Warfare Since the Second World War Torsten Schvinghammer, 2018-04-24 Warfare Since the Second World War presents a wealth of analysis and data about one of the most pressing questions of our time why does war continue to plague us fifty years after World War II This book argues that the nature of war has shifted from inter state conflicts toward internal conflicts above all civil war Low intensity conflict helps explain the constant increase in wars over the last fifty years and makes it probable this trend will continue Gantzel and Schvinghammer argue that modern warfare reflects a continuation of the nation state building process begun in nineteenth century Europe In their analysis economic modernization and social integration destroy traditional relations and create instability in the developing world While these forces were successfully harnessed by the modern state in Europe and North America economic and political globalization make a similar resolution considerably more complex In addition to their insightful analysis the authors provide a detailed list of all wars fought from 1945 to 1995 The authors lucid explanatory commentaries are accompanied by lists tables and charts In addition to a detailed war register upon which all statistical data and analyses for the volume are based there are appendices with directories useful for locating specific wars as well as several supplementary lists An afterword brings the reader closer to the world situation as we conclude the twentieth century including the impact of political developments in Eastern Europe Beyond its historical dimension this book offers a policy relevant empirical demonstration of the ongoing increase in internal civil wars and addresses the inability of modern society to prevent this scourge Warfare Since the Second World War is an indispensable resource for anyone concerned with issues of war and peace development

Economic Reforms in the Socialist World Stanislaw,etc, Gomulka,2016-07-22 First Published in 1990 Socialist countries now account for about a quarter of the world economy about a third of the world population and about half the world military power What happens in those countries is therefore par excellence of importance to all of us This book is an outcome of a Conference on Economic Systems and Reforms in a Changing World held in Seoul in September 1987 The Conference was significant in several respects Foremost was the fact that this was probably the first such meeting of scholars from both socialist and non socialist countries held to discuss socialist economic reforms worldwide

Shareholding System Reform in China Shuyun Ma,2010-01-01 This insightful book demonstrates how China has emerged as one of the world s largest privatizing countries within a decade Since the 1980s there has been a global wave of transfer of state assets to private hands China is a relatively late participant in this worldwide trend yet in the last decade it has emerged as one of the largest privatizing countries Shu Yun Ma argues that China s privatization is not based on any grand blueprint rather it is privatization by groping for stones to cross the river a well known metaphor often attributed to Deng Xiaoping meaning that the reform simply proceeds on a trial and error basis without being guided by any theory With original case studies including one on China s first industrial shareholding enterprise this informative book will be of great interest to the academic community China observers and policymakers as well as financial analysts [Economic Reforms in the Socialist World](#) Stanislaw Gomulka,Yong-Chool Ha,Se-wŏn Kim, First Published in 1990 Routledge is an imprint of Taylor Francis an Informa company **Global Neoliberal Capitalism and the Alternatives** David Lane,2023-05-31 The twentieth century was an era of socialist revolutionary transformations and significant social democratic reforms By the twenty first century these socialist inspired movements have largely disappeared their ideologies have been disavowed and

their institutions dismantled and replaced by global neoliberal capitalism This book explores the social political and economic forces driving these movements in Western Europe and in the USSR explaining their initial triumphs and how they eventually faltered under the influence of global neoliberalism David Lane examines the nature and appeal of neoliberal capitalism and analyses current social and political proposals for its reform or replacement including statist forms of capitalism social democratic and ecological globalization reforms self sustaining autonomous communities and globalised forms of social democracy or socialism Outlining his own proposal to replace global neoliberal capitalism with political systems based on a combination of market socialism and state planning Lane provides important insights for ways forward and a challenge for parties seeking political and economic alternatives

