Writing Architectures Hélène Frichot, Naomi Stead, 2020-10-29 Architects and fiction writers share the same ambition to imagine new worlds into being Every architectural proposition is a kind of fiction before it becomes a built fact likewise every written fiction relies on the construction of a context in which a story can take place This collection of essays explores what happens when fiction experimental writing and criticism are combined and applied to architectural projects and problems It begins with ficto criticism an experimental and often feminist mode of writing which fuses the forms and genres of essay critique and story and extends it into the domain of architecture challenging assumptions about our contemporary social and political realities and placing architecture in contact with such disciplines as cultural studies literary theory and ethnography These sixteen newly written pieces have been selected for this volume to show how ficto critical writing can be a powerful vehicle for creative architectural practice providing new opportunities to explore modes of writing about architecture both within and beyond the discipline The collection represents a broad range of geographical and cultural positions including indigenous and non Western contexts and includes a foreword and afterword by important thinkers in the domains of architectural criticism Jane Rendell and cultural studies ethnography Stephen Muecke Camera Constructs Andrew Higgott, Timothy Wray, 2016-12-05 Photography and architecture have a uniquely powerful resonance architectural form provides the camera with the subject for some of its most compelling imagery while photography profoundly influences how architecture is represented imagined and produced Camera Constructs is the first book to reflect critically on the varied interactions of the different practices by which photographers artists architects theorists and historians engage with the relationship of the camera to architecture the city and the evolution of Modernism The title thus on the one hand opposes the medium of photography and the materiality of construction but on the other can be read as saying that the camera invariably constructs what it depicts the photograph is not a simple representation of an external reality but constructs its own meanings and reconstructs its subjects Twenty three essays by a wide range of historians and theorists are grouped under the themes of Modernism and the Published Photograph Architecture and the City Re imagined Interpretative Constructs and Photography in Design Practices They are preceded by an Introduction that comprehensively outlines the subject and elaborates on the diverse historical and theoretical contexts of the authors approaches Camera Constructs provides a rich

and highly original analysis of the relationship of photography to built form from the early modern period to the present day

Sculptural Materiality in the Age of Conceptualism Marin R. Sullivan, 2017-07-05 *Sculptural Materiality in the Age of Conceptualism* is structured around four distinct but interrelated projects initially realized in Italy between 1966 and 1972 Yayoi Kusama's Narcissus Garden Michelangelo Pistoletto's Newspaper Sphere Sfera di giornali Robert Smithson's Asphalt Rundown and Joseph Beuys's Arena These works all utilized non traditional materials collaborative patronage models and alternative modes of display to create a spatially and temporally dispersed arena of matter and action with photography serving as a connective material thread within the sculpture it reflects While created by major artists of the postwar period these particular projects have yet to receive substantive art historical analysis especially from a sculptural perspective Here they anchor a transnational narrative in which sculpture emerged as a node a center of transaction comprising multiple material phenomenon including objects images and actors When seen as entangled polymorphous entities these works suggest that the charge of sculpture in the late postwar period came from its concurrent existence as both three dimensional phenomena and photographic image in the interchanges among the materials that continue to activate and alter the constitution of sculpture within the contemporary sphere *Contemporary Art About Architecture* Nora Wendl, 2017-07-05

An important resource for scholars of contemporary art and architecture this volume considers contemporary art that takes architecture as its subject Concentrated on works made since 1990 *Contemporary Art About Architecture A Strange Utility* is the first to take up this topic in a sustained and explicit manner and the first to advance the idea that contemporary art functions as a form of architectural history theory and analysis Over the course of fourteen essays by both emerging and established scholars this volume examines a diverse group of artists in conjunction with the vernacular canonical and fantastical structures engaged by their work I Mangano Ovalle Matthew Barney Monika Sosnowska Pipa Nguyen duy and Paul Pfeiffer are among those considered as are the compelling questions of architecture's relationship to photography the evolving legacy of Mies van der Rohe the notion of an architectural unconscious and the provocative concepts of the unbuilt and the unbuildable Through a rigorous investigation of these issues *Contemporary Art About Architecture* calls attention to the fact that art is now a vital form of architectural discourse Indeed this phenomenon is both pervasive and in its individual incarnations compelling a reason to think again about the entangled histories of architecture and art **The Last Picture**

Show Douglas Fogle, 2003 Photography has become an increasingly pervasive medium of choice in contemporary art practice and is even employed at times by artists who do not necessarily consider themselves to be photographers How did this come to be *The Last Picture Show* will address the emergence of this phenomenon of artists using photography by tracing the development of conceptual trends in postwar photographic practice from its first glimmerings in the 60s in the work of artists such as Bernd portraiture and cultural identity the formal and social architectonics of the built environment societal and individual interventions in the landscape photography's relationship to sculpture and painting the visual mediation of

meaning in popular culture and the poetic and conceptual investigation of visual non sequiturs disjunctions and humorous absurdities Bringing together a newly commissioned body of scholarship with reprints of important historical texts The Last Picture Show seeks to define the legacy that has produced a rich body of photographic practice in the art world today
