Reductionism And The Development Of Knowledge:

Reductionism and the Development of Knowledge Terrance Brown, Leslie Smith, 2003-01-30 The papers collected in this volume are all derived from the 29th Annual Symposium of JPS The intent of the volume is to examine the issue of reductionism on the theoretical level in several sciences including biology psychology sociology

Reductionism and the Development of Knowledge Terrance Brown, Leslie Smith, 2003-01-30 Among the many conceits of modern thought is the idea that philosophy tainted as it is by subjective evaluation is a shaky guide for human affairs People it is argued are better off if they base their conduct either on know how with its pragmatic criterion of truth i e possibility or on science with its universal criterion of rational necessity Since Helmholtz there has been increasing concern in the life sciences about the role of reductionism in the construction of knowledge Is psychophysics really possible Are biological phenomena just the deducible results of chemical phenomena And if life can be reduced to molecular mechanisms only where do these miraculous molecules come from and how do they work On a psychological level people wonder whether psychological phenomena result simply from genetically hardwired structures in the brain or whether even if not genetically determined they can be identified with the biochemical processes of that organ In sociology identical questions arise If physical or chemical reduction is not practicable should we think in terms of other forms of reduction say the reduction of psychological to sociological phenomena or in terms of what Piaget has called the reduction of the lower to the higher e g teleology All in all then reductionism in both naive and sophisticated forms permeates all of human thought and may at least in certain cases be necessary to it If so what exactly are those cases The papers collected in this volume are all derived from the 29th Annual Symposium of the Jean Piaget Society The intent of the volume is to examine the issue of reductionism on the theoretical level in several sciences including biology psychology and sociology A complementary intent is to examine it from the point of view of the practical effects of reductionistic doctrine on daily life

Social Interaction and the Development of Knowledge Jeremy I.M. Carpendale, Ulrich M ller, 2014-04-04 Written by highly respected theorists in psychology and philosophy the chapters in this book explicate and address fundamental epistemological issues involved in the problem of the relationship between the individual and the collective Different theoretical viewpoints are presented on this relationship as well as between the nature of rationality and morality relativism and universalism and enculturation and internalization Many chapters also highlight similarities and differences between these alternative frameworks and Piaget s theory and thus correct the misperception that Piaget had nothing to say about the social dimension of development Other chapters focus on the implications of these debates for the important topic areas of pedagogy moral development and the development of social understanding in infancy and childhood Although Piaget s theory is presented and evaluated by some of the chapters in this collection the authors remain critical and do not shy away from revising or extending Piaget s theory whenever it is deemed necessary Though the topic covered in this book is of fundamental importance in the social sciences it is rarely addressed in

a sustained way as it is in this collection of chapters The book benefits social scientists interested in fundamental epistemological issues especially as these concern the relationship between the individual and the collective with implications for the conceptualization of morality and rationality *13th Chaotic Modeling and Simulation International Conference* Christos H. Skiadas,Yiannis Dimotikalis,2021-12-14 Gathering the proceedings of the 13th CHAOS2020 International Conference this book highlights recent developments in nonlinear dynamical and complex systems The conference was intended to provide an essential forum for Scientists and Engineers to exchange ideas methods and techniques in the field of Nonlinear Dynamics Chaos Fractals and their applications in General Science and the Engineering Sciences The respective chapters address key methods empirical data and computer techniques as well as major theoretical advances in the applied nonlinear field Beyond showcasing the state of the art the book will help academic and industrial researchers alike apply chaotic theory in their studies **The Theory of Info-Dynamics: Rational Foundations of Information-Knowledge Dynamics** Kofi K. Dompere,2017-12-06 This book focuses on the development of a theory of info dynamics to support the theory of info statics in the general theory of information It establishes the rational foundations of information dynamics and how these foundations relate to the general socio natural dynamics from the primary to the derived categories in the universal existence and from the potential to the actual in the ontological space It also shows how these foundations relate to the general socio natural dynamics from the potential to the possible to give rise to the possibility space with possibilistic thinking from the possible to the probable to give rise to possibility space with probabilistic thinking and from the probable to the actual to give rise to the space of knowledge with paradigms of thought in the epistemological space The theory is developed to explain the general dynamics through various transformations in quality quantity space in relation to the nature of information flows at each variety transformation The theory explains the past present future connectivity of the evolving information structure in a manner that illuminates the transformation problem and its solution in the never ending information production within matter energy space under socio natural technologies to connect the theory of info statics which in turn presents explanations to the transformation problem and its solution The theoretical framework is developed with analytical tools based on the principle of opposites systems of actual potential polarities negative positive dualities under different time structures with the use of category theory fuzzy paradigm of thought and game theory in the fuzzy stochastic cost benefit space The rational foundations are enhanced with categorial analytics The value of the theory of info dynamics is demonstrated in the explanatory and prescriptive structures of the transformations of varieties and categorial varieties at each point of time and over time from parent offspring sequences It constitutes a general explanation of dynamics of information knowledge production through info processes and info processors induced by a socio natural infinite set of technologies in the construction destruction space The History of Human Resource Development Claretha Hughes,Matthew W. Gosney,2016-01-26 The history of human resource development embraces humankind s investment in

