Refugee Health Care Aniyizhai Annamalai, 2020-10-01 Refugee health is growing as an academic medical discipline More and more health care providers are coming together to exchange research information educational curricula and social policies related to refugee health The number of practitioners attending the annual North American Refugee Healthcare Conference has doubled since 2014 Refugees arrive in the United States from different parts of the world Refugees undergo a medical screening soon after arrival as recommended by the U S Department of State and it is usually primary care practitioners who usually evaluate these patients at this first visit Psychiatrists and other specialists may also evaluate them soon after arrival Though physicians receive a variable amount of training in cross cultural medicine virtually none is in the area of refugee evaluations

There are several major ways that the field has changed U S refugee policies and refugee admission numbers have changed dramatically in the past four years as has the epidemiology of medical conditions because the demographics of refugees have changed The CDC guidelines for domestic screening have also been modified significantly as some of the screening tests are no longer recommended Protocols have also been updated for presumptive treatment received by refugees before departure to the United States of other countries A new chapter on end of life care for refugees has been added to the book Now fully revised and expanded this second edition reflects the many changes that have occurred in the field of refugee health since 2014 Refugee Health Care remains the definitive resource for primary care physicians and mental health practitioners who see and evaluate refugees It is also relevant for medical nursing and public health students involved with refugee health as well as resettlement agency workers and public health officials overseeing refugee care Refugees and Mental Health Civis Trust,2004 **Primary Care Mental Health** Linda Gask,Helen Lester,Robert Peveler,2009-10 In this book internationally respected authors provide a conceptual background and dispense practical advice on delivering mental health services for the clinician They discuss ways of improving joint working between primary and secondary care as well as issues affecting the professional development of all practitioners within primary care teams Refugees and general practitioners - partners in care? C.Titia Feldmann,2006 Refugee Resettlement Program United States. Office of Refugee Resettlement,1994 *Access to Primary Care and Preventative Health Services of Migrants* Aldo Rosano,2018 This salient volume surveys the state of access to primary care and preventive health services by migrants refugees and asylum seekers across Europe Experts in public health and allied fields identify obstacles to healthcare interventions for migrants including costs legal status health related behaviors and beliefs and cultural and language barriers The book includes the latest data concerning access to specific preventive services e g vaccinations colorectal screenings specific issues of women and sexual minorities and the potential for health promotion in prevention Best practices for improving access are outlined as a basis for public health and policy directives toward reducing health disparities between migrant and native populations Among the topics covered Access to medical examination for prevention among migrants Access and barriers to infant vaccinations female cancer screening and colorectal screening among migrant populations Provision and policy gap between the primary and preventive care required by and the care provided to LGBTQ migrants refugees and asylum seekers Health related lifestyles and intermediate health conditions of migrants Quality of primary healthcare and preventive health services provided to migrants Adaptations of primary health care for migrants Access to primary health care and policies on migration and health at a time of economic crisis Dedicated to bridging research and policy gaps in this vital area Primary Care Access and Preventive Health Services of Migrants is intended for an international audience of academics researchers policymakers and practitioners in public health and related disciplines Publisher description *The Health of Refugees* Pascale Allotey,Daniel Reidpath,2019-01-03 At the moment over 65 million people are forcibly displaced from their homes The

reasons for movement range from extreme weather conditions and environmental disasters to war civil and political crises to the need for basic economic survival Amongst these 65 million people are those that have been forced to leave a country that is no longer willing or able to offer protection and those who are displaced within their own country's borders In order to improve conditions for displaced people all over the globe we need to look at the reason behind their move as this defines their migration status under international law In its turn the migration status affects the requirements of other countries to grant asylum and the individual's right to protection and support The definition of migration status and its implications has created tension in the public debate on refugees for decades and is today more relevant than ever In *The Health of Refugees Public Health Perspectives from Crisis to Settlement* the challenges and vulnerabilities created from this debate are addressed by public health policy makers clinical practitioners and researchers An analysis of public health international law the history of migration and the media's role in refugee health it is a comprehensive and critical work with a strong message in favour of international and interdisciplinary cooperation With a focus on what international obligations entail when it comes to refugees and migrants the authors present a reinforced take on our collective responsibility to leave no one behind *The Health of Refugees Public Health Perspectives from Crisis to Settlement* traces the health repercussions on individuals and populations from the moment of forced mass movement due to conflict and other disasters through to the process of resettlement in other countries These issues are addressed within the context of other global public health priorities and are part of the book's critical analysis not only of the particular vulnerabilities created by mobility but also how these interact and intersect with existing considerations across gender and age in health systems and international law With a wider geographical area and case studies from all over the globe as a basis for the studies presented this is a fully updated edition with new material discussing the current political landscape A truly multidisciplinary book *The Health of Refugees* is ideal for public health practitioners researchers and postgraduate students It is also an important work for those involved in non governmental organisations international aid and international development Furthermore it provides a critical background for clinicians mental health workers and policymakers from health welfare and migration
