and their socio political context Emerging World: The Evolution of Consciousness and the Future of Humanity Roger Briggs, 2021-03-25 Why is there so much chaos and suffering in the world today Are we sliding towards dystopia and perhaps extinction or is there hope for a better future What happened in the human lineage over the last three million years that made us into a near geologic force capable of altering the face of our planet and threatening our own existence In Emerging World Roger Briggs explores the evolution of consciousness and shows that this is behind everything humans have done are now doing and are capable of in the future By bringing together the best knowledge from paleoanthropology cultural philosophy cognitive psychology and evolutionary theory Briggs makes the case that humanity is now on the verge of a major transformation a monumental turning point in our story Foreseen by many sages and scholars this anticipated leap promises a new era of history and culture and a new civilization on Earth in which the needs of all people are met and we become stewards of our living planet Yet this is by no means guaranteed Emerging World offers a new understanding of our crisis today and points the way to a bright future for humanity and life on our planet