one another's skills, knowledge and abilities. As the field transitions into a more mature discipline, there is a need to understand the philosophies upon which certain theories and methodologies are based. Providing a historical narrative of HRD from the beginning of human history through modern times, this book reveals the consistent interaction between the philosophies of the time, theories and methods of people management, and how these philosophies impact what is known as HRD today. Drs. Gosney and Hughes offer a robust examination of HRD and provide a methodology for critical thinking to better understand the theories and assumptions of the field. They provide a model whereby scholars and practitioners can better understand and evaluate modern HRD through the context of HRD history.

Degrowth through Knowledge-Based Development Francisco Javier Carrillo, 2025-05-15 This book tackles the terms under which a knowledge-based society can indefinitely improve while pursuing an eco-economic steady state. In doing so, it addresses the literature gap on continued social improvement within a post-growth economic and cultural paradigm. Carrillo consolidates research on the Degrowth paradigm and proposes a conceptual framework for continued social improvement based on the integration of tangible and intangible collective values. He proposes a method that accounts for effective social value through capital systems valuation and development and includes this operational metric system as an alternative to the metric of Gross National Product (GNP). The book critically examines the challenges of identifying a complete and consistent representation of total social value. The book also includes a series of knowledge-based development programmes in cities and regions around the world and discusses policies and practices for urban mitigation and adaptation to the Anthropocene. This transdisciplinary book will be of particular interest to researchers of degrowth, economics, sustainable development, and urban planning.

Handbook of Child Psychology, Theoretical Models of Human Development William Damon, Richard M. Lerner, 2006-05-19 Part of the authoritative four-volume reference that spans the entire field of child development and has set the standard against which all other scholarly references are compared. Updated and revised to reflect the new developments in the field, the *Handbook of Child Psychology*, Sixth Edition, contains new chapters on such topics as spirituality, social understanding, and non-verbal communication. Volume 1: *Theoretical Models of Human Development*, edited by Richard M. Lerner, Tufts University, explores a variety of theoretical approaches, including life span, life course theories, socio-culture theories, structural theories, object relations theories, and diversity and development theories. New chapters cover phenomenology and ecological systems theory, positive youth development, and religious and spiritual development.

