Ecological Principles for Sustainable Education Liza Ireland, 2024-01-29 This book explores how the education sector can transition to being truly sustainable and why necessary innovations for educational change are being subverted and undermined when mapped onto the existing industrial educational system Based on PhD case study research with schools that are modelling and teaching sustainability action research and the author's 40 years of working in the K 12 system this volume examines how education continues to perpetuate the status quo and why education innovations are thus undermined It shows the importance of redesigning

education based on the principles of sustainable living systems and explores how this can be achieved across all levels of the educational system. The first part of the book establishes a new vision of sustainable education whilst the second brings to light the industrial mechanistic root metaphors in current practice across leadership and administration buildings and grounds curriculum design teaching and learning that are subverting innovative efforts. From understanding the foundational influential problematic root metaphors of our Industrial educational system it moves to explore how the ecological principles of sustainability can be used to rethink and redesign an educational system from its administration leadership and policy to curriculum buildings grounds and resources through to teaching and learning that will support sustainability innovation and creativity developing systems thinking and sustainability as a frame of mind. Exploring how the education sector can transition to being truly sustainable and find new ways to traverse the problematic Industrial world view at this pivotal moment will appeal to administrators post secondary educators policymakers and researchers and scholars of sustainability education educational leadership curriculum design and educational philosophy.

The Finnish Education Mystery Hannu Simola, 2014-11-20 Finnish education has been a focus of global interest since its first PISA success in 2001. After years of superficial celebration astonishment and educational tourism the focus has recently shifted to what is possibly the most interesting element of this Finnish success story that Finnish schools have been effectively applying methods that go against the flow of global education policy with no testing no inspection no hard evaluation no detailed national curriculum no accountability and no hard competition. From a historical and sociological perspective the Finnish case is not merely a linear success story but is part of a controversial and paradoxical struggle towards Utopia towards egalitarian schooling. Bringing together a collection of essays by Hannu Simola and his colleagues this book analyses the key dimensions of schooling in Finland to provide a critical analytical and uncompromising picture of the Finnish education system. Going beyond the story of success the book reveals the complexities of educational change but also identifies opportunities and alternatives for smart political action in complex and trans national societies. Including a selection of key chapters on Finnish education policy and governance teacher education and classroom cultures the book will be of interest to researchers academics and postgraduate students in comparative education teacher education educational policy and educational reform.

Comprehensive Systems Design: A New Educational Technology Charles Reigeluth, Bela H. Banathy, J.R. Olson, 1993-08-11 Educational technology in the broadest sense is knowledge and competence for improving the educational process for using hardware equipment software methods and underware underlying organizational structures. This volume in the Special Programme on Advanced Educational Technology presents the results of a NATO Advanced Research Workshop on educational systems design as a new educational technology. The objective of the workshop was to advance our knowledge about the comprehensive systems design approach for improving educational systems. The workshop was organized for the transdisciplinary interaction of three scientific groups representing design science organizational systems science and

educational technology Participants were selected based on their scholarship as members of one or more of these three groups The book opens with the framing papers sent by the editors to participants prior to the workshop then presents five sets of thematic contributions the conceptual and empirical contexts of comprehensive systems design the systems design focus a systems view of designing educational systems the educational context of systems design and high technology focus in systems design

The Politics Of Education And The New Institutionalism William Lowe Boyd, Robert L. Crowson, Hanne M. Mawhinney, 2015-12-22 This is an assessment of the reluctance of American education institutions to undergo change and reform at a time when it is considered necessary The lack of public confidence in educational institutions is discussed along with the subsequent consequences

Middle Education in the Middle Kingdom Douglas C. Smith, 1997-01-21 This in depth study of the junior high school years grades 7 9 in Taiwan China compares the Taiwan model with those found in Japan Korea Singapore Hong Kong and the urban areas of China Of particular interest are such topics as curriculum homework teaching methods textbooks school ecology teacher training health and safety parental influence on children school spirit peer pressure and mediations and the use of teaching to examination Comparisons with the American model are coincidental The author who has taught in both Asia and the United States does however make generalizations about the dysfunctional American school paradigm and the vigorous nature of academic life in Asia Smith asserts that the Asian model for educational excellence cannot be transplanted to the United States Our highly diverse society could not endure the demands of standardized examination at each juncture of education The author contends that the key factors in success are only slightly related to the school Family life peer pressure the competitive examination system desire for family honor and the challenge of the Darwinian milieu all lead to excellent academic outcomes Social and cultural life for children though limited are always seen as complementary to school life Family activities focus on the child and his or

her education Parental sacrifices are the norm to assure a child's academic and employment success via the conduit of education

Material Practice and Materiality: Too Long Ignored in Science Education Catherine Milne, Kathryn Scantlebury, 2019-04-11 In this book various scholars explore the material in science and science education and its role in scientific practice such as those practices that are key to the curriculum focuses of science education programs in a number of countries As a construct culture can be understood as material and social practice This definition is useful for informing researchers nuanced explorations of the nature of science and inclusive decisions about the practice of science education Sewell 1999 As fields of material social practice and worlds of meaning cultures are contradictory contested and weakly bounded The notion of culture as material social practices leads researchers to accept that material practice is as important as conceptual development social practice However in education and science education there is a tendency to ignore material practice and to focus on social practice with language as the arbiter of such social practice Often material practice such as those associated with scientific instruments and other apparatus is ignored with instruments understood as inscription devices conduits for language rather than sources of material culture in which scientists share material other than words Baird 2004 p 7 when they communicate new knowledge and realities While we do not ignore the role of language in science we agree with Barad 2003 that perhaps language has too much power and with that power there seems a concomitant loss of interest in exploring how matter and machines instruments contribute to both ontology and epistemology in science and science education

Supervising Student Teachers Alexander Cuenca, 2013-02-11 The student teaching experience is often considered one of the most influential aspects of teacher preparation Key in the success of student teaching is the university supervisor During the student teaching experience the university supervisor is mainly responsible for helping pre service teachers relate university coursework with the situated experiences in schools However much like the various other spaces and places in teacher education facilitating teacher learning is an incredibly complex endeavor This edited volume addresses the complexities of supervising student teachers from three distinct vantage points First salient issues regarding the supervision of student teachers such as the preparation of novice supervisors negotiating power in the student teaching triad and the low status of clinical teacher education are examined Second different pedagogical frameworks for the work of supervision are provided such as care theory teacher education for democracy and social justice Finally future directions for field based teacher education are discussed such as a call to reconsider where supervision takes place the necessity to develop a pedagogy of supervision 21st century trends facing clinical teacher education and the value added by university supervisors to teacher development Each of these chapters engage the supervision of student teachers through a mix of research theory and personal stories from the field As such this edited volume is designed for new supervisors veteran supervisors and supervision scholars
