The Pygmy Hippo Story Phillip T. Robinson, Gabriella L. Flacke, Knut M. Hentschel, 2017 Though the pygmy hippopotamus has been designated as a flagship species of West African forests meaning that by raising conservation efforts for a single species an entire ecological region could benefit very little research has been published on the animal They are solitary nocturnal and highly evasive and until recent developments in camera trap technology they were considered the least photographed large mammal species in the world The information currently available on this endangered species is scattered limited redundant and often inaccurate and no major volume exists as a resource for those interested in the conservation effort for the species until now Phillip Robinson and his coauthors provide a treatment of the natural history biology and ecology of the pygmy hippo along with a discussion of the rare animal's taxonomic niche and a summary of the research initiatives involving it up to this point The authors show the ways in which the pygmy hippo has come into contact with people in West African countries both in terms of ecological and cultural impact This creature has been the subject of local folktales and is treated as almost mythic in some regions Information on issues related to captivity breeding and zoos is provided The book is heavily illustrated with original photographs and anatomic drawings The project should be of use to conservation biologists zoologists and natural history readers and will be the definitive single volume account of an animal that the scientific community has designated to be ecologically significant to West Africa

Desert animals in the eastern Sahara : status, economic significance, and cultural reflection in antiquity Heiko Riemer, Nadja Pöllath, Michael Herb, Frank Förster, 2009-01-01

The Great Mystery Alister E McGrath, 2017-05-04 There is currently huge interest in the question of human nature and identity and what the human future might look like Who are we Why are we here What is our future Are we alone And what can religion bring alongside biology and anthropology to these important and exciting questions The Great Mystery focuses on this fascinating field of study Alister McGrath bestselling author and Andreas Idreos Professor of Science and Religion at Oxford University explores the question of human nature from both scientific and religious perspectives and weaves together the results to open up and explore some of the

Born to Wonder Alister McGrath, 2020-08-04 In *Born to Wonder* Alister McGrath a prolific Oxford scholar scientist and theologian explores the deepest mystery at the heart of life itself Life is a gift We never asked to be born Yet here we are living in this strange world of space and time trying to work out what it s all about before the darkness closes in and extinguishes us We are adrift on a misty grey sea of ignorance seeking a sun kissed island of certainty on which we might hope to find clear answers to our deepest and most poignant questions What is the point of life Why are we here And what is it about us that makes us want to ask these questions As far as we know we re the only species on earth that asks these questions and dares to hope that we might find an answer It seems that we are born to wonder not merely to exist From time to time all of us find ourselves overwhelmed by a sense of awe or mystery often when confronted with the beauty of nature whether it is a mountain stream or the vast expanse of ocean waters That is when we see a flicker of a grander vision of reality perhaps lying beyond the horizons of our experience It is as if for only a moment a veil is removed and we catch a half glimpsed sight of a promised land waiting to be mapped and explored This sense of wonder fuels much of humanity s creativity and its search for understanding

Arius on Carillon Avenue Peter Carnley, 2023-11-09 In this book and its companion volume *The Subordinate Substitute* Peter Carnley unpicks logical knots and entanglements of argument found today in contemporary expressions of belief in the eternal functional submissiveness of the Son to the Father Trinitarian subordinationism and complementarianism is characteristically found along with associated conservative evangelical beliefs in the subordination of women to men and the theology of redemption known as the penal substitutionary theory of the atonement This theological package is energetically promoted amongst conservative evangelical Christians most notably members of the Southern Baptist Church and Presbyterians of the Westminster Tradition in the United States and Britain and very significantly amongst conservatively minded Anglicans of the Diocese of Sydney and elsewhere across Australia All the while the argument of this book is driven by the question of whether this popular phenomenon of contemporary evangelical Christianity is fairly and legitimately categorized as a modern form of the ancient heresy of Arianism
