Firearms and Violence National Research Council,Division of Behavioral and Social Sciences and Education,Committee on Law and Justice,Committee to Improve Research Information and Data on Firearms,2005-01-13 For years proposals for gun control and the ownership of firearms have been among the most contentious issues in American politics For public authorities to make reasonable decisions on these matters they must take into account facts about the relationship between guns and violence as well as conflicting constitutional claims and divided public opinion In performing these tasks legislators need adequate data and research to judge both the effects of firearms on violence and the effects of different violence control policies Readers of the research literature on firearms may sometimes

find themselves unable to distinguish scholarship from advocacy Given the importance of this issue there is a pressing need for a clear and unbiased assessment of the existing portfolio of data and research Firearms and Violence uses conventional standards of science to examine three major themes firearms and violence the quality of research and the quality of data available The book assesses the strengths and limitations of current databases examining current research studies on firearm use and the efforts to reduce unjustified firearm use and suggests ways in which they can be improved

Operation Fly Trap Susan A. Phillips, 2024-05-31 In 2003 an FBI led task force known as Operation Fly Trap attempted to dismantle a significant drug network in two Bloods controlled African American neighborhoods in Los Angeles The operation would soon be considered an enormous success noted for the precision with which the task force targeted and removed gang members otherwise entrenched in larger communities In Operation Fly Trap Susan A Phillips questions both the success of this operation and the methods used to conduct it Based on in depth ethnographic research with Fly Trap participants Phillips s work brings together police narratives crime statistics gang cultural histories and extensive public policy analysis to examine the relationship between state persecution and the genesis of violent social systems Crucial to Phillips s contribution is the presentation of the voices and perspectives of both the people living in impoverished communities and the agents that police them Phillips positions law enforcement surveillance and suppression as a critical point of contact between citizen and state She tracks the bureaucratic workings of police and FBI agencies and the language ideologies and methods that prevail within

them and shows how gangs have adapted seeking out new locations learning to operate without hierarchies and moving their activities more deeply underground Additionally she shows how the targeted efforts of task forces such as Fly Trap wreak sweeping sustained damage on family members and the community at large Balancing her roles as even handed reporter and public scholar Phillips presents multiple flaws within the US criminal justice system and builds a powerful argument that many law enforcement policies in fact nurture rather than prevent violence in American society *The Routledge International Handbook of Human Aggression* Jane Ireland, Philip Birch, Carol Ireland, 2018-01-03 Drawing upon international expertise and including some of the most well known academics and practitioners in the field The Routledge International Handbook of Human Aggression is the first reference work to fully capture how our understanding of aggression has been refined and reconceptualised in recent years Divided into five sections the handbook covers some of the most interesting and timely topics within human aggression research with analysis of both indirect and direct forms of aggression and including chapters on sexual aggression workplace bullying animal abuse gang violence and female aggression It recognises that in many cases aggression is an adaptive choice rather than a moral choice Providing practitioners and academics with an up to date resource that covers broad areas of interest and application the book will be essential reading for students researchers and practitioners associated with a range of social science disciplines including psychology criminology social work and sociology particularly those with an interest in developmental organisational forensic and criminal justice allied disciplines
