Reefs Of Taprobane:

The Reefs of Taprobane Arthur C. Clarke, 2002 Looking for new underwater worlds to conquer Arthur Clarke and Mike Wilson followed up their expedition to Australia's Great Barrier Reef described in *The Coast of Coral* by exploring the romantic seas surrounding Ceylon Meetings with dangerous and beautiful marine creatures were only one side of the expedition's activities Their adventures included the discovery of many wrecks and the investigation of a 3 000 year old Hindu temple lying on the ocean bed Clarke and Wilson lived among the Ceylonese natives their contact with Europeans virtually limited to the dozen members of the Ceylonese Reefcombers Club who shared many of their underwater adventures When weather conditions ruled out skin diving they explored the awe inspiring ruins of ancient Sinhalese cities made trips into the jungles in search of wild life and visited Buddhist monasteries Clarke and Wilson's experiences provide vivid impressions of old and new Ceylon one of the key countries of the Far East and give vivid impressions of the fantastic life of the tropical reefs and the strange transformations which lost ships undergo when the sea works its will on them

Stableford,2006-09-06 Science fiction is a literary genre based on scientific speculation Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings Science Fact and Science Fiction examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future As scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines Although the main focus is on literature other forms of science fiction including film and video games are explored and because science is an international matter works from non English speaking countries are discussed as needed
