Debt Crisis Aristidis Bitzenis,Vasileios A. Vlachos,Ioannis Papadopoulos,2014-09-26 The euro was generally considered a success in its first decade Nevertheless the unanticipated financial crisis in the summer of 2007 has developed gradually into the worst global economic crisis in post war economic history and a sovereign debt crisis calling into question the endurance of positive externalities under the current form of European economic integration The experience of double dip recessions in the core of the euro area and the occurrence of a deflationary spiral in its southern periphery brings into question the wisdom of fiscal consolidation via austerity in the adjustment programmes adopted to exit the crisis They also put into doubt the adequacy and efficiency of the European Economic and Monetary Union s core elements its political instruments and macroeconomic assumptions as can be seen in the role of the Stability and Growth Pact and the stance of the European Central Bank The title of this collective volume refers to the country where the European sovereign debt crisis began while its contents concentrate on the extent to which this crisis should be a national or a European concern Moreover the focus on Greece stimulates discussion about the neglected factor of the shadow economy and the potential to boost government revenue through its successful transfer to the formal economy The chapters address the inefficiencies of both euro area institutions and policies adopted to exit the current predicament Experts from several disciplines review the literature and critically evaluate the existence of issues such as contagion effects domino effects deflationary spirals institutional efficiency and the reality of the option to exit the euro area **Reflections on Greek Culture** Kōstas M. Reflections on the Nature of Music Flora R. Levin,2009-04-27 In this book Flora Levin explores how and why music was so important to the ancient Greeks She examines the distinctions that they drew between the theory of music as an art ruled by

number and the theory wherein number is held to be ruled by the art of music These perspectives generated more expansive theories particularly the idea that the cosmos is a mirror image of music s structural elements and conversely that music by virtue of its cosmic elements time motion and the continuum is itself a mirror image of the cosmos These opposing perspectives gave rise to two opposing schools of thought the Pythagorean and the Aristoxenian Levin argues that the clash between these two schools could never be reconciled because the inherent conflict arises from two different worlds of mathematics Her book shows how the Greeks appreciation of the profundity of music s interconnections with philosophy mathematics and logic led to groundbreaking intellectual achievements that no civilization has ever matched **Rethinking**

Philosophical Reflections on Antiquity Paul Fairfield, 2020-09-02 Philosophical Reflections on Antiquity Historical Change addresses the question of whether there is a logic of historical change and whether the collapse of teleology should deter us from inquiring anew whether any recurring patterns and themes show themselves amid the complexity of historical life Paul Fairfield argues that if any conception of universal history remains possible it is one that rejects teleology and causal laws while identifying thematic tendencies that afford some semblance of unity including the enduring phenomena that are interlocution the struggle for predominance and the endless back and forth that play out between them This book examines the transitional periods of archaic Greece and late antiquity the ostensible birth and death of the ancient west Fairfield argues that an interpretation of the social political and intellectual history of these important turning points brings to light some philosophical understanding of the dynamics of change itself observing that the transition from archaic to classical Greece was no miracle while the end of the Roman era can no longer be conceived as a story of decline and fall Rather

Fairfield posits these were not complete breaks but relative beginnings and endings in narratives that are ongoing. Scholars of philosophy, history and anthropology will find this book particularly useful. **2014 Crisis in Ukraine. Perspectives, Reflections, International Reverberations** Karol Kujawa, Valeriy Morkva, Klaus Bachmann, Monika Byrska, Filiz Çoban, Soner Karagül, Marta Králiková, Jan Muš, Sezai Özcelik, Didem Saygin, Emanuele Scimia, Ercüment Tezcan, Mehlika Özlem Ultan, Andrei Vardomatski, 2015-12-30. This book is a collective attempt to present a wide ranging picture of international attitudes towards the events currently ongoing in Ukraine. As some experts have already tended to claim in 2014, this post-Soviet state lying in the Eastern part of the European continent has become a scene of the most serious geopolitical standoff since the end of the Cold War. It would be in place here to remind a well-known clear-cut maxim formulated by Zbigniew Brzezinski in late 1990s and concerning Ukraine's key role in shaping the Russian imperial self-identity. Without Ukraine, Russia ceases to be a Eurasian empire. So what may readers expect to find in this book? It has been divided into two parts reflecting the perspectives on the Ukrainian crisis: first the perspective of Ukraine's close neighbours from Central Eastern Europe and Turkey; second the perspectives of the global players like the EU, the US or China. We hope that such a publication focused on the above-mentioned problems and embedded in the actual reality will be useful both for professionals in the field of political science as well as for those who have an influence on the shape of the foreign policy.

François Duquesnoy and the Greek Ideal Estelle Cecile Lingo, 2007-01-01. This book is the first in English devoted to François Duquesnoy, a central figure in seventeenth-century European sculpture, a rival to Bernini and a leading light in an artistic milieu that included Poussin and Rubens. Estelle Lingo reconstructs Duquesnoy's pursuit in Rome of a modern artistic practice in the Greek manner. Reconstruction of Duquesnoy's Greek ideal enables Lingo to offer new interpretations of his exquisite marble and bronze sculptures. Moreover, she demonstrates that the archaeological and poetic vision of Greek art developed by Duquesnoy and his circle formed the basis of Johann Joachim Winckelmann's influential *Reflections on the Imitation of Greek Works in Painting and Sculpture*, thus overturning the long-held assumption that no meaningful distinction was made between ancient Greek and Roman art prior to Winckelmann's work in the eighteenth century. Examining in detail how Duquesnoy developed and employed his Greek manner, Lingo brings to light the extent of his contributions to European culture and aesthetics and to the rise of Neoclassicism. Reflections on the Politics of Ancient Greece Heeren, 1824. **A Companion to Greek Democracy and the Roman Republic** Dean Hammer, 2014-08-25. *A Companion to Greek Democracy and the Roman Republic* offers a comparative approach to examining ancient Greek and Roman participatory communities. It explores various aspects of participatory communities through pairs of chapters: one Greek, one Roman, to highlight comparisons between cultures. It examines the types of relationships that sustained participatory communities, the challenges they faced and how they responded. It sheds new light on participatory contexts using diverse methodological approaches. It brings an international array of scholars into dialogue with each other. **Reflections on Authentic Movement** Eila

Critical Reflections on Poetry and Painting (2 vols.) Jean-Baptiste Du Bos,2021-07-15 Jean Baptiste Du Bos Critical Reflections on Poetry and Painting first published in French in 1719 is one of the seminal works of modern aesthetics Du Bos rejected the seventeenth century view that works of art are assessed by reason Instead he believed audience members have sentiments in response to artworks Their sentiments are fainter versions of those they would feel in response to actually seeing what the work of art imitates Du Bos was influenced by John Locke s empiricism and in turn had a major impact on virtually every major eighteenth century contributor to philosophy of art including Voltaire Montesquieu Diderot Rousseau Herder Lessing Mendelssohn Kames Gerard and Hume This is the first modern annotated

and scholarly edition of the Critical Reflections in any language **Julien-David Leroy and the Making of Architectural History** Christopher Drew Armstrong, 2013-04-15 This book examines the career and publications of the French architect Julien David Leroy 1724 1803 and his impact on architectural theory and pedagogy Despite not leaving any built work Leroy is a major international figure of eighteenth century architectural theory and culture Considering the place that Leroy occupied in various intellectual circles of the Enlightenment and Revolutionary period this book examines the sources for his ideas about architectural history and theory and defines his impact on subsequent architectural thought This book will be of key interest to graduate students and scholars of Enlightenment era architectural history