Economy-Environment-Development-Knowledge Ken Cole, 2002-01-04 As we approach the end of the second millennium, we find ourselves in times of radical social change. Orthodox explanations of the economy, the environment, and the development process are unable to provide coherent policies for such issues as employment, creation, environmental degradation, and social progress. *Economy-Environment-Development-Knowledge* provides alternative perspectives on these fundamental aspects of human existence. Economists, environmentalists, and development theorists have so far been unable to agree on the most successful prescriptions to address problems. To

understand contrast and compare alternative understandings of economic environmental and development issues we need to be aware why theorists conceptualise the process of social experience so differently Part 1 of Economy Environment Development Knowledge addresses the subjective preference cost of production and abstract labour theories of values in economics Part 2 explains egocentrism ecocentrism and socioecocentrism as competing theoretical perspectives in environmental theory Part 3 highlights modernisation theory structuralist theory and class struggle as ways to account for the process of development and Part 4 examines the generation of knowledge through positivism paradigms and praxis legitimating competing perspectives in economics environmentalist and development The book concludes by considering why different people find alternative explanations more or less plausible By addressing the disagreements between theorists Economy Environment Development Knowledge provides a unique basis to contrast and compare the plethora of theories of and policies for economic prosperity environmental sustainability and social progress

The Theory of Categorical Conversion Dompere, Kofi Kissi, 2017-09-17 The Theory of Categorical Conversion is advanced by Professor Kofi Kissi Dompere as mathematical philosophical and game theoretic foundations to solve the problem of socio natural transformation as governed by some internal process in relation to Marx Schumpeter and Nkrumah Dompere s methodology is based on the Africentric principles of opposites made up of actual potential polarity negative positive duality with relational continuum and unity under cost benefit rationality and Asantrofi Anoma principle supported by fuzzy paradigm of thought Socio natural transformations are seen in terms of game theories in a fuzzy stochastic space admitting of defective deceptive information structures in quality quantity space within the subjective objective duality The main premise of the monograph is that there exists a set of necessary and sufficient conditions for internal self transformation The necessary conditions are made up of categorical moments and categorical transfer functions forming the domain of control instrumentation in creating the sufficient conditions for categorical conversion processes Dompere presents an important methodological framework for the study and construction of the theories of socioeconomic development and political change as well as info dynamics connecting knowledge sciences innovation and engineering to the space of knowing under qualitative quantitative transformational dynamics with defective deceptive information structures in the games for power and dominance by duals and poles in conflicts The necessary conditions of socio natural transformation are internally derived based on the relational structure of matter energy information activities within the dynamics of qualitative dispositions of dualities of actual potential polarities The theory consists of category formation showing ontological epistemological categories and categorical dynamics shows elemental conversions of categorical varieties in a continuum The logical tools and the paradigm of thought for the theoretical development of Nkrumah s framework involve self excitement self correction and self control systems induced by internal contradictions The set of necessary conditions constitutes the natural necessity that constrains cognitive freedom in socio natural transformations Had this conceptual system been familiar to economists and social scientists the construct of the

theories of socioeconomic development and transformations would have been increasingly successful

Best Practices for the Knowledge Society. Knowledge, Learning, Development and Technology for All Miltiadis D. Lytras, Patricia Ordóñez de Pablos, Ernesto Damiani, David Avison, Ambjörn Naeve, David G. Unity of Knowledge (in Transdisciplinary Research for Sustainability) - Volume I Gertrude Hirsch Hardon, 2008-12-31 Unity of Knowledge in Transdisciplinary Research for Sustainable Development theme is a component of Encyclopedia of Social Sciences and Humanities in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Today there is a social need for a comprehensive unity of knowledge that would provide orientation and ensure action in the context of the complex problems of modern civilization Based on an intellectual need for unity of knowledge different concepts of unity of knowledge have emerged in the course of the history of ideas The intellectual need for unity can be directed at the world science action or the individual It can involve the quest for the unity of the world based on a principle that is immanent in it the unity of science as a theoretical methodical or epistemological unity the unity of action as a correlation of scientific pragmatic and moral knowledge or finally unity as the educational task of the individual The concepts associated with unity of knowledge can go in two directions The first assumes that there is a unity existing in the world that can be perceived by man It is thought of as an order of being i.e. an ontological unity of the plurality of phenomena that consist in their common nature The other direction is based on the assumption that unity is a construction of a subject based on its cognitive principles and structures Thus it is not something that can be discovered as an existing objective order and is instead subjective These two volumes present some aspects of Unity of Knowledge in Transdisciplinary Research for Sustainable Development in three parts The purpose of the first part is to trace

