## Reflections Of Being:

**Thinking to Transform** Jillian M. Volpe White, Kathy L. Guthrie, Maritza Torres, 2019-12-01 In an era of constant connection it can be challenging to prioritize time for reflection Taking time to think can feel like a luxury or even a waste time People facilitating complex leadership processes may feel the least able to pause and reflect However it is through intentional reflection that we make meaning of experiences connect ideas question assumptions and generate innovative possibilities By taking time to reflect individually and with others learners can see the full picture of an experience understand their thought processes and enhance their capacity for leadership Beyond individual reflection by engaging in reflection on social issues with others leaders can be empowered and enabled to create positive changes This book is a clarion call for educators and learners to make reflection a central priority Reflection the process of making meaning of experience and leadership a relational process for affecting change are enhanced by one another Together they strengthen the potential for leadership learning through experience This book addresses challenges for reflection in leadership learning while also connecting it to timely topics It begins with connections between reflection and leadership and then introduces a framework for reflection in leadership learning Reflection is a powerful strategy curricular and co curricular learning for instruction and assessment reflection in leadership learning can benefit from both intentional framing and feedback As socially constructed concepts both reflection and leadership have historically lacked clarity to add to the confusion critical reflection is often interchanged with reflection This book introduces a continuum of critical reflection in leadership learning In order to facilitate reflection in leadership learning educators must engage in the inner work of becoming reflective educators Finally in the face of complex social challenges reflection leadership mindfulness and resilience are juxtaposed in order to highlight how these concepts are reliant upon one another Reflection in leadership learning is essential for anyone who wants to develop their capacity for leadership When faced with complex social issues and challenges at a global scale the only way to make progress is through collective action that results from critical reflection To develop more resilient and mindful learners who can adapt to changing circumstances educators must center reflection in leadership learning as a philosophy pedagogy outcome and strategy This book provides a balance of theory and practice to empower and enable educators to engage in reflective leadership learning

 and from practice in pre service teacher education Authors such as Lederman and Lederman describe the student teaching  
 practicum or work integrated learning WIL which is an essential component of pre service teacher education as the elephant  
 in the room These authors note that the capstone experience in any teacher education programme is the student teaching  
 practicum after all this is where the rubber hits the road However many teacher educators will agree that this WIL  
 component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher  
 This is the gap that this research book addresses Most of the chapters in the book report empirical data with the exception of  
 two chapters that can be categorized as systematic reviews WIL is addressed from various angles in the chapters Chapter 6  
 focuses on research related to what makes Finnish teacher education so effective and in Chapter 4 researchers of the

University of Johannesburg disseminate their findings on establishing a teaching school based on Finnish insights in Johannesburg Chapter 3 highlights the challenges faced in open and distance learning teacher education contexts Several of the chapters disseminate research findings on alternative interventions to classic WIL namely where safe spaces or laboratories are created for student teachers to learn and grow professionally These could either be simulations such as software programmes and avatars in the intervention described in Chapter 2 student excursions as the findings in chapters 5 7 and 10 portray or alternative approaches to WIL e g Chapters 11 and 12 The book is devoted to scholarship in the field of pre service teacher education The target audience is scholars working in the fields of pre service teacher education work integrated learning and self directed learning The book makes a unique contribution in terms of firstly its extensive use of Cultural Historical Activity Theory as a research lens and secondly in drawing on various theoretical frameworks Both quantitative and qualitative research informed the findings of the book
