

REFLECTIONS ON DISPLACEMENT AND ITS CONSEQUENCES AFTER HURRICANE KATRINA

Arnold R. Isaacs

Note: This report is based on the proceedings at ACIA's conference on "Critical Incidents Analysis: Displacement as an Obstacle to Recovery," held in New Orleans, Louisiana, June 9-11, 2010. Quotations from the conference transcript have in some instances been slightly edited for greater clarity and to eliminate repetition or extraneous material.

Refugees

We were no longer citizens of the United States. We were refugees. We were herded like cattle, we had to go through checkpoints, we had to be frisked. We had to stand outside of porta-potties to guard the doors for each other. It didn't matter that we were people who worked in the hospital. We were combined with the people from the housing projects. We were all put together. So Katrina really was the great equalizer. It didn't matter that I came from an affluent African American community here in New Orleans; it didn't matter that I worked at the hospital. We were given a ration of food, we were all equal.

– Denise Johnson

We don't see Katrina as the storm. We see the government as the storm. We see FEMA as the storm....Basically I feel that I was not displaced by the storm. I was displaced by the government. I've been carrying the stresses of all the unresolved issues. I feel that the government has left too much unresolved that we, the displaced people are carrying. But we can't resolve it without what I call the therapy of justice. Because we haven't been treated justly and our situation has not been treated with caring.

– Harold Toussaint

About PTSD, they say that is very common among Katrina survivors, that we suffer from post-traumatic stress disorder. But it's not post. The trauma isn't over so it's not post-traumatic stress disorder.

– Parnell Herbert

When we hear the word "refugees," Americans usually think of populations and landscapes far from the United States. We envisage blue-plastic tent cities housing Africans who have fled war or famine or Haitians displaced by an earthquake, or swirls of smoke and dust over

COVID wrought havoc on the world s economic systems Higher education did not escape the ravages brought on by the pandemic as institutions of higher education around the world faced major upheavals in their educational delivery systems Some institutions were prepared for the required transition to online learning Most were not Whether prepared or not educators rose to the challenge The innovativeness of educators met the challenges as digital learning replaced the face to face environment In fact some of the distance models proved so engaging that many students no longer desire a return to the face to face model As with all transitions some things were lost while others were gained This book examines practice in the field as institutions struggled to face the worst global pandemic in the last century The book is organized into four sections on The Perspectives of Higher Education COVID as a Catalyst for Change Embracing Online Learning as a Response to COVID and Post Covid The Way Forward It presents various perspectives from educators around the world to illustrate the struggles and triumphs of those facing new challenges and implementing new ideas to empower the educational process These discussions shed light on the impact of the pandemic and the future of higher education post COVID Higher education has been forever changed and higher education as it once was may never return While many questions arise the achievements in meeting and overcoming the pandemic illustrate the creativity and innovativeness of educators around the world who inspired future generations of learners to reach new heights of accomplishment even in the face of the pandemic *Teacher Professional Development for Improving Quality of Teaching*

Bert Creemers,Leonidas Kyriakides,Panayiotis Antoniou,2012-11-05 This book makes a major contribution to knowledge and theory by drawing implications of teacher effectiveness research for the field of teacher training and professional development The first part of the book provides a critical review of research on teacher training and professional development and illustrates the limitations of the main approaches to teacher development such as the competence based and the holistic approach A dynamic perspective to policy and practice in teacher training and professional development is advocated The second part of the book provides a critical review of research on teacher effectiveness The main phases of this field of research are analysed It is pointed out that teacher factors are presented as being in opposition to one another An integrated approach in defining quality of teaching is adopted The importance of taking into account findings of studies investigating differential teacher effectiveness is argued Another significant limitation of this field of research is that the

whole process of searching for teacher effectiveness factor was not able to have a significant impact upon teacher training and professional development For this reason it is advocated that teacher training and professional development should be focused on how to address grouping of specific teacher factors associated with student learning and on how to help teachers improve their teaching skills by moving from using skills associated with direct teaching only to more advanced skills concerned with new teaching approaches and differentiation of teaching The book refers to studies conducted in different countries illustrating how the proposed approach can be used by policy and practice in teacher education Specifically the book provides evidence supporting the validity of the theoretical framework upon which this approach is based Moreover experimental and longitudinal studies supporting the use of this approach for improvement purposes are presented and suggestions for further research utilising and expanding the Dynamic Approach for teacher training and professional development are provided
