Cole, 1999 Demystifying physics in a fascinating read First You Build a Cloud does for physics what the bestselling *The Universe and the Teacup* did for math *Defending Science - within Reason* Susan Haack, 2011-03-30 Sweeping in scope penetrating in analysis and generously illustrated with examples from the history of science this new and original approach to familiar questions about scientific evidence and method tackles vital questions about science and its place in society Avoiding the twin pitfalls of scientism and cynicism noted philosopher Susan Haack argues that fallible and flawed as they are the natural sciences have been among the most successful of human enterprises valuable not only for the vast interlocking body of knowledge they have discovered and not only for the technological advances that have improved our lives but as a manifestation of the human talent for inquiry at its imperfect but sometimes remarkable best This wide ranging trenchant and illuminating book explores the complexities of scientific evidence and the

multifarious ways in which the sciences have refined and amplified the methods of everyday empirical inquiry articulates the ways in which the social sciences are like the natural sciences and the ways in which they are different disentangles the confusions of radical rhetoricians and cynical sociologists of science exposes the evasions of apologists for religious resistance to scientific advances weighs the benefits and the dangers of technology tracks the efforts of the legal system to make the best use of scientific testimony and tackles predictions of the eventual culmination or annihilation of the scientific enterprise Writing with verve and wry humor in a witty direct and accessible style Haack takes readers beyond the Science Wars to a balanced understanding of the value and the limitations of the scientific enterprise
