Geography Alexander

B. Murphy, 2018-12-11 Ever since humans sketched primitive maps in the dirt the quest to understand our surroundings has been fundamental to our survival Studying geography revealed that the earth was round showed our ancestors where to plant crops and helped them appreciate the diversity of the planet Today the world is changing at an unprecedented pace as a result of rising sea levels deforestation species extinction rapid urbanization and mass migration Modern technologies have brought people from across the globe into contact with each other with enormous political and cultural consequences As a subject concerned with how people environments and places are organized and interconnected geography provides a critical window into where things happen why they happen where they do and how geographical context influences environmental processes and human affairs These perspectives make the study of geography more relevant than ever yet it remains little understood In this engrossing book Alexander B Murphy explains why geography is so important to the current moment

Textures of Place Paul C. Adams, Steven D. Hoelscher, Karen E. Till, 2001 A fresh and far ranging interpretation of the concept of place this volume begins with a fundamental tension of our day as communications technologies help create a truly global economy the very political economic processes that would seem to homogenize place actually increase the importance of individual localities which are exposed to global flows of investment population goods and pollution Place no less today than in the past is fundamental to how the world works The contributors to this volume distinguished scholars from geography art history philosophy anthropology and American and English literature investigate the ways in which place is embedded in everyday experience its crucial role in the formation of group and individual identity and its ability to reflect and reinforce power relations Their essays draw from a wide array of methodologies and perspectives including feminism ethnography poststructuralism ecocriticism and landscape ichnography to examine themes as diverse as morality and imagination attention and absence personal and group identity social structure home nature and cosmos

Geography, Culture and Education Rod Gerber, M. Williams, 2013-04-17 An important challenge for our world is to understand how cultural understanding and geographical education can be linked and used to improve the global society We readily accept that our world is constituted by numerous groups of people who are organised by committees tribes regions nations or continental entities How these groups interact show concern for each others well being and progress is still an unpredictable activity Intercultural tensions racial conflicts and religious clashes have all led to the challenges for enacting a constructive world Fundamental perspectives challenge moderate ones and the resulting tensions produce elements of fear doubt and distrust The extremist views of terrorist groups exaggerate these tensions to the extent that some different cultural groups do not prefer to live in peace with their neighbours Deep seated intercultural tensions predominate over peaceful co existence Such challenges may easily dominate the interaction between racial groups tribes indigenous peoples and colonisers However we know that through the sound practice of intercultural understanding cultural groups in different contexts around the world can interact and co exist successfully and productively In fact they can work together to seek to

improve their society This does not mean that one group will dominate the other Rather it means that both groups work together to improve their collective lives Education has played an important role in the long term achievement of such harmony This volume has been developed to demonstrate that geographical education can be a potent force in the development of cultural understanding in different societies

The Power of Geographical Thinking Clare Brooks, Graham Butt, Mary Fargher, 2017-03-02 In this book geography educators from around the globe discuss their research into the power of geographical thinking and consider successful strategies to implement improve and advance geography education in research and practice It addresses key topics in geography education such as multicultural competence the role of teachers the geography curriculum spatial thinking geographic information systems geocapabilities and climate change At a global level the contributors and editors bring together the most advanced collection of research and discussion surrounding issues in geography education The book will be of interest to geography education researchers worldwide including academics at university and teachers in schools as well as professional geographers with an interest in education

Beyond Mapping National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, The Mapping Science Committee, Committee on Beyond Mapping: The Challenges of New Technologies in the Geographic Information Sciences, 2006-07-23 Geographic information systems GIS the Global Positioning System GPS remote sensing and other information technologies have all changed the nature of work in the mapping sciences and in the professions industries and institutions that depend on them for basic research and education Today geographic information systems have become central to the ways thousands of government agencies private companies and not for profit organizations do business However the supply of GIS GIScience professionals has not kept pace with the demand generated by growing needs for more and improved geographic information systems and for more robust geographic data Beyond Mapping assesses the state of mapping sciences at the beginning of the twenty first century and identifies the critical national needs for GIS GIScience professionals It examines the forces that drive and accompany the need for GIS GIScience professionals including technological change demand for geographic information and changes in organizations It assesses education and research needs including essential training and education new curriculum challenges and responses quality assurance in education and training and organizational challenges Some of the report s recommendations include more collaboration among academic disciplines private companies and government agencies the implementation of GIS GIScience at all levels of education and the development of a coherent comprehensive research agenda for the mapping sciences

Understanding the Changing Planet National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Committee on Strategic Directions for the Geographical Sciences in the Next Decade, 2010-06-23 From the oceans to continental heartlands human activities have altered the physical characteristics of Earth s surface With Earth s population projected to peak at 8 to 12 billion people by 2050 and the additional stress of climate change it is more

important than ever to understand how and where these changes are happening Innovation in the geographical sciences has the potential to advance knowledge of place based environmental change sustainability and the impacts of a rapidly changing economy and society Understanding the Changing Planet outlines eleven strategic directions to focus research and leverage new technologies to harness the potential that the geographical sciences offer

Interpreting Our World Joseph J. Kerski, 2016-10-17 This important book demonstrates why geography matters in the modern day world through its examination of 100 moments throughout history that had a significant impact on the study of geography literally writing about the earth Geography is not simply accounts of the lands of earth and their features it s about discovering everything there is to know about our planet This book shows why geography is of critical importance to our world s 21st century inhabitants through an exploration of the past and present discoveries that have been made about the earth It pinpoints 100 moments throughout history that had a significant impact on the study of geography and the understanding of our world including widely accepted maps of the ancient world writings and discoveries of key thinkers and philosophers key exploration events and findings during the Age of Discovery the foundations of important geographic organizations and inventions in digital mapping The book begins with a clear explanation of geography as a discipline a framework and a way of viewing the world followed by coverage of each of the 100 discoveries and innovations that provides sufficient background and content for readers to understand each topic The book concludes with a concise synopsis of why it all matters and a look forward to 10 possible future discoveries in the next 50 years of geography Students will gain a clear sense of what is truly revolutionary about geography perhaps challenging their preconceived notion of what geography actually is and grasp how important discoveries revolutionized not only the past but the present day as well