back the core ideas in transdisciplinary thinking in the history of western philosophy and science to locate socially the concerns of transdisciplinary research and to give an account of the development of transdisciplinary research The second group of chapters deals with methodological and management problems related to transdisciplinary research with regard to problem identification and structuring of research questions with knowledge integration in problem investigation as well as with evaluation An outline of the institutional measures and transformations to enable and support transdisciplinary research is given in the third part Institutional strategies build on organizational arrangements and links across academic institutions in education and research on networks between science and society for joint knowledge production in temporally limited settings of research programs or projects but they also set up new institutions such as centers for advanced studies national offices agencies and networks These two volumes are aimed at a wide spectrum of audiences University and College Students Educators Research Personnel and all those concerned with sustainable development

Back to Sociological Theory Nicos P Mouzelis, 2016-07-27 Nicos Mouzelis argues against a marked tendency in present day sociology to conflate philosophy and sociological theory In trying to demonstrate the relative autonomy and specific logic of sociological theorising he draws from a variety of theoretical traditions in order to construct a set of interrelated concepts useful for bridging the gulf between macro and micro sociologies Drawing examples from the sociology of development and from the theory of organisations the author shows concretely how the conceptual framework proposed can help the researcher to avoid both the reification of macro institutional structures and their reduction to the intersubjective understandings of micro actors

Fuzzy Rationality Kofi Kissi Dompere, 2009-07-22 Philosophy involves a criticism of scientific knowledge not from a point of view ultimately different from that of science but from a point of view less concerned with details and more concerned with the harmony of the body of special sciences Here as elsewhere while the older logic shut out possibilities and imprisoned imagination within the walls of the familiar the newer logic shows rather what may happen and refuses to decide as to what must happen Bertrand Russell At any particular stage in the development of humanity knowledge comes up against limits set by the necessarily limited character of the experience available and the existing means of obtaining knowledge But humanity advances by overcoming such limits New experience throws down the

limits of old experience new techniques new means of obtaining knowledge throw down the limits of old techniques and old means of obtaining knowledge New limits then once again appear But there is no more reason to suppose these new limits absolute and final than there was to suppose the old ones absolute and final

Genesis and Development of Plekhanov's Theory of Knowledge

D. Steila,2012-12-06 1 One of the most outstanding leaders within Second International Marxism George Plekhanov has interested Western scholars primarily as a historical and political figure specifically as the first full fledged Marxist among the Russian intelligentsia At the end of the nineteenth century he was the leader in putting Russian progressive culture in touch with Western Marxism breaking away from Populism and at the same time resuming materialistic tradition within Russian progressive thought Among Russian revolutionaries a few others to be sure had been interested in Marx before Plekhanov The translations of some of Marx works into Russian show this clearly In 1869 Mikhail Bakunin translated The Communist Manifesto Three years later Nikolaj Daniel son a populist completed the first foreign language version of the first book of Marx Capital and within six months about a thousand copies had been sold In the middle of the 1870 s an academic economist N Ziber helped to spread Marx economic ideas by teaching them in Kiev and writing articles in the journal Slovo which to some extent influenced Plekhanov s later choices But it was Plekhanov who first analyzed the Russian situation as a whole in Marxist terms thereby earning renown as the Father of Russian Marxism 1 His writings became the school for a whole generation of revolutionaries At the beginning respected and venerated then rejected and criticized Plekhanov for long held the leadership of Russian Marxism as its best known Master

Practising Development

Johan Pottier,2013-02-01 Throughout the 1980s there have been calls often from development organizations of global repute for the incorporation of social science perspectives into the design and management of sustainable development programmes Practising Development is the first collection to offer first hand critical assessments of the success and failures found within actual responses to these calls By combining academic and practical experience from anthropology development and aid organizations the contributors examine the processes of intervention the methods by which this intervention can be assessed and explain the socio economic and political worlds within which intervention and development evolve
