

its extreme complexity, he believed that any new treatment, such as Dr. Bancroft's, must take into account the necessity for more accurate knowledge concerning the chemistry of the opium alkaloids; more reliable information as to their effect on the human body and the exact nature of addiction; together with a satisfactory evaluation of the many psychobiological factors involving addiction about which we have little accurate, concrete knowledge.

"So far as we know there is no treatment for drug addiction from the standpoint of a specific cure that will miraculously operate to rid the drug addicts of their addiction," Dr. Treadway said. "Any treatment advocated for this particular purpose must be scrutinized with care and conclusions about it drawn only after months of experience with a very large group of patients."

HUMANS 75,000 YEARS AGO DESCRIBED BY PRE-HISTORIAN

PROFESSOR GEORGE G. MACCUDY, Director of the American School of Prehistoric Research, Yale University, writes that the records bearing on the physical characters of Neanderthal man are still relatively rare. But in the past few years they have become much more complete than are those of the pre-Neanderthal period, when such beings as Eoanthropus, Pithecanthropus, Sinanthropus and Homo Heidelbergensis existed.

Neanderthal man lived in the third inter-glacial and the early part of the fourth glacial epoch. In his physical make-up he retained many primitive characters, due to his branching from the main human stem as early as the Pliocene epoch. His lowly estate physically is even reflected in his kit of tools. Although a hunter, he never got so far as to represent by means of carvings, engravings or drawings in color the animals he hunted. This step was taken by his successor, the so-called race of Cro-Magnon.

The cable received from Theodore D. McCown, field director of the Joint Expedition of the American School of Prehistoric Research and the British School of Archeology at Jerusalem, said: "Three adult Mousterians surely Neanderthal, heavy brow ridges, taurodont dentition." This is said to be the greatest discovery of Neanderthal remains ever found. They are at a moderate estimate at least 75,000 years old.

The present is the fourth season of joint expeditions by the British and American Schools near the foot of Mount Carmel, during which time scores of thousands of artifacts, dating from the Mousterian and subsequent epochs, have been unearthed.

ITEMS

CANCER, it is claimed, can be detected by a serum reaction discovered by Dr. H. J. Fuchs, of Berlin. The reaction is based on the fact that fibrin from the blood of a person without cancer is broken down or digested by the serum of the blood of a person with cancer, with the production of some non-protein, nitrogenous substances which can be detected by suitable chemical means. The method, as it was described by Dr. Fuchs, required special apparatus and some special training for the observer, which tend to prevent its general use.

Professor M. von Falkenhausen, of the University of Breslau, Germany, now reports a simplification of the method that may make it possible for other observers to test its validity. He has introduced into the reaction a colorimetric procedure which he states makes the method more exact and at the same time much simpler to carry out. He reports a series of eighty cases in which the reaction was used and in which there was not a single failure in the diagnosis.

THE light from a distant nebula, such as one in the constellation of Ursa Major, reaches the earth at the ordinary speed of about 186,000 miles a second, even though the nebula is apparently moving from the earth at a velocity of 11,500 kilometers per second. This fact was discovered last year by Dr. Gustaf Strömberg, of the Mount Wilson Observatory. It has been confirmed by independent work of Dr. George Van Biesbroeck, at the Yerkes Observatory, of the University of Chicago. Both Dr. Strömberg and Dr. Van Biesbroeck have found that the aberration with the rapidly receding nebula is just the same as for nearer stars, even ones that are approaching us.

A POSSIBLE reconciliation between the at present discrepant results of "ether drift" experiments has been presented to the American Physical Society by Dr. N. Galli-Shohat, of Bryn Mawr College. This famous experiment, known as the Michelson-Morley experiment for the men who first performed it, failed to show any positive evidence of the existence of an ether, and set a train of scientific investigations in motion that eventually led to Einstein's relativity theory. Later, Professor Dayton C. Miller, of the Case School of Applied Science, repeated the experiment, and reported positive results. Dr. Galli-Shohat claims to reconcile the disagreement by taking into account, not the earth's motion about the sun, but the motion of the whole solar system through space.

DR. W. J. HUMPHREYS, of the U. S. Weather Bureau, told the American Meteorological Society, meeting in Washington, that the melting of the great ice caps of the earth would raise the ocean level about 150 feet. Explorations of the past year, which determined by sonic sounding the average thickness of the great Greenland ice sheet to be about one mile, make possible a fairly accurate estimate of the height the oceans will rise. Dr. Humphreys said that there must be 4,000,000 cubic miles of ice on Greenland, the Antarctic continent and Iceland, which may be expected eventually to melt.

THE germs of typhus fever and of spotted fever are very much alike, but differ in the important respect of growing in different parts of the cells they invade, Dr. Henry Piskerton and Dr. G. M. Hass, of Boston, reported to the American Association of Pathologists and Bacteriologists. The spotted fever germs grow and multiply massively in the nucleus of the cells, but infect the surrounding part of the cell only sparsely, they found from studying how the germs grow on animal tissues. Typhus fever germs, on the other hand, do not invade the nuclei of cells, but grow on the cytoplasm.

References For The Historian Of Science Introduction

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for specific titles or browse through different categories. Another reliable platform for downloading References For The Historian Of Science free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge. Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows researchers and scholars to share their work with a global audience. Users can download PDF files of research papers, theses, and dissertations covering a wide range of subjects. Academia.edu also provides a platform for discussions and networking within the academic community. When it comes to downloading References For The Historian Of Science free PDF files of magazines, brochures, and catalogs, Issuu is a popular choice. This digital publishing platform hosts a vast collection of publications from around the world. Users can search for specific titles or explore various categories and genres. Issuu offers a seamless reading experience with its user-friendly interface and allows users to download PDF files for offline reading. Apart from dedicated platforms, search engines also play a crucial role in finding free PDF files. Google, for instance, has an advanced search feature that allows users to filter results by file type. By specifying the file type as "PDF," users can find websites that offer free PDF downloads on a specific topic. While downloading References For The Historian

Of Science free PDF files is convenient, its important to note that copyright laws must be respected. Always ensure that the PDF files you download are legally available for free. Many authors and publishers voluntarily provide free PDF versions of their work, but its essential to be cautious and verify the authenticity of the source before downloading References For The Historian Of Science. In conclusion, the internet offers numerous platforms and websites that allow users to download free PDF files legally. Whether its classic literature, research papers, or magazines, there is something for everyone. The platforms mentioned in this article, such as Project Gutenberg, Open Library, Academia.edu, and Issuu, provide access to a vast collection of PDF files. However, users should always be cautious and verify the legality of the source before downloading References For The Historian Of Science any PDF files. With these platforms, the world of PDF downloads is just a click away.

FAQs About References For The Historian Of Science Books

1. Where can I buy References For The Historian Of Science books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a References For The Historian Of Science book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of References For The Historian Of Science books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections.
