

It could be suggested, therefore, that what is unique about this sort of work is that it has been produced by disabled feminists, who have taken a slightly different approach to disability than male theorists and researchers. The social model of disability, in its founding versions, stressed the structures which disable people with impairment. The emphasis was on collective and public dimensions of disadvantage: employment, the built environment, the economy. These priorities led to the neglect of more personal and private dimensions of disabled people's experience: the body, children and parenting, health and genetics, sexuality. As Morris writes in her introduction: 'A number of women felt that the prominence of men within the disabled people's movement, and their general reluctance to talk about feelings, has made it difficult to move beyond this rather simplistic version of the social model' (p. 14). Feminist thinkers, including many of those represented in this collection, took the lead in extending the radical thinking to these other areas, and in the process reconceived the social model itself.

This approach is more fruitful than the suggestion on the cover of this book that 'disabled women have also been marginalized by the disability movement itself'. While the disability movement cannot be said to be free of sexist or racist attitudes, in fact women activists have been extremely prominent in organizations, taking up many leadership positions. However, there has been more of an imbalance in the production of academic work on disability, with the exception of Jenny Morris herself. As more feminist researchers and theorists produce new accounts of disability, this can only be to the benefit of disability studies as a developing discipline. Women's studies too would undoubtedly benefit from taking on board the challenge which disabled feminist work presents to the mainstream.

Frank Field

Social Market Foundation, London, 1997

Frank Field's appointment as Minister for Welfare Reform in the Blair government was seen by many as a clear signal that there were going to be major changes in social security policy. Instead of merely 'thinking the unthinkable' Field was to be given the chance of actually formulating 'radical' policies. However, after less than a year in office, Field (whom Brivati [1999]

International Labour Office,2000 Increasing globalisation and trade liberalisation are creating greater insecurity for many income earners This study examines the vital role played by social protection and health care in the event of old age incapacity for work through sickness or accident bearing and raising children and unemployment The report discusses the effects of rising unemployment and underemployment and of labour market developments which have exposed a growing number of workers to low pay and precarious conditions Factors such as changing family structures and demographic trends are considered The positive impact of social protection on the economy has often been neglected the report says and can be enhanced by better co ordination between social protection labour market and anti poverty policies **Social Protection**

Globalised Jos Berghman,2005 This book contributes to the growing amount of literature that is concerned with the relationship between globalisation and social security The aim of this work is first to clarify the impact of the globalisation process on social security systems and second to formulate substantive and technical proposals for the adaptation of existing social security schemes to an altered socio economic context and for the elaboration of international legal instruments aimed at an effective substantive and procedural protection of social security as a fundamental right The report is divided into three parts The first part is concerned with the social impact of globalisation and its consequences for social security systems in the high income economies The first article of this section considers the nature of globalisation as well as its social impact It spells out some fundamental challenges facing social security systems The following article elaborates further on one specific challenge that is the need for social security to adapt to the increased territorial mobility of workers The second part looks at the effects of globalisation on social security in relation to middle and low income countries and examines the extent to which existing arrangements in these countries are able to provide adequate income protection to the majority of the population For

the group of middle income countries the relevance of globalisation for the privatisation of pension systems is analysed as well as the consequences with respect to their main social functions i.e. the provision of old age income security and income redistribution. This is done so through a comparative analysis of Latin American countries that have implemented pension policy reform. The following two articles consider the experience of social security systems in low income countries. In the first article the impact and challenges of globalisation for existing formal and informal social security arrangements in low income countries are explored and options are suggested for alternative approaches to social security provision that are better suited to the circumstances of low income countries. The arguments have been illustrated with evidence from Cote d'Ivoire a country with a socio economic situation and social security framework that is typical for the majority of low income countries. The second article discusses in greater depth the link between informal economic and social security in Sub Saharan Africa. Finally the third part calls for a global approach to social security. To this end the first article in this section outlines a possible strategy for a generalised social protection at the global level based on the human damage theory while the last chapter of this work is concerned with the international legal instruments most appropriate for a better substantive and procedural protection of social security as a basic human right.

IMF Staff Papers, Volume 52, Special Issue, IMF Conference in Honor of Michael Mussa International Monetary Fund. Research Dept., 2005-08-30. This paper focuses on expectations for the American economy focused on the likelihood of secular stagnation which continued to be debated throughout the post war period. Concerns rose during the late 1960s and early 1970s about rapid population growth smothering the potential for economic growth in developing countries were contradicted when during the mid and late 1970s fertility rates began to decline rapidly. In policy oriented institutions and in most businesses and individual decision making policymaking decisions are often guided by projections and forward looking indicators. The case of Michael Mussa has been one of great anticipation and of great accomplishment and all the early optimistic forecasts about him have turned out to be correct. Within the sphere of economics undoubtedly the most famous and widely used forecast one incidentally that thus far has often been incorrect is that based on the Malthusian doctrine of the relationship between resources and population.
