Clinical Reflexology Denise Tiran, Peter A. Mackereth, 2010-12-01 Clinical Reflexology takes the practitioner on a journey of examination critical review and debate prior to making recommendations for best practice in reflexology The phenomenal rise in interest by health professionals in Complementary and Alternative Medicine CAM and in particular touch therapies has led to a need for texts that relate and integrate theory and practice to health care settings Clinical Reflexology does this expanding and exploring concepts introduced in the first edition Many CAM books have been written for therapists working in private practice but many of these practitioners are also now working in healthcare settings This book allows both groups to facilitate the greater integration of clinical reflexology in clinical practice The book is divided into two sections The first deals with key themes including an up to date review of the research evidence and appropriate methodology safe and supported practice and integration issues All these themes are explored and discussed utilizing the available literature analysis of models and concepts and are related specifically to health care practice The second section focuses on the clinical application of reflexology and how it can be best adapted to the context The contributors are committed pioneers in their field with a track record of integrating reflexology within clinical settings Many are teachers coordinators of therapy services and supervisors ABOUT THE AUTHORS Dr Peter Mackereth is the Clinical Lead for Complementary Therapies and Smoking Cessation Services at The Christie NHS Foundation Trust Manchester He is a registered nurse and has worked in intensive care neurology and oncology Peter has an MA in Medical Ethics and has completed a PhD project examining reflexology vs relaxation training for people with Multiple Sclerosis An author and renowned speaker Peter has held academic post in number of universities most recently as Reader in Integrative Health at the University of Derby Denise Tiran a midwife lecturer and reflex zone therapist is an internationally acclaimed authority on complementary therapies in pregnancy and childbirth She is Director of Expectancy the leading provider of professional education on the safe use of complementary therapies in maternity care including a special pregnancy course for reflexologists Her latest book *Reflexology for Pregnancy and Childbirth* was published in January 2010

aims to give health professionals a balanced and independent overview of massage and aromatherapy I have written it because despite growing interest there is a dearth of professional literature on this subject This book aims to cover a number of topics which are under represented in existing publications These include scientific research in massage and aromatherapy the use of the therapies in medical settings the knowledge base of massage and aromatherapy professional and managerial issues safety Understanding of these subjects is essential for any reasoned evaluation of massage and aromatherapy Yet this book is probably the first to provide information suitable for this task At the current time of writing almost all books on massage and aroma therapy have been written with the lay public in mind The texts recommended to students and practitioners by the foremost schools and institutions are exactly the same as those available in health food shops as general introductions for prospective patients Not surprisingly such books generally fail to include in depth discussions of professional issues
