Reformation Of Canadas Schools Breaking The Barriers To Parental Choice:

The Reformation of Canada's Schools Mark Holmes,1998 A proposal for the deregulation of the Canadian school Arguing that a broad range of school choices is necessary in a pluralist society the author contends centralized decision making by departments of education obstruct parental choice He also criticizes the tenets of progressive or child centered pedagogy which he claims has captured the school system for the past three decades Annotation copyrighted by Book News Inc Portland OR

Understanding School Choice in Canada Lynn Bosetti,Dianne Gereluk,2016-08-04 Understanding School Choice in Canada provides a nuanced and theoretical overview of the formation and rise of school choice policies in Canada Drawing on twenty years of work Lynn Bosetti and Dianne Gereluk analyze the philosophical historical political and social principles that underpin the formation and implementation of school choice policies in the provinces and territories Bosetti and Gereluk offer theoretical frameworks for considering the parameters of school choice policies that are aligned and attentive to Canadian educational contexts This robust overview successfully shifts the debate away from ideology in order to facilitate an understanding that the spectrum of school choice policy in Canada is a response to the varying political challenges in society at large This book is essential reading for those who desire a deeper understanding of school choice policies in Canada

Faith, Rights, and Choice James Farney,Clark Banack,2023-02-27 The Canadian provinces have evolved quite different ways of responding to the policy problems posed by religious schools Seeking to understand this peculiar reality Faith Rights and Choice articulates the ways in which the provincial governance regimes developed for religious schools have changed over time Covering nearly three centuries the book begins with the founding of schooling systems in New France and continues into a variety of present day conflicts that emerged over the question of religion in schools James Farney and Clark Banack employ a method of process tracing drawing on 88 semi structured interviews with key policy insiders They also reference archival material documenting meetings political speeches and legislative debates related to government decisions around issues of religious education Relying on the theoretical foundations of both historical institutionalism and Canadian political development Faith Rights and Choice presents a new analytic framework to help make sense of the policy divergence witnessed across Canada

What's Wrong with Our Schools Michael C. Zwaagstra,Rodney A. Clifton,John C. Long,2010-07-16 What s Wrong with Our Schools and How We Can Fix Them examines the status of public education in North America and exposes many of the absurd instructional practices found in all too many schools Written by three experienced educators this book provides readers with a direct window into public education The language is straightforward the case studies based on real events and the research evidence clearly presented With chapter titles like Subject Matter Matters A Pass Should be Earned and There is Too Much Edu Babble the authors systematically demolish the ridiculous fads that have taken hold of public education As unashamed apologists for the importance of knowledge and content in school curricula the authors clearly show why the views of romantic progressives like those of popular author Alfie

Kohn fail to stand up to rigorous scrutiny A consistent focus on common sense permeates this book and provides parents teachers and administrators with practical ways in which they can help improve public education Anyone interested in the future of public education will benefit from reading this book For more information visit www.fixingourschools.com

The State of the System Paul W. Bennett, 2020-09-23 Over the last fifty years Canada's public schools have been absorbed into a modern education system that functions much like Max Weber's infamous iron cage Crying out for democratic school level reform the system is now a centralized bureaucratic fortress that every year becomes softer on standards for students less accessible to parents further out of touch with communities and surprisingly unresponsive to classroom teachers Exploring the nature of the Canadian education order in all its dimensions *The State of the System* explains how public schools came to be so bureaucratic confronts the critical issues facing kindergarten to grade 12 public schools in all ten provinces and addresses the need for systemic reform Going beyond a diagnosis of the stresses strains and ills present in the system Paul Bennett proposes a bold plan to re-engineer schools on a more human scale as the first step in truly reforming public education In place of school consolidation and managerialism one size fits all uniformity limited school choice and the success for all curriculum Bennett advocates for a new set of priorities decentralize school governance deprogram education ministries and school districts listen to parents and teachers and revitalize local education democracy Tackling the thorny issues besetting contemporary school systems in Canada *The State of the System* issues a clarion call for more responsive engaged and accountable public schools

In Defence of Religious Schools and Colleges Elmer John Thiessen, 2001 It is often argued that religious schools and colleges promote intolerance divisiveness and fanaticism and that they violate the principle of academic freedom Some writers also suggest that economic support for religious schools by the state violates the principle of the separation of church and state Elmer Thiessen provides a philosophical defence of religious schools and colleges against these and other standard objections He concludes with a radical proposal a pluralistic educational system will better prepare students for citizenship in pluralist liberal democracies than a monopolistic state maintained school system In placing his argument within the context of liberal democratic values Thiessen gives concrete examples of objections to religious schools and offers practical suggestions that follow from the philosophical treatment of the problem In *Defence of Religious Schools and Colleges* bridges the gap between philosophical argument and educational practice It will be of interest not only to philosophers and educational theorists but also to practitioners in education Academics policy makers political theorists lay people teachers administrators and parents B those who object to religious schools and colleges and those who find themselves trying to answer the objections B will benefit from reading this book

Rethinking the Welfare State Ronald Joel Daniels, M. J. Trebilcock, 2005 *Rethinking the Welfare State* offers a comprehensive and comparative analysis of social welfare policy in an international context with a particular emphasis on the US and Canada The authors investigate the claim that a decentralized delivery of government supported goods and services enables policy

objectives to be achieved in a more innovative and efficient way but at a lower cost Secondly they examine the effectiveness of the voucher system as a solution to problematic welfare concerns While this system has shown much promise in improving welfare there have been problems for institutions unable to attract enough voucher assisted consumers to ensure their survival In this context the authors examine major social programmes such as food stamps primary and secondary education post secondary education labour market training childcare healthcare legal aid low income housing long term care and pensions

Citizenship and Education in

Liberal-Democratic Societies Kevin McDonough, Walter Feinberg, 2003-08-28 The essays in this volume address the educational issues which arise when national sub national and supra national identities compete How can we determine the limits of parental educational rights when the concern of liberalism to protect and promote children's autonomy conflicts with the desire to maintain communal integrity Given the advances made by the forces of globalization can the liberal democratic state morally justify its traditional purpose of forging a cohesive national identity Or has increasing globalization rendered this educational aim obsolete and morally corrupt Should liberal education instead seek to foster a sense of global citizenship even if doing so would suppress patriotic identification In addressing these and many other questions the volume examines the theoretical and practical issues at stake between nationalists multiculturalists and cosmopolitans in the field of education The fifteen essays plus an introductory essay by the editors provide a genuine productive dialogue between political and legal philosophers and educational theorists
