Redistribute Values Not Wealth:

Capitalism in the 21st Century Guglielmo Carchedi, Michael Roberts, 2022-12-20 Contemporary capitalism is always evolving From digital technologies to cryptocurrencies current trends in political economy are much discussed but often little understood So where can we turn for clarity As Michael Roberts and Guglielmo Carchedi argue new trends don't necessarily call for new theory In *Capitalism in the 21st Century* the authors show how Marx's law of value explains numerous issues in our modern world In both advanced economies and the periphery value theory provides a piercing analytical framework through which we can approach topics as varied as labour profitability automation and AI the environment nature and ecology the role of China imperialism and the state This is an ambitious work that will appeal to both heterodox economists and labour movement activists alike as it demonstrates the ongoing contemporary relevance of Marxist theory to current trends in political economy **Problems in Value Theory** Steven B. Cowan, 2020-02-06

Problems in Value Theory takes a pro and con approach to central topics in aesthetics ethics and political theory Each chapter begins with a question What Makes Actions Right or Wrong Does Morality Depend on God Do We Need Government Contemporary philosophers with opposing viewpoints are then paired together to argue their position and raise problems with conflicting standpoints Alongside an up to date introduction to a core philosophical stance each contributor provides a critical response to their opponent and clear explanation of their view Discussion questions are included at the end of each chapter to guide further discussion With chapters ranging from why the government should never wage war to what is art and does morality depend on God this introduction covers questions lying at the heart of debates about what does and does not have value *The President's Commission on Income Maintenance Programs, Background Notes* United States President of the United States, 1970

Limits to Redistribution and Intertemporal Wedges: Implications of Pareto Optimality with Private Information: A Reprint from "Economic Quarterly" , **The Political Economy of Fortune and Misfortune** Scott Timcke, 2023-03-31 Bringing together philosophical insights with social theory this book develops a better understanding of the role luck plays in generating and reinforcing inequality **Boundaries and Justice** Sohail H. Hashmi, David Miller, 2021-05-11 Despite the supreme political and economic significance of boundaries and ongoing challenges to existing national boundaries scant attention has been paid to their ethics This volume explores how diverse ethical traditions understand the political and property rights reflected in territorial and jurisdictional boundaries It is the first book to bring together thinkers from a range of traditions both religious and secular to discuss the ethics of boundaries Each contributor represents a tradition's views on questions surrounding the use of boundaries to delimit property and political rights What does it mean to own something What resources should not be privately owned What justifies the erection of political boundaries between one people and another How hard should such boundaries be What rights extend to minorities within a state Should territorial boundaries coincide with social ones Does national autonomy have an ethical basis or is it an aspect

of modern power politics Should we aim for a more inclusive community than that afforded by modern nation states Cross chapter dialogue and a substantive conclusion draw out similarities and differences among the traditions represented traditions that include Christianity classical liberalism Confucianism international law Islam Judaism liberal egalitarianism and natural law In addition to the editors the contributors are Nigel Biggar Joseph Boyle Joseph Chan Russell Hardin Will Kymlicka Loren Lomasky Robert McCorquodale Richard B Miller David Novak Sulayman Nyang Michael Nylan Raul C Pangalangan Daniel Philpott Jeremy Rabkin Hillel Steiner M Raquibuz Zaman and Noam J Zohar

Social Classes and Political Order in the Age of Data Georges Kotrotsios, 2022-09-28 Our lives are changing today but what is the single most important factor driving these changes This question is crucial because attempting to answer it can guide us to an understanding of the processes that are impacting our societies The answer will of course come from the historians of the future but there is already no doubt that the advent of data is behind a radical shake up of our way of living Monetary assets infrastructure equipment and human labor all allow wealth to be created Data does too and it is reasonable to consider a new production factor in this regard data capital This book argues that this new production factor generates innumerable economic opportunities of a nature unthought of a mere twenty years ago These opportunities have led to the creation of a new social class composed of two subclasses data workers and data owners The emergence of this new class repositions existing classes including the traditional working class and the capitalist class creating strong divergences that threaten social cohesion What can we do to ensure cohesion and the proper functioning of society The book argues for the establishment of a regulatory framework and the institutions necessary if we are to open data up and where appropriate exchange and trade it all on a global scale In this regard the state today still playing its traditional role of framework setter and savior when crises loom can become an active economic player thus creating wealth for communities

Kuypers, 2023-11-15 A Future for the News What s Wrong with Mainstream News Media in America and How to Fix It investigates and offers solutions to significant problems with the productive functioning of the mainstream news media Criticism of the mainstream news media is almost a national pastime in America and widespread polling shows credibility ratings of journalists among the lowest of any institution in America almost as low as that of Congress The institution of news media faces a plummeting morale of journalists loss of readership loss of viewers to competing non traditional venues for news and so on Moving from these problems to realistic solutions this book serves as an instruction manual of sorts with each chapter offering a pathway of improvement This collection brings together academics and news industry professionals with individual chapters taking a specific area of concern and making a case for particular solutions to the problems presented Solutions range from ones designed for individual reporters to consider to those that target newsrooms the institution of journalism and news consuming audiences Together they aim to help a beleaguered

Roemer, Richard J. Arneson, 1996 How is it possible to translate egalitarian ideals into practical policy In this second volume of the Real Utopias Project John Roemer proposes the creation of an economy which combines a functioning market with a commitment to equality Roemer's novel mechanism for achieving this end is the creation of two kinds of money one used for the purchase of goods and the other referred to as coupons for buying shares in companies All citizens on reaching the age of majority are given an equal number of coupons from which they derive ownership rights in companies including dividends and a vote in board elections Firms raise finance capital through the state which converts shareholders coupons into money At death all shares and unspent coupons revert to the state for redistribution This scheme Roemer argues allows for a significant degree of government planning and equal distribution of property in the framework of a free market it is in short a working system of market socialism In the series of critiques which follow a range of distinguished thinkers engage in lively polemic concerning the practicality and effectiveness of Roemer's scheme The contributors are Richard Arneson Fred Block Harry Brighouse Michael Burawoy Joshua Cohen Nancy Folbre Andrew Levine Mieke Meurs Louis Putterman Joel Rogers Debra Satz Julius Sensat William Simon Frank Thompson Thomas Weisskopf and Erik Olin Wright *Tax Subsidies and Tax Reforms* United States. Georgakopoulos, 2005-10-10 The book juxtaposes economic analysis with moral philosophy political theory egalitarianism and other methodological principles Just Price Theory Joaquín Reyes, 2023-08-10 This book presents an original theory of the just price and it is a welcome addition to scholarship on a radically underdeveloped field This work reassesses the age old idea that there is a just price of things one that goes beyond the Scholastic tradition of the just price and its exclusive concern with commutative justice There is more to just price theory than the concern for keeping equality of value between goods exchanged Modern concerns over efficiency autonomy and distributive justice can also find a place within a theory of the just price The book Presents a new approach to just price theory through a broad analysis of different values and the incorporation of those conceptions into a wider normative framework Argues that these different values ground varied conceptions of the just price and Promotes a virtue based approach to price justification as an adequate framework for meeting the challenges that stem from each conception Perfect for scholars and students in the fields of jurisprudence philosophy of private law contract law and political theory this book makes a significant contribution to legal theory and the emerging field of the philosophy of economics
