Bratton, 2016-02-19 A comprehensive political and design theory of planetary scale computation proposing that The Stack an accidental megastructure is both a technological apparatus and a model for a new geopolitical architecture What has planetary scale computation done to our geopolitical realities It takes different forms at different scales from energy and mineral sourcing and subterranean cloud infrastructure to urban software and massive universal addressing systems from interfaces drawn by the augmentation of the hand and eye to users identified by self quantification and the arrival of legions of sensors algorithms and robots Together how do these distort and deform modern political geographies and produce new territories in their own image In The Stack Benjamin Bratton proposes that these different genres of computation smart grids cloud platforms mobile apps smart cities the Internet of Things automation can be seen not as so many species evolving on their own but as forming a coherent whole an accidental megastructure called The Stack that is both a computational apparatus and a new governing architecture We are inside The Stack and it is inside of us In an

account that is both theoretical and technical drawing on political philosophy architectural theory and software studies Bratton explores six layers of The Stack Earth Cloud City Address Interface User Each is mapped on its own terms and understood as a component within the larger whole built from hard and soft systems intermingling not only computational forms but also social human and physical forces This model informed by the logic of the multilayered structure of protocol stacks in which network technologies operate within a modular and vertical order offers a comprehensive image of our emerging infrastructure and a platform for its ongoing reinvention The Stack is an interdisciplinary design brief for a new geopolitics that works with and for planetary scale computation Interweaving the continental urban and perceptual scales it shows how we can better build dwell within communicate with and govern our worlds thestack.org **Rethinking the Power of Maps** Denis Wood, 2010-04-16 A contemporary follow up to the groundbreaking *Power of Maps* this book takes a fresh look at what maps do whose interests they serve and how they can be used in surprising creative and radical ways Denis Wood describes how cartography facilitated the rise of the modern state and how maps continue to embody and project the interests of their creators He demystifies the hidden assumptions of mapmaking and explores the promises and limitations of diverse counter mapping practices today Thought provoking illustrations include U S Geological Survey maps electoral and transportation maps and numerous examples of critical cartography participatory GIS and map art *Robert Smithson* George Thomas Baker, 2005 Devoted to the masterpiece earthwork of Robert Smithson this features a wealth of unpublished archival and new photographs and a fresh testament to the grandeur and scope of the Spiral Jetty **Robert Smithson** Robert A. Sobieszek, Robert Smithson, 1993 There have been other exhibitions of his works but Robert Smithson Photo Works is the first to examine his use of the camera and to present the way he saw the unique landscapes in which he traveled and located his art As demonstrated by curator of photography Robert A Sobieszek the photographic image was central to Smithson's art whether in collages montages sequences films or alone Smithson's final projects attempted a collaboration art and industry He believed artists could assist in reclaiming such devastated areas as open face strip mines Our expanding presence in and impact upon the land may have become so pervasive that the boundaries between nature and culture have been all but obliterated Now two decades after his death Robert Smithson's lessons are all the more vital and significant from preface **Earthwards** Gary Shapiro, 1995 The untimely death of Robert Smithson in 1973 at age 34 robbed postwar American art of an unusually creative practitioner and thinker Smithson's pioneering earthworks and installations of the 1960s and 70s anticipated concerns with environmentalism and site specific artistic production Gary Shapiro's insightful study of Smithson's career is the first book to address the full range of the artist's dazzling virtuosity
