Humanity's creative role within the living pattern of nature Explores important scientific discoveries that reveal the self organizing intelligence at the heart of nature Examines the idea of a living cosmos from its roots in the earliest cultures to its eclipse during the Scientific Revolution to its return today Reveals ways to reengage our creative partnership with nature and collaborate with nature's intelligence For millennia the world was seen as a creative interconnected web of life constantly growing developing and restoring itself But with the arrival of the Scientific Revolution in the 16th and 17th centuries the world was viewed as a lifeless clock like mechanism bound by the laws of classical physics Intelligence was a trait ascribed solely to human beings and thus humanity was viewed as superior to and separate from nature Today new scientific discoveries are reviving the ancient philosophy of a living interconnected cosmos and humanity is learning from and collaborating with nature's intelligence in new life enhancing ways from ecological design to biomimicry Drawing upon the most important scientific discoveries of recent times David Fideler explores the self organizing intelligence at the heart of nature and humanity's place in the cosmic pattern He examines the ancient vision of the living cosmos from its roots in the world soul of the Greeks and the alchemical tradition to its eclipse during the Scientific Revolution to its return today He explains how the mechanistic worldview led to humanity's profound sense of alienation for if the universe only functioned as a machine there was no longer any room for genuine creativity or spontaneity He shows how this isn't the case and how even at the molecular level natural systems engage in self organization self preservation and creative problem solving mirroring the ancient idea of a creative intelligence that exists deep within the heart of nature Revealing new connections between science religion and culture Fideler explores how to reengage our creative partnership with nature and new ways to collaborate with nature's intelligence

occupational hazard The Holy Spirit is so actively involved in our lives that we can take his presence for granted As they say familiarity breeds contempt Just as we take breathing for granted we can take the Holy Spirit for granted simply because we constantly depend on him Like the cane that soon feels like an extension of the blind man s own body we too easily begin to think of the Holy Spirit as an extension of ourselves Yet the Spirit is at the center of the action in the divine drama from Genesis 1 2 all the way to Revelation 22 17 The Spirit s work is as essential as the Father s and the Son s yet the Spirit s work is always directed to the person and work of Christ In fact the efficacy of the Holy Spirit s mission is measured by the extent to which we are focused on Christ The Holy Spirit is the person of the Trinity who brings the work of the Father in the Son to completion In everything that the Triune God performs this perfecting work is characteristic of the Spirit In

Rediscovering the Holy Spirit author pastor and theologian Mike Horton introduces readers to the neglected person of the Holy Spirit showing that the work of God s Spirit is far more ordinary and common than we realize Horton argues that we need to take a step back every now and again to focus on the Spirit himself his person and work in order to recognize him as someone other than Jesus or ourselves much less something in creation Through this contemplation we can gain a fresh dependence on the Holy Spirit in every area of our lives **New Westers** Michael L.
