Road To Science Fiction 3:

The Road to Science Fiction: From Heinlein to Here James Gunn, 2002 This volume covers the period from 1940 to 1975 beginning in the golden age of Science Fiction and ending at a time when SF book publication was just beginning to explode and SF films *Close Encounters of the Third Kind* *Star Wars* and *E.T.* would soon dominate box offices *Inside Science Fiction* James Gunn, 2006-03-21 James Gunn has had a long and distinguished career in science fiction In addition to his stories and novels he has written extensively about the reading writing and criticism of science fiction Many of these essays were published in *The Science of Science Fiction Writing* Scarecrow 2002 A second collection of essays *Inside Science Fiction* was originally published in 1992 and is now available in this revised updated and expanded edition With the addition of five new articles written since 1992 *Inside Science Fiction* represents Gunn's latest thoughts about the genre The book is divided into four major sections that tackle various aspects of the genre *Getting Inside Science Fiction* in which Gunn discusses his relationship with the genre *Science Fiction and the Teacher* illustrates various approaches to teaching science fiction *Science Fiction on Film and Television* deals with the film industry's approaches to science fiction in particular Gunn's experiences of seeing his novel *The Immortals* turned into a made for television movie and subsequent series *Science Fiction and the Real World* examines the impact of science fiction on the world and what the future holds for the genre *Inside Science Fiction* offers a complete overview of science fiction for readers and viewers from an author reader and teacher who has seen it from all sides for more than seventy years **Science Fiction and the Dismal Science** Gary Westfahl, Gregory Benford, Howard V. Hendrix, 2019-12-10 Despite the growing importance of economics in our lives literary scholars have long been reluctant to consider economic issues as they examine key texts This volume seeks to fill one of these conspicuous gaps in the critical literature by focusing on various connections between science fiction and economics with some attention to related fields such as politics and government Its seventeen contributors include five award winning scholars five science fiction writers and a widely published economist Three topics are covered what noted science fiction writers like Robert A. Heinlein Frank Herbert and Kim Stanley Robinson have had to say about our economic and political future how the competitive and ever changing publishing marketplace has affected the growth and development of science fiction from the nineteenth century to today and how the scholars who examine science fiction have themselves been influenced by the economics of academia Although the essays focus primarily on American science fiction the traditions of Russian and Chinese science fiction are also examined A comprehensive bibliography of works related to science fiction and economics will assist other readers and critics who are interested in this subject [Saving the World Through Science Fiction](#) Michael R. Page, 2017-03-13 One of the major figures in science fiction for more than sixty years James Gunn has been instrumental in making the genre one of the most vibrant and engaging areas of literary scholarship His genre history *Alternate Worlds* and his *The Road to Science Fiction* anthologies introduced countless readers to science fiction He founded the Gunn Center for

the Study of Science Fiction in 1982 But Gunn has also been one of the genre's leading writers His classic novels *Star Bridge* with Jack Williamson *The Joy Makers* *The Immortals* and *The Listeners* helped shape the field Now in his nineties he remains a prominent voice His forthcoming novel is *Transformation* Drawing on materials from Gunn's archives and personal interviews with him this study is the first to examine the life career and writing of this science fiction grandmaster Three Science Fiction Novellas J. H. Rosny, 2012-01-01 Probably the greatest of all French speaking science fiction writers after Jules Verne I was unprepared for the power and beauty Michael Dirda *The Washington Post* To the short list that includes Jules Verne and H G Wells as founding fathers of science fiction the name of the Belgian writer J H Rosny A n must be added He was the first writer to conceive and attempt to narrate the workings of aliens and alternate life forms His fascination with evolutionary scenarios and long historical vistas from first man to last man are important precursors to the myriad cosmic epics of modern science fiction Until now his work has been virtually unknown and unavailable in the English speaking world but it is crucial for our understanding of the genre Three wonderfully imaginative novellas are included in this volume *The Xipehuz* is a prehistoric tale in which the human species battles strange geometric alien life forms *Another World* is the story of a mysterious being who does not live in the same acoustic and temporal world as humans *The Death of the Earth* is a scientifically uncompromising Last Man story The book also includes an insightful critical introduction that places Rosny's work within the context of evolutionary biology Rosny was a species pluralist and believed that human beings are no more entitled than any other creature to reign supreme He would have felt right at home among the Men In Black Laura Miller *The New Yorker* *Star-Begotten* James Gunn, 2017-11-28 Hugo Award winning writer James Gunn 1923 2020 has been called the last Golden Age author of science fiction In a career of almost 70 years he wrote or edited 45 books and more than 100 short stories and participated in the production of films radio and television programs and comic books Science Fiction, Canonization, Marginalization, and the Academy Gary Westfahl, George Slusser, 2002-01-30 Science fiction occupies a peculiar place in the academic study of literature For decades scholars have looked at science fiction with disdain and have criticized it for being inferior to other types of literature But despite the sentiments of these traditionalists many works of science fiction engage recognized canonical texts such as the *Odyssey* and many traditionally canonical works contain elements of science fiction More recently the canon has been subject to revision as scholars have deliberately sought to include works that reflect diversity and have participated in the serious study of popular culture But these attempts to create a more inclusive canon have nonetheless continued to marginalize science fiction This book examines the treatment of science fiction within the academy The expert contributors to this volume explore a wide range of topics related to the place of science fiction in literary studies These include academic attitudes toward science fiction the role of journals and cultural gatekeepers in canon formation and the marginalization of specific works and authors by literary critics In addition the volume gives special attention to multicultural and feminist concerns In discussing these topics the book sheds considerable

