Hazardous Waste Generation, 1985 **Energy Research Abstracts**, 1990 **Reducing Toxics** Robert Gottlieb, 2013-04-22 In **Reducing Toxics** leading experts address industry technology health and policy issues and explore the potential for pollution prevention at the industry and facility levels They consider both the regulatory and institutional settings of toxics reduction initiatives prescribe strategies for developing a prevention framework and apply these principles in analyzing industry case studies Among the topics considered are the evolution of and limits to current environmental policy incorporating prevention into production planning and decisionmaking do voluntary programs lead to industry greening or greenwashing case studies of the chemical aerosols radiator repair and electric vehicle industries opportunities for and barriers to pollution prevention **Reducing Toxics** offers an analytic framework for defining and understanding different approaches in the toxics area and describes the basis for a new policy and industrial decisionmaking construct

Opportunities in Applied Environmental Research and Development National Research Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Committee on Opportunities in Applied Environmental Research and Development, 1991-01-01 Research is the foundation of environmental protection This volume reviews four areas of opportunity in applied environmental research and development waste reduction ecosystem and landscape change anticipatory research and long term chemical toxicity It presents the consensus of workshops held to explore these four areas as well as an introductory chapter that summarizes the committee's view of environmental research and development

Waste Minimization United States. Environmental Protection Agency. Information Management and Services Division. Headquarters Library, 1990 **EcoPopulism** Andrew Szasz, Moment by moment the evidence mounts that unchecked modern industry is bringing us ever closer to environmental disaster How can we move away from the brink of extinction toward a human society the earth can bear In the thriving popular politics of hazardous waste Andrew Szasz finds an answer a scenario for taking the most pressing environmental issues out of the academy and the boardroom and turning them into everyone's business This book reconstructs the growth of a powerful movement around the question of toxic waste Szasz

follows the issue as it moves from the world of official policymaking in Washington onto the nation's television screens and into popular consciousness and then into America's neighborhoods spurring the formation of thousands of local community based groups. He shows how in less than a decade a rich infrastructure of more permanent social organizations emerged from this movement expanding its focus to include issues like municipal waste, military toxics and pesticides. In the growth of this movement we witness the birth of a radical environmental populism. Here Szasz identifies the force that pushed environmental policy away from the traditional approach of pollution removal toward the superior logic of pollution prevention. He discusses the conflicting official responses to the movement's evolution revealing that despite initial resistance lawmakers eventually sought to appease popular discontent by strengthening toxic waste laws. In its success Szasz suggests this movement may even prove to be the vehicle for reinvigorating progressive politics in the United States.
