Monsters, Demons and Psychopaths Fernando Espi Forcen, 2016-10-14 Descriptions of monsters, vampires, demonic possessions, and psychopaths in horror films have been inspired by psychiatric knowledge about mental illness, leading to several stereotyped models of horror that have prevailed through decades. Some scholars have proposed that horror films can be a teaching tool for psychopathology, but for the most part, the genre has been underutilized as a learning tool. This book explores the idea of relating horror films to psychiatric ideas as a way of engaging people in learning.

Performing Hysteria Johanna Braun, 2020-11-16 We seem to be living in hysterical times. A simple Google search reveals the sheer bottomless well of hysterical discussions on diverse topics such as the #MeToo movement, Trumpianism, border wars, Brexit, transgender liberation, Black Lives Matter, COVID-19, and climate change, to name only a few. Against the backdrop of such recent deployments of hysteria in popular discourse, particularly as they emerge in times of material and hermeneutic crisis, *Performing Hysteria* re-engages the notion of hysteria. *Performing Hysteria* rigorously mines late 20th and early 21st century, primarily visual culture, for signs of hysteria. The various essays in this volume contribute to the multilayered and complex discussions that surround and foster this resurgent interest in hysteria, covering such areas as art, literature, theatre, film, television, dance, crossing such disciplines as cultural studies, political science, philosophy, history, media, disability, race, and ethnicity, and gender studies, and analysing stereotypical images and representations of the hysteric in relation to cultural sciences and media studies. Of particular importance is the volume's insistence on taking the intersection of hysteria and performance seriously.