The Routledge International Handbook of European Social Transformations Peeter Vihalemm, Anu Masso, Signe Opermann, 2017-11-22 This book focuses on social transformations as one of the central topics in the social sciences The study of European social transformations is very valuable in the context of universal discussions within social sciences explaining invariable universal attributes of societies and examining changing attributes The book consists of 20 chapters on European social transformations written from the perspectives of distinguished scholars from such disciplines as economics political science educational science geography media and communication studies public management and administration social psychology and sociology The temporal and spatial range of the book is wide including such global changes as time space compression focusing particularly on change processes in Europe during the last two decades The book consists of four main parts beginning with an overview of the theoretical and methodological approaches and then focusing separately on post communist transformations institutional drivers of social transformations in the European Union and European transformations in the context of global processes The book presents current theoretical empirical and methodological approaches that complement the scientific literature on social transformations This book is both an invaluable resource for scholars and an indispensable teaching tool for use in the classroom and will be of interest to students academics and policy makers studying how this diverse region has changed over recent years

The Baltic States After Independence The late Ole Nørgaard, 1999-01-01 The Baltic States After Independence is an excellent and informative account of how the Baltic republics have fared This excellent book is indispensable for any scholar studying the former Soviet Union Although this book will be a definitive reference for transition scholars it deserves a wider audience I would encourage every economics major to read it or at least parts of it Too often the economics curriculum tainted by orthodoxy ignores the interdependence of economics politics and international relations The authors superbly demonstrate that markets do not develop independently and ahistorically rather their development is path dependent and guided by a qualified and efficient state apparatus I can think of no better book that disparages neoclassical orthodoxy almost to the point of irrelevancy while at the same time vindicating the central tenets of institutionalism Jack Reardon Journal of Economic Issues Acclaim for the first edition The book is of great help in understanding the Baltic states

in particular the survival of what has been referred to as the civil society and the re establishment of democracy Ulf Hansson Initiative on Conflict Resolution and Ethnicity The second edition of this widely acclaimed book considers the extent to which the Baltic states have succeeded politically and economically in their aspirations to emulate Western institutions since independence The book has been completely revised since the first edition to account for the rapid changes in the countries themselves and in the theories that attempt to generalize the patterns of development in post communist countries The Political Economy of Fiscal Reform in Central-Eastern Europe Frank Bönker,2006-01-01 Frank B nker has done a masterful job This is probably the best book available on this important subject and its significance is not limited to studies of postcommunist societies It has important theoretical implications for everyone interested in the Political Economy of Policy Reform perspective within the field of comparative political economy John L Campbell Slavic Review *The Polish Road from Socialism: The Economics, Sociology and Politics of Transition* Walter D. Connor,Piotr Ploszajski,2019-07-26 What the contributors to this volume offer is neither a romantic version of the course of Polish history nor a jubilant account of the recovery of national independence and political choice Rather they offer a variety of tough minded analytic perspectives on what comes when the party s over not just the PSPR but the celebration marking its downfall They focus on Poland s movement toward an internationally competitive market economy a political democracy in which plural interests compete and the constitution of a civil society that both tolerates and ameliorates conflict The multidisciplinary contributors include Jan Muzel Keith Crane Benjamin Slay Kazimierz Poznanski Jan Bossak Wojciech Bienkowski Włodzimierz Wesolowski Edmund Wnuk Lipinski Adam Sarapata Andrzej Sicinski Piotr Lukaszewicz Krzysztof Nowak David S Mason Andrzej Rychard Krzysztof Jasiewicz Jack Bielasiak Janusz Reykowski Stanislaw Gebethner Mirosława Marody Edmund Mokrzycki and Michael D Kennedy A Coherent European Procurement Law and Policy for the Space Sector Stephan Hobe,Mahulena Hofmannová,Jan Wouters,2011 Space is a matter of strategic importance and in need of concerted action by the European space actors Distinct approaches to public procurement must not hamper the cooperation between the European Space Agency the European Union and their respective Member States The study provides a toolbox for space procurement that addresses specificities of this sector Each tool is assessed in light of policy objectives market conditions and the legal frameworks of the European Union and the European Space Agency A discussion on selected means of policy implementation other than procurement so called Extra Procurement Instruments complements this toolbox The Third Way in European space procurement caters for both coherence and flexibility needs and is intended to serve policy makers as they finally make Europe in Space a reality The Economics of Transition Egor Timurovich Gaïdar,2003 This collection of essays discuss the economic policy problems that confront postcommunist countries Most chapters focus on liberalization of the exchange rate and trade system macroeconomic stabilization and institutional reform
