Passibility Wolff-Michael Roth, 2011-08-05 This book argues that the constructivist metaphor has become a self appointed overriding concept that suppresses other modes of thinking about knowing and learning science Yet there are questions about knowledge that constructivism cannot properly answer such as how a cognitive structure can intentionally develop a formation that is more complex than itself how a learner can aim at a learning objective that is by definition itself unknown

how we learn through pain suffering love or passion and the role emotion and crises play in knowing and learning In support of the hypothesis that passibility underlies cognition readers are provided with a collation of empirical studies and phenomenological analyses of knowing and learning science in schools scientific laboratories and everyday life all of which defy a constructivist explanation The author argues that passibility constitutes an essential factor in the development of consciousness with a range of essential experiences that cannot be brought into the linguistic realm His exploration is guided by concepts such as otherness passion passivity and undecidability and concludes by resituating the construction metaphor to accord it its proper place in a more comprehensive theory of learning Things Seen and Unseen Orion

Edgar,2016-09-29 The philosophy of Maurice Merleau Ponty was developing into a radical ontology when he died prematurely in 1961 Merleau Ponty identified this nascent ontology as a philosophy of incarnation that carries us beyond entrenched dualisms in philosophical thinking about perception the body animality nature and God What does this ontology have to do with the Catholic language of incarnation sacrament and logos on which it draws In Things Seen and Unseen Orion Edgar argues that Merleau Ponty s philosophy is dependent upon a logic of incarnation that finds its roots and fulfillment in theology and that Merleau Ponty drew from the Catholic faith of his youth Merleau Ponty s final abandonment of Christianity was based on an understanding of God that was ultimately Kantian rather than orthodox As such Merleau Ponty s philosophy suggests a new kind of natural theology one that grounds an account of God as ipsum esse subsistens in the questions produced by a phenomenological account of the world This philosophical ontology also offers Christian theology a route away from dualistic compromises and back to its own deepest insight **Text, Speech, and Dialogue** Petr
