of variables to explain the unique challenges facing developing states Finally the book examines the significance of ecopolitics in security agendas in the Middle East An electronic edition of this book is freely available under a Creative Commons CC BY NC ND licence

Redefining Security in the Middle East Tami Amanda Jacoby, Brent Sasley, 2002 Publisher Description

Regional Security in the Middle East Pinar Bilgin, 2004-09-09 This is an accessible yet critical analysis of regional security in the Middle East Using a non realist approach Bilgin provides a comprehensive study of the past present and future of security in the region She also considers the question of identity formation explaining how and why various regional representations came into being and explor

Human Security in the Middle East and North Africa Alaa Al-Din Arafat, 2024-12-20 This book analyzes major human security threats in the MENA region including food water energy climate and health security It also examines sectarian conflict terrorism and poverty in the region The author highlights the relationship between human security concerns and conventional or military security threats He demonstrates how MENA nations failed to respond to the region s human security threats and to develop a human security formula and regional security architecture that included both human and conventional security threats Therefore this book concludes that the MENA region s future will be determined by its governments ability to address human security threats

Regional Security in the Middle East , **Socio-Political Order and Security in the Arab World** Andreas Krieg, 2017-03-27 This book examines the connection between socio politics and security in the Arab World In an effort to understand the social and political developments that have been on going in the Arab World since the 1990s culminating in the Arab Spring Krieg moves beyond liberal deterministic assumptions most notably that the promotion of liberal values and democracy are the

panacea for the structural problems of the region. Instead, this text advances the case that grievances related to individual security needs are at the heart of regional insecurity and instability. Looking towards the future, the author asserts that regimes can only be resilient if they are able to provide for individual security inclusively. When regimes fail to cater for public security, they might be replaced by alternative non-state security providers.

Emerging Security Threats in the Middle East Ashok Swain, Anders Jägerskog, 2016-04-12. Increasingly, the Middle East and its growing population face a highly complex and fragile security system. The rich deposits of natural resources such as oil and gas suffer from a strained renewable resource base that includes water and arable land. This leads to water scarcity, desertification, and land degradation. Increasing population, industrialization, and urbanization put more and more demand on the food supply. Energy insecurity may not be generally associated with the Middle East, but the countries in the eastern Mediterranean part have been traditionally vulnerable to it as their fossil fuel endowments have been low. Another issue is the large-scale temporary labor migration and the large number of forced migrants, refugees, and internally displaced persons. The book analyzes these emerging security challenges in a comprehensive and systematic manner. It draws national and regional security issues into both the global security and human security perspectives.

The Many Faces of National Security in the Arab World Rex Brynen, Bahgat Korany, Paul Noble, 2016-07-27. Two Gulf wars and the continuing Arab-Israeli conflict have highlighted the salience of military factors in the Middle East. This book argues, however, that many of the most serious security challenges to Arab states and societies are rooted not in external military threats but in the imperatives of socio-economic development. Contributors examine the regional security environment, the social and political impact of regional militarization, and underdevelopment as a source of regional insecurity.

Towards Rethinking Politics, Policy and Polity in the Anthropocene Hans Günter Brauch, 2025-02-24. Humankind faces two anthropogenic threats to its survival that are closely linked. The first is the end of the Holocene and the start of the Anthropocene, which was marked by the test of a nuclear bomb on 16 July 1945. In the prevailing peace and security narrative, nuclear weapons and the other country bloc or alliance pose a perceived threat to humankind's survival. In the Anthropocene narrative, we are the threat through our way of life and the burning of fossil fuels. The start of the Anthropocene coincides with a change in the international order with the setting up of the UN and the Bretton Woods Institutions. Three stages of this order are distinguished: the Cold War bipolarity, the post-Cold War era unipolarity, and the end of the rule-based global liberal order, multipolarity, on 24 February 2022. In this book, ten multidisciplinary perspectives discuss complexity, Anthropocene geopolitics, peace and security discourses, and the debate on the Anthropocene planetary boundaries, complex crises, and integrative geography in the Anthropocene governance and politics and the Patriocene and gender. Both existential threats for humankind are illustrated by cover photos of the first nuclear weapons test on 16 July 1945 and by Category 5 Hurricane Otis, an extreme weather event impacting on Acapulco in Mexico on 25 October 2023. The Anthropocene as a new epoch of Earth history coincides in 1945 with a change in the

international order In the security and peace narrative the other and nuclear weapons pose an existential threat in the Anthropocene narrative This dual existential change requires a rethinking of politics policy and polity In the social sciences the Anthropocene is being discussed from multidisciplinary perspectives geography political science and peace security and gender studies This is an open access publication **World Society and the Middle East** S. Stetter, 2008-07-11 Offers a novel cross disciplinary theoretical perspective on conflict and conflict transformation in world society and integrates the study of conflicts in the Middle East region into a modern systems theoretical framework
