Set Off in the Construction Industry Neil F. Jones, 1991

Set-off Defences in International Commercial Arbitration

Christiana Fountoulakis, 2010-12-22 The book deals with set off in international arbitration proceedings In these proceedings set off is frequently the tool relied upon to resist a claim At the same time the legal intricacies make it hard to use The first part of the book provides a survey of set off including its definition significance and functions The second part offers a thorough comparative analysis of selected European laws of set off and reveals the dramatic differences between them The third and last part of the book deals with the problematic consequences of these differences and shows the limits and the inadequacy of the traditional choice of law doctrines While demonstrating how to overcome the practical hurdles of the present situation the third part also offers normative alternatives that should provide significant help in the adjudication of commercial disputes This title is included in Bloomsbury Professional's International Arbitration online service A

Commentary on "construction Contracts" Raymond Joyce, 1996 This Housing Grants Construction and Regeneration Act 1996 which received Royal Assent during July 1996 will fundamentally change the way in which construction contracts are to administered and managed Part 2 of the Act which seeks to regulate the agreements entered into by parties involved with construction projects raises many questions for anyone responsible for construction contracts not least what is a construction contract This book presents a section by section commentary and critical review of Part 2 of the Act It identifies the main provisions and highlights the difficult issues to be addressed when negotiating drafting and administering construction contracts

Construction Adjudication John Riches, Christopher Dancaster, 2008-04-15 Adjudication has been the main means of settling construction disputes since it was first introduced by the Housing Grants Construction and Regeneration Act 1996 and a substantial body of case law has now built up This book established itself as the key authority on adjudication when it was first published It has now been revised to reflect the authors experience of adjudication in practice and to cover the large number of court decisions It features useful appendices on adjudication materials

The New Engineering Contract Arthur McInnis, 2001 The introduction of the New Engineering Contract NEC encourages a systematic approach to contracting which is multidisciplinary in nature and fully interlocked in form The NEC is intended by its supporters to be more flexible and easier to use than any current leading traditional standard forms of contract It is believed that these

features reduce adversariality and disputes The NEC seeks to achieve this aim primarily through co operative management techniques and incentives built into the NEC s procedures This commentary analyses and evaluates these and related claims of innovation The New Engineering Contract A legal commentary examines the background to the NEC its design objectives structure procedures and likely judicial interpretation to determine whether it improves upon the traditional standard forms of contract Special attention is given in the commentary to the development and the significance of the principles underlying preparation of the NEC as well as the arguments in favour of and against them Throughout the detailed commentary upon the NEC clauses comparisons to the traditional forms are also made to highlight unique features and principles of general application The conclusion reached is that the NEC does make a significant contribution to the development of standard forms of contract addresses many of their short comings and offers one of the best models for their future development direction and design The commentary draws upon the body of the project management literature and legal analysis to support its conclusions The New Engineering Contract A legal commentary will be essential reading for lawyers barristers and solicitors as well as engineers and project managers

Adjudication in Construction Law Darryl Royce, 2022-01-20 This book collects all the relevant material regarding the process of adjudication in construction. It provides clarity for those involved in the adjudication process or related proceedings with detailed and reliable analysis of them supported by statutory provisions and judicial observations. *Adjudication in Construction Law* discusses the role of true value adjudications following smash and grab decisions on the basis of the absence of a pay less notice, the restraint of adjudication by injunction, hybrid contracts dealing with both construction operations and other operations, and timing and content of payment notices and pay less notices. Additionally, this book includes a summary of the different procedures adopted in other jurisdictions as well as an explanation of the payment procedures under the statutory framework. It also goes on to append all the relevant statutory material, contractual adjudication procedures and forms. A new feature of this edition is a detailed analysis and discussion of the development and of the rules relating to the acceptability of a wrong answer provided that the right question has been dealt with, only one dispute being susceptible to adjudication, and the necessity or otherwise of a dispute arising under the construction contract. A clear and comprehensive aid, this book is an essential read for lawyers or construction professionals involved in adjudication.

Surveying for Engineers John Uren, Bill Price, 2018-03-13 The fifth edition of this classic textbook sets out the essential techniques needed for a solid grounding in the surveying. The popular and trusted textbook covers the traditional topics such as levelling, measurement of angles, measuring distances, and how to carry out traversing and compute coordinates, as well as the latest technological advances. It is packed with clear illustrations, exercises, and worked examples, making it both a comprehensive study aid for students and a reliable reference tool for practitioners. This text is aimed at students studying surveying as either part of a civil engineering, building, or construction course, or as a separate discipline. It is also useful for students who undertake surveying as an elective subject and is a useful resource for practising surveyors. New to this Edition: The latest developments in Global Navigation Satellite Systems (GNSS), particularly the introduction of network RTK and OS Net, and their applications; Recent developments in survey instruments, methods, and digital technologies, including image processing with total stations and laser scanners; developments in data processing and integration, and updates on Ordnance Survey mapping products.