light on much broader issues related to the politics of literary studies and academic inquiry

Modern Science Fiction: A Critical Analysis James Gunn, Michael R. Page, 2018-05-25 James Gunn one of the founding figures of science fiction scholarship and teaching wrote in 1951 what is likely the first master's thesis on modern science fiction. Portions were in the short-lived pulp magazine *Dynamic* but it has otherwise remained unavailable. Here in its first full publication the thesis explores many of the classic Golden Age stories of the 1940s and the critical perspective that informed Gunn's essential genre history *Alternate Worlds* and his anthology series *The Road to Science Fiction*. The editor's introduction and commentary show the historical significance of Gunn's work and its relevance to today's science fiction studies

The Monomyth in American Science Fiction Films Donald E. Palumbo, 2014-11-05 One of the great intellectual achievements of the 20th century Joseph Campbell's *The Hero with a Thousand Faces* is an elaborate articulation of the monomyth, the narrative pattern underlying countless stories from the most ancient myths and legends to the films and television series of today. The monomyth's fundamental storyline in Campbell's words sees the hero venture forth from the world of the common day into a region of supernatural wonder, fabulous forces are there encountered, and a decisive victory is won; the hero comes back from this mysterious adventure with the power to bestow boons to his fellow man. Campbell asserted that the hero is each of us; thus the monomyth's endurance as a compelling plot structure. This study examines the monomyth in the context of Campbell's *The Hero* and discusses the use of this versatile narrative in 26 films and two television shows produced between 1960 and 2009, including the initial *Star Wars* trilogy (1977, 1983), *The Time Machine* (1960), *Logan's Run* (1976), *Escape from New York* (1981), *Tron* (1982), *The Terminator* (1984), *The Matrix* (1999), the first 11 *Star Trek* films (1979-2009), and the Sci-Fi Channel's miniseries *Frank Herbert's Dune* (2000) and *Frank Herbert's Children of Dune* (2003)

The History of the Science-fiction Magazine Michael Ashley, Mike Ashley, 2000-01-01 This is the first of three volumes that chart the history of the science fiction magazine from the earliest days to the present. This first volume looks at the exuberant years of the pulp magazines. It traces the growth and development of the science fiction magazines from when Hugo Gernsback launched the very first *Amazing Stories* in 1926 through to the birth of the atomic age and the death of the pulps in the early 1950s. These were the days of the youth of science fiction when it was brash, raw, and exciting; the days of the first great space operas by Edward Elmer Smith and Edmond Hamilton through the cosmic thought variants by Murray Leinster, Jack Williamson, and others to the early 1940s when John W. Campbell at *Astounding* did his best to nurture the infant genre into adulthood. Under him such major names as Robert A. Heinlein, Isaac Asimov, A. E. van Vogt, and Theodore Sturgeon emerged, who along with other such new talents as Ray Bradbury and Arthur C. Clarke helped create modern science fiction. For over forty years magazines were at the heart of science fiction, and this book considers how the magazines and their publishers, editors, and authors influenced the growth and perception of this fascinating genre.
