Transformations in the Brazilian and Korean Processes of Capitalist Development between the Early 1950s and the Mid-2010s: From Global Capital Accumulation to Late Industrialisation Nicolás Grinberg, 2023-10-16 Challenging mainstream nation centred theories of economic development Nicol s Grinberg examines the specificities of capitalist development in Brazil and South Korea by starting from their modes of participation in the international division of labour and hence in the production of surplus value on a global scale Contrary to those theories he does not consider these as resulting simply from the economic policies of nation states and their associated political institutions nor from local class struggle dynamics or geopolitical developments Rather drawing on key insights from Marx s critique of political economy his analysis begins by recognising that the process of capitalist development is global in terms of its economic dynamics and historical trends and national only in its political and institutional forms of realisation State mediated patterns of economic development and institutional change in Brazil and Korea as well as the intra and inter state political processes through which these have come about are then considered mediations in the conformation and reproduction of the nationally differentiated uneven process of capital s valorisation on a global scale
