Essentials and Applications of Food Engineering C. Anandharamakrishnan, S. Padma Ishwarya, 2019-03-15 *Essentials Applications of Food Engineering* provides a comprehensive understanding of food engineering operations and their practical and industrial utility. It presents pertinent case studies, solved numerical problems, and multiple choice questions in each chapter and serves as a ready reference for classroom teaching and exam preparations. The first part of this textbook contains the introductory topics on units and dimensions, material balance, energy balance, and fluid flow. The second part deals with the theory and applications of heat and mass transfer, psychrometry, and reaction kinetics. The subsequent chapters of the book present the heat and mass transfer operations such as evaporation, drying, refrigeration, freezing, mixing, and separation. The final section focuses on the thermal, non-thermal, and nanotechnology-based novel food processing techniques: 3D food printing, active and intelligent food packaging, and fundamentals of CFD modeling. Features: 28 case studies to provide a substantial understanding of the practical and industrial applications of various food engineering operations. Includes 178 solved numerical problems and 285 multiple choice questions. Highlights the application of mass balance in food product traceability and the importance of viscosity measurement in a variety of food products. Provides updated information on novel food processing techniques such as cold plasma, 3D food printing, nanospray drying, electrospraying, and electrospinning. The textbook is designed for undergraduate and graduate students pursuing Food Technology and Food Process Engineering courses. This book would also be of interest to course instructors and food industry professionals.

Principles of Food Processing Richard W. Hartel, Dennis R. Heldman, 1997-03-31 This book focuses on the most common unit operations utilized in modern food processing operations. It contains both descriptive and quantitative analysis of the typical food processes found in modern food processing plants. The descriptive information provides students with background on the process and the impact of the process on food product quality. The quantitative description assists the

student in understanding the ability of the process to achieve the desired result and the consequences of improper operation of the process Examples utilizing different food commodities are incorporated to ensure that the student gains an appreciation of the relationship between commodities and processes Monthly Bulletin of the Association Internationale Du Froid International Association of Refrigeration,1916 *Power* ,1913 **Proceedings** ,1913 Monthly Bulletin of Information on Refrigeration ,1920 **International Bulletin of Information on Refrigeration** International Institute of Refrigeration,1928 **FoodReview** ,1991
