Public Procurement and the EU Competition Rules Albert Sánchez Graells, 2015-06-25 Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market This process of convergence between competition and public procurement law is particularly apparent in the 2014 Directives on public procurement which consolidate the principle of competition in terms very close to those advanced by the author in the first edition This second edition builds upon this approach and continues to ask how competition law principles inform and condition public procurement rules and whether the latter in their revised form are adequate to ensure that competition is not distorted The second edition also deepens the analysis of the market behaviour of the public buyer from a competition perspective Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted competition in the market for public procurement It also traces the increasing relevance of competition considerations in the case law of the Court of Justice of the European Union and sets out criteria and recommendations to continue influencing the development of EU Economic Law

Services publics et droit public économique: Services publics et droit public économique Didier Linotte, Achille Mestre, Raphaël Romi, 1982

Capital, Market and the State Ilektra Antonaki, 2021-10-25 This book explores how the EU free movement of capital provisions can be interpreted in order to allow certain forms of State participation in the market for the purposes of protecting public interest objectives in the context of privatisations and golden shares Drawing from the international controversy regarding the risks and benefits of capital liberalisation the book argues that the broad interpretation of capital restrictions under Article 63 TFEU has significant consequences for national political economy choices and investigates the extent to which the existing legal framework set out in the Treaties offers room for reconciling economic integration with societal values

State and Market in European Union

Law Wolf Sauter, Harm Schepel, 2009-04-16 An examination of the legal framework of the EU internal market as established in the case law of the European Court of Justice discussing in particular EC competition law the free movement of goods services persons and capital and the evolution of the interpretation of the provisions The State has been retreating from direct intervention in economic life as more goods and services the provision of which was once thought to be a public responsibility are delivered through market mechanisms Given the need for consistent application of EC law in the internal market a common core conception of public authority shielded from the discipline of EC competition law is needed The resulting realignment of public and private functions and responsibilities is not a linear and coherent process especially in light of the changing nature of the European legal integration project and the progressive incorporation of non economic values in the Treaties

La transition énergétique à l'épreuve du droit public économique Alberto

Corduas, 2018-03-01 Cet ouvrage a tout d'abord permis de constater que le droit de l'énergie est un droit composite qui ne peut être dissocié des problématiques afférentes au droit de la concurrence Dans ce cadre la transition énergétique est ici définie comme le passage d'un système énergétique fondé principalement sur des énergies fossiles vers un bouquet énergétique reposant sur des sources énergétiques renouvelables L'ouvrage traite essentiellement de la transition énergétique sous l'angle du droit économique Dans cette perspective une étude comparative des systèmes juridiques français et italien au regard notamment des politiques publiques a été proposée afin de mettre en exergue les alternatives ventuelles au modèle énergétique existant en France Cette approche a permis de tracer les contours de deux modèles énergétiques différents et d'identifier les éléments nécessaires à une véritable mise en œuvre de la transition énergétique Par la prise en compte de l'exemple italien une analyse prospective a été effectuée afin de préciser le chemin que la France pourrait faire et l'impact que cela pourrait avoir sur le marché de l'électricité D'importantes différences ont été constatées au niveau des mécanismes d'incitations aux énergies renouvelables des fondements constitutionnels de la décentralisation et du développement de la régulation du secteur électrique L'impact de la transition énergétique sur le développement des centrales nucléaires françaises a également été analysé Cet ouvrage tend à montrer qu'il n'existe pas de modèle idéal en matière de transition énergétique Néanmoins une mise en œuvre efficace de la transition énergétique doit nécessairement prendre en compte les exemples des autres pays Cet ouvrage a également permis de mettre jour au 1er novembre 2016 les textes et la jurisprudence dans une matière qui a très récemment subi de profondes mutations durant ces dernières années Par la richesse de ses sources comparées il intéressera autant les professionnels et leurs conseils que les universitaires et les pouvoirs publics

Public Private Partnerships Sara Valaguzza, Eduardo Parisi, 2020-01-31 This insightful book critically examines the phenomenon of public private partnerships through a global theoretical lens It considers the reasons for merging private entities and public administration as well as the processes and consequences of doing so The benefits for the community as well as the radical changes in the principles and modalities of administrative activity are theorized and discussed
